I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital market/debt market.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 100,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Equities**

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, should there be a subsequently decline in the value of the securities held in the Schemes portfolio.

The Scheme may find itself invested in unlisted securities either by choice or due to external events or corporate actions. This may increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.

- **Asset Class Risk**

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

- **Interest Rate Risk**
 Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.
- **Credit Risk**
 Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.
- **Liquidity or Marketability Risk**
 This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.
- **Risk associated with MOVI**
 The Scheme shall invest a portion of its assets into equity and debt securities based on Motilal Oswal Value Index (MOVI) levels. Hence, the risk associated with the calculation of MOVI and allocations based on MOVI would be applicable to the Scheme. The allocations as per MOVI shall vary due to market conditions. These allocations based on MOVI level may not outperform a fully invested equity portfolio.
- **Right to Limit Redemptions**
 The Trustee, in the general interest of the Unitholders of the Scheme offered under this SID and keeping in view of unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.
- **Risks associated with Investing in Derivatives**
 Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager

involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risk associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes securities lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

India has joined the Multilateral Competent Authority Agreement on Automatic Exchange of Information (AEOI) for Common Reporting Standard (CRS). The CRS on AEOI requires the financial institution of the “source” jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries, such information having to be transmitted “automatically” annually. provide legal basis for the reporting financial institution for maintaining and reporting information about the reportable accounts.

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open ended equity scheme

B. INVESTMENT OBJECTIVE

The investment objective is to generate long term capital appreciation by investing in equity and equity related instruments including equity derivatives as well as debt instruments.

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

C. ASSET ALLOCATION

The asset allocation pattern of the Scheme would be as follows:

Instruments	Allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Equity & equity related instruments	65	100	High
Equity Derivatives	0	35	Low to Medium
Debt Instruments, Money Market Instruments, G-Secs, Cash and Cash at call, etc.	0	35	Low to Medium

Money Market Instruments include CMBs, T-Bills, and Government securities with an unexpired maturity upto one year, CBLOs & Repo/ Reverse Repo.

In the Scheme, the net long only equity exposure shall be a minimum of 30% of the portfolio value. The Scheme may invest in derivative strategies from time to time as permitted by SEBI/RBI. The Scheme may take derivatives position upto 35% of the portfolio value. The Scheme shall not write options or purchase instruments with embedded written options. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.

The Scheme may engage in securities lending upto 20% of total Net Assets of the Scheme and would limit its maximum single party exposure to the extent of 5% of the total net assets at the time of lending.

The Scheme shall not invest in Credit Default Swaps (CDS). The Scheme will not invest in foreign securities, securitized debt, corporate debt repo and corporate reverse repo. The Scheme shall not undertake short selling.

CHANGES IN INVESTMENT PATTERN

The Scheme shall invest in equity and equity related instruments, equity derivatives, debt and money market instruments as per the investment objective of the scheme. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.

NFO SID of Motilal Oswal MOST Focused Dynamic Equity Fund

The Scheme may review the above pattern of investments based on views on Indian equities and asset liability management needs. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Subject to SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. These proportions may vary depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and for defensive considerations only. In case of deviation, if any, from the asset allocation pattern, the AMC shall rebalance the portfolio within a period of 30 calendar days. Where the portfolio is not rebalanced within 30 calendar days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

D. INVESTMENT BY THE SCHEME

The Scheme will invest in Equity and Equity related instruments including derivatives, Debt instruments, Money Market Instruments, G-Sec, Cash and cash equivalents, etc.

Subject to the Regulations and other prevailing Laws as applicable, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

- Equity and Equity related instruments
- Debt securities and Money Market Instruments (including reverse repos and CBLOs).
- Derivative including Index Futures, Stock Futures, Index Options and Stock Options etc. and such other derivatives instruments permitted under Regulations.
- Pending deployment of funds as per the investment objective of the Scheme, the funds may be parked in short term deposits of scheduled commercial banks, subject to guidelines and limits specified by SEBI.
- Any other instruments as may be permitted by RBI/SEBI under prevailing laws from time to time.

