

MOST FACTSHEET

September 2016

Dear Investors and my dear Advisor friends,

Do you know how the leading smart phone maker in the world – a US based technology giant has been able to earn the numero uno position among its peers and scale new peaks each passing year? It was the result of a small change which won big results for the company.

When the new CEO took over the reins of the company a second time around, he shrunk the company's product basket to five core products as he was determined that lighter the product bouquet; the faster the company would be able to sprint.

Critics would claim that a limited product basket increases the chances of heavy losses if even one product fails to click with buyers. But he proved them wrong with his thorough approach and a high conviction; he wasn't the only one to follow a focused approach.

Legendary tales of the focused approach are often recounted in the world of equity investments too. The largest most renowned and followed equity investor in the world too has demonstrated the miracle of betting on few horses or putting his eggs in fewer baskets than is usually advocated. The top five investments of this reputed investor made up nearly 65% of his total portfolio.

But aren't lay investors incessantly nudged not to put all eggs in one basket to mitigate risks? Hold on, there's a difference between not putting your eggs in the same basket, putting them in too many baskets and putting them in a selected few baskets! Well, results thrown up by research concludes that splitting the eggs in too many baskets – also termed as diversification in investment parlance but put into practice in an "over" diversified manner – doesn't always reduce the risk. Putting all your eggs in fewer baskets is ideal; it means you should have identified the right basket and you should work overtime to ensure that the chosen basket is safe. On the other hand, putting your eggs into too many baskets in the name of diversification puts onus on you to study and identify that many more baskets, watch after that many more probably less familiar baskets and hope all of them don't break at the same time!

The study of risk associated with open-ended equity schemes measured using standard deviation strongly points out that a broader portfolio doesn't reduce risk. Standard deviation captures the performance swings of a scheme. The higher the fluctuations in a fund's returns, the greater will be its standard deviation. So, if a fund has an average return of 15% with a standard deviation of 4%, then most of the times the returns of the fund would be between 11% (15%-4%) and 19% (15%+4%).

For the ease of comprehension, we call the schemes that held less than 25 stocks as focused, the ones that held 25-50 stocks as diversified and those beyond 50 stocks as over-diversified (they should be really called "spray-and-pray" because no one can profess to thoroughly conduct bottom up research on over 50 companies at the same time!!!).

The analysis of the above mentioned schemes shows that focused or concentrated portfolios (having less than 25 stocks) have generated higher average returns and their standard deviation as a measure of volatility is not significantly higher than the other schemes. On the other hand, there's nothing to really pick between schemes that were supposedly diversified and had between 25 to 50 and over 50 stocks as two separate groups. In fact the average return for >50 group is same as the 25-50 group and there is no decline in standard deviation as a measure of volatility.

If we peg this standard deviation against the returns, we realize that there is more to gain by following a focused equity strategy. Concentrated equity schemes delivered better returns and were even able to curtail the downside during the shorter period as compared with the mixed bag schemes. In turn, these mixed bags were able to steer past equity schemes that had a larger universe of stocks.

What is ailing diversified schemes? They are facing what can be termed a problem of plenty. Splitting the apples into too many baskets forces the fund manager to spend more time on monitoring each basket rather than picking up the right apples.

If the fund manager has fewer stocks to scrutinize day-in-day-out and track monthly top lines and quarterly results, he would be able to allocate more time to cherry pick the right horse that would lead him to victory. We all know one cannot change a horse mid-race.

This impact of concentration on portfolio returns has been studied by several analysts. Most recently, two reputed academicians analyzed the performance of 536 global equity funds over the period of 1995-2007 and noted their findings in the report which concluded, "Evidence from U.S. equity mutual funds suggests that fund managers, who are willing to take big bets and hold more concentrated portfolios, display better performance than managers who hold more broadly diversified portfolios."

The reason is simple. If you have a limited basket to invest you would place your best bets only after doing adequate research as one wrong move could abysmally impact the returns. One can draw similarities between a fund manager and a gardener, who has to choose a handful of plants for the given area. He would always handpick the most rewarding plants leaving out the rest as he wouldn't want the fertility and his efforts to be wasted on plants, which merely occupy space.

Similarly, a focused scheme's fund manager would dive in only if he is convinced about the business. He/she would be privy to superior information about specific market segments and players. He would then invest and nurture for long term to bear the fruits. Unless he sows a higher area (read high concentration in stocks), he won't be able to multiply the profits well.

One great equity investor, who detested diversification, once said, "Wide diversification is only required when investors do not understand what they are doing."