The investment restrictions and the limits are specified in the Schedule VII of SEBI Regulations which are mentioned in the section 'Investment Restrictions'.

Equity related instruments include cumulative convertible preference shares and fully convertible debentures and bonds of companies. It may also include partly convertible issues of debentures and bonds including those issued on rights basis subject to the condition that, as far as possible, the nonconvertible portion of the debentures so acquired or subscribed, shall be disinvested within a period of twelve months.

The Securities mentioned above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity. The Securities may be acquired through initial public offerings, secondary market operations, and private placement, rights offers or negotiated transactions. The scheme may invest the funds of the scheme in short term deposits of scheduled commercial banks as permitted under extant regulations as per SEBI Circular No. SEBI/IMD/CIR No.9/20306/03 dated November 12, 2003, SEBI Circular No. SEBI/IMD/Cir No.1/91171/07 dated April 16, 2007 and Clause 8 of Seventh Schedule of Mutual Funds Regulations, 1996. As per the stated Regulations, Mutual Funds shall not park more than 15% of their net assets in short term deposits of all scheduled commercial banks put together. This limit however may be raised to 20% with prior approval of the Trustees. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of the total deployment by the Mutual Fund in short term deposits.

E. INVESTMENT STRATEGY

In the Scheme, the core long only equity exposure shall be a minimum of 30% of the portfolio value. Long only equity exposure means exposure to equity shares alone without a corresponding equity derivative exposure.

The Fund will use Motilal Oswal Value Index (MOVI) as an indicator for the asset allocation between Equities, Arbitrage, Derivatives strategies and Debt. The asset allocation shall be reviewed twice a month and the rebalancing will be conducted on 15th of every month and a day prior to derivative expiry day on the Exchange (if the above days are a non-business day, the previous business day shall be considered for rebalancing). However, there may be additional rebalances at the discretion of the Fund manager. However the rebalancing will always be based on the MOVI levels.

The MOVI helps gauge attractiveness of the equity market. The MOVI is calculated taking into account Price to Earnings (P/E), Price to Book (P/B) and Dividend Yield of the Nifty 50 Index. The MOVI is calculated on 30 Daily Moving Average of the above parameters. A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

The equity allocation based on the MOVI levels is as below:

MOVI Levels		Equity Exposure
Less than 70		100%
70	<80	90%
80	<90	80%
90	<100	70%
100	<110	55%
110	<120	40%
120	<130	25%
130 or above		0%

India Index Services & Products Ltd. (IISL) is the calculating agent of NIFTY MOVI. IISL shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.

Any change in methodology of MOVI would be construed as change in Investment Strategy and will be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund. Hence, it will be construed as a change in fundamental attribute and accordingly, the relevant regulatory provisions will be applicable.

Equity Investment: The Fund shall follow an active investment style using bottom-up stock picking based on the 'Buy Right : Sit Tight' investment philosophy. The Fund managers shall identify and invest in shares of businesses run by high quality management & having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation

NFO SID of Motilal Oswal MOST Focused Dynamic Equity Fund

parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The Fund Portfolio shall comprise of high conviction stock ideas from across market-capitalization levels/sectors. The portfolio stocks may be potentially concentrated in a few market capitalization levels/sectors which are expected to do well and have lower downside risk

Debt: The Fund shall invest in various types of permitted Debt Instruments including Government Securities, Corporate Debt, Other debt instruments and Money Market Instruments of various maturities and ratings with the objective of providing liquidity and achieving optimal returns.

Arbitrage and Derivative Strategies: The Fund shall undertake Cash/Futures Arbitrage to take advantage of the volatile situation in the market. The Fund may use Derivative including Index Futures, Stock Futures, Index Options and Stock Options etc.

Following depicts more clarity on MOVI based Scheme allocation.

MOVI Levels		Equity Exposure as per MOVI	Scheme Allocations		
			Equity	Equity Arbitrage	Debt Instruments
Less than 70		100%	100%	0%	0%
70	<80	90%	90%	0%	10%
80	<90	80%	80%	0%	20%
90	<100	70%	70%	0%	30%
100	<110	55%	55%	10%	35%
110	<120	40%	40%	25%	35%
120	<130	25%	30%	35%	35%
130 or above		0%	30%	35%	35%

Scenario 1 - Let's assume the MOVI level is at 60 which means it falls in the range of 100% equity allocation. Therefore, the fund manager in the above case will take upto 100% long only equity exposure.

Scenario 2 - Let's assume the MOVI level is at 100 which means it falls in the range of 55% equity allocation. Therefore, the fund manager in the above case will take 55% long only equity exposure and minimum 10% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 3 - Let's assume the MOVI level is at 120 which means it falls in the range of 25% equity allocation. Therefore, the fund manager in the above case will take 30% long only equity exposure and minimum 35% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 4 - Let's assume the MOVI level is at 150 which means it falls in the range of 0% equity allocation. Therefore, the fund manager in the above case will take 30% long only equity exposure and minimum 35% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

In the periods where the MOVI levels indicates a 100% equity allocation, the exposure of the scheme in equity and equity related instruments will increase upto 100%. However, if the MOVI levels reflect high valuation, the Scheme will restrict its investment in equity to 30% and shall take

arbitrage positions to the extent of 35% of the portfolio, therefore resulting into an equity category exposure of 65%. In such a scenario the balance will be invested into debt market instruments.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration. The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

Investments in Derivative Instruments

The Scheme may invest in derivative products from time to time, for portfolio rebalancing and hedging purposes. The Scheme may enter into forward contracts, future contracts or buy or sell options or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Scheme. Exposure by the Scheme in derivative instruments shall not exceed 50% of the total Net Assets of Scheme.

The scheme-wise position limit requirements shall be:

a. For stock option and stock futures contracts, the gross open position across all Derivative contracts on a particular underlying stock of the Scheme shall not exceed the higher of:

1% of the free float market capitalisation (in terms of number of shares) or 5% of the open interest in the Derivative contracts on a particular underlying stock (in terms of number of contracts).

The Fund shall not write options or purchase instruments with embedded written options. The total exposure related to option premium paid must not exceed 25% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:

- a. Hedging positions are the Derivative positions that reduce possible losses on an existing position in Securities and till the existing position remains.
- b. Hedging positions cannot be taken for existing Derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned above.
- c. Any Derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- d. The quantity of underlying associated with the Derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

However, exposure due to Derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned above.

Definition of Exposure in case of Derivative Positions

Each position taken in Derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain Derivative positions may theoretically have unlimited possible loss. Exposure in Derivative positions shall be computed as:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

Index Futures

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfil the terms of the contract.

Stock index futures are instruments which are designed to provide exposure to the movement of a particular equity market index.

The BSE and the NSE have started trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index and interest rates.

- Investment in stock index futures can give exposure to the index without directly buying the Stocks.
- The Scheme can sell futures to hedge against market movements effectively without the stock it holds.

Illustration

1 month nifty future price on day 1: 5675.

Assume Scheme buys 200 futures contracts at this level of 5675.

Each lot has a nominal value equivalent to 50 units of the underlying index

Scenario 1: On the date of settlement, the future price = closing spot price of the index = 5685

The profits for the Scheme as a result of this transaction = $(5685-5675) * 200 \text{ lots} * 50 = \text{Rs } 100,000$

Scenario 2: On the date of settlement, the future price = closing spot price of the index = 5670

The loss for the Scheme as a result of this transaction = $(5670-5675) * 200 \text{ lots} * 50 = (\text{Rs } 50,000)$

As illustrated by the above scenarios, in simple terms (not taking in to account any margin that may be payable to the Scheme's counterparty as a result of entering in to the futures transaction) the net impact for the Scheme will be a function of the closing spot price of the underlying index on the date of settlement relative to the original purchase price at the outset.

Illustration

Assume the Scheme buys a 1 month call option on Company 'X' at a strike of Rs. 290, and the current market price is Rs.291.

Assume the Scheme will have to pay a premium of say Rs. 5 to buy this call.