Data shows that while there are thousands of listed companies; individual investors (Non Promoter Non Institutional) have a lower share of holding in the larger indices like Nifty 50, BSE 200 or even Nifty 500. Retail or NPNI holding is higher in non-index smaller companies. In the Indian context, it is equally remarkable that Nifty 50 accounts for almost 60% of total market cap, BSE 200 accounts for nearly 85% of market cap and Nifty 500 accounts for nearly 93% of market cap. This means that while bulk of the market value resides with the top 500 companies, retail direct investors 'holding is with the "long tail" which doesn't hold much value. Mutual Funds typically tend to have large portfolios ranging from 25, 30 to even a 100 stocks, which restricts transparency. Investors may or may not be able to see what they are holding fully. And for investors holding 5-6-7 different funds in their portfolios, they end up holding over 250-300 stocks, even if they de-duplicate the holdings through proper analysis they would realize they pretty much own whatever of the market there is to own resulting in dilution of returns.

As you can see there are multiple reasons to remain focused! At Motilal Oswal AMC, not only do we run focused portfolios, we are also very focused business managers as we focus on only equity management and within equity we focus only on one investing style – that of buying right companies and holding on to them through their growth cycle – BUY RIGHT : SIT TIGHT!

Happy Investing,

Yours Sincerely,

Aashish P Somaiyaa

Managing Director and CEO

Motilal Oswal MOST Focused 25 Fund

(An Open Ended Equity Scheme)

About the Scheme

Scheme Name	Motilal Oswal MOST Focused 25 Fund (MOST Focused 25)
Type of Scheme	An Open Ended Equity Scheme
Investment Objective	The investment objective of the Scheme is to achieve long term capital appreciation by investing in upto 25 companies with long term sustainable competitive advantage and growth potential. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.
Benchmark	Nifty50 Index
Continuous Offer	Minimum Application Amount : ₹5,000/- and in multiples of ₹1/- thereafter. Additional Application Amount : ₹1,000/- and in multiples of ₹1/- thereafter.
Redemption proceeds	Normally within 3 Business days from acceptance of redemption request.
Entry / Exit Load	Nil

Fund Manager

Fund Manager*	Mr. Taher Badshah
Experience	He has 21 years of experience in fund management and investment research. He has been managing this fund since inception.
Co-Fund Manager*	Mr. Siddharth Bothra
Experience	He has a rich experience of more than 15 years in the field of research and investments. He has been co-managing this fund since May 4, 2015.

*For Equity Component.

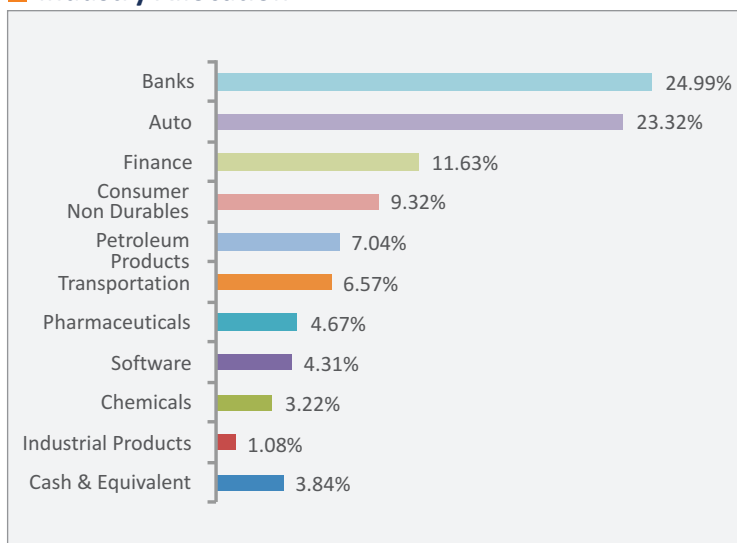

Debt Component - Mr. Abhiroop Mukherjee

BUY RIGHT : SIT TIGHT

Buying quality companies and riding their growth cycle

At Motilal Oswal Asset Management Company, our investment philosophy is centered on two critical pillars of equity investing – 'Buy Right: Sit Tight'. 'Buy Right' means buying quality companies at a reasonable price and 'Sit Tight' means staying invested in them for a longer time to realise the full growth potential of the stocks.

It is a known fact that good quality companies are in business for decades but views about these companies change every year, every quarter, every month and sometimes every day! While many of you get the first part of identifying good quality stocks, most don't stay invested for a long enough time. The temptation to book profits at 25% or 50% or even 100% returns in a 1 to 3 year period is so natural that you miss out on the chance of generating substantial wealth that typically happens over the long term; say a 10 year period.

'Buy Right' Stocks Characteristics

QGLP

- **'Q'uality** - quality of the business and management
- **'G'rowth** - growth in earnings and sustained Return on Equity
- **'L'ongevity** - longevity of the competitive advantage or economic moat of the business
- **'P'rice** - our approach of buying a good business for a fair price rather than buying a fair business for a good price

Sit Tight Approach

- **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle, needs even more skill.
- **Focus:** Our portfolios are high conviction portfolios with 20 to 25 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk.

This Buy Right : Sit Tight philosophy manifests itself in all the products in our Portfolio Management and Equity Mutual Fund schemes