If the stock price goes below Rs. 290 during the tenure of the call, the Scheme avoids the loss it would have incurred had it bought the stock instead of the call option. However, the Scheme gives up the premium of Rs. 5 that has to be paid in order to protect the Scheme from this probable downside.

If the stock goes above Rs. 290, the Scheme is able to exercise its right and own Company 'X' at a cost price of Rs. 290, thereby participating in the upside of the stock.

Buying a put option

Buying a put option on a stock originally held by the buyer gives him / her the right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option including SEBI Circular dated November 16, 2007.

Illustration

Assume the Scheme owns Company 'X' and also buys a three-month put option on Company 'X' at a strike of Rs. 290, and the current market price being say Rs. 291.

Assume the Scheme will have to pay a premium of say Rs. 2 to buy this put.

If the stock price goes below Rs. 290 during the tenure of the put, the Scheme can still exercise the put and sell the stock at Rs. 290, avoiding therefore any downside on the stock below Rs. 290. However, the Scheme gives up the fixed premium of Rs. 2 that has to be paid in order to protect the Scheme from this probable downside.

If the stock goes above Rs. 290, say to Rs. 320, it will not exercise its option. The Scheme will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs. 320.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

The Scheme may lend securities from its portfolio in accordance with the Regulations. The AMC/Fund shall also adhere to guidelines issued under Securities Lending Scheme, 1997. Securities' lending shall enable the Scheme to earn income that may partially offset its expenses and thereby reduce the effect these expenses have on the Scheme's ability to provide investment returns. The Scheme will pay reasonable administrative and custodial fees in connection with the lending of securities. The Scheme may be exposed to the risk of loss should a borrower default on its obligation to return the borrowed securities. The Scheme share of income from the lending collateral will be included in the Scheme's gross income. The Fund will comply with the conditions for securities lending specified by SEBI Regulations and circulars. The Scheme may engage in securities lending upto 20% of total Net Assets of the Scheme and would limit its maximum single party exposure to the extent of 5% of the total net assets at the time of lending.

SEBI, for the purpose of further analysis has shortlisted Motilal Oswal Securities Limited (“**MOSL**”) along with other sub-syndicate members and called upon to show cause as to why action should not be taken under Regulation 25 and 27 of SEBI (Intermediaries) Regulation, 2008. The said Show Cause Notice has been issued alleging that MOSL have violated the provisions of Section 12 A (a),

(b) and (c) of the Securities and Exchange Board of India Act, 1992, Regulation 3 (b) and (d), 4 (1), 4 (2) (a) and (b) of the Securities and Exchange Board of India (Prohibition of Fraudulent and Unfair Trade Practices Relating to Securities Market) Regulations, 2003 and Clause 6 (a) of Schedule XI of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009. SEBI had imposed restrictions on Mr. Shailesh Jayantilal Shah, Mr. Rajesh Jayantilal Shah and Ms. Ritaben Rohitkumar Shah, who are all clients of MOSL, from buying, selling or dealing in the securities market. SEBI observed that some brokers, including MOSL, had executed trades on behalf of the above three clients after the debarment order. SEBI called upon MOSL to show cause as to why further action (under SEBI (Intermediaries) Regulations, 2008) should not be taken against MOSL for alleged violation of the provisions of Regulation 27(xv) and 27(xvii) read with Regulations 26(xv) of the SEBI (Stock-Brokers and Sub-Brokers) Regulations, 1992, and Clause A(1), A(2) and A(5) of the Code of Conduct for Brokers (as specified in Schedule II under Regulation 7 of the SEBI (Stock-Brokers and Sub-Brokers) Regulations, 1992). On June 14, 2012, MOSL requested SEBI to drop the allegations and dispose of the Show Cause Notice without any penalty as MOSL took the view that it had not violated the provisions, as SEBI had alleged, on the ground that MOSL had only closed out outstanding position(s) in respect of sale transaction(s) on behalf of the clients, which were offset against the outstanding transaction. In its request to SEBI, MOSL highlighted that the clients in question were dealing on a regular basis with MOSL until 23 April, 2009 when they were barred by SEBI from dealing in securities. The trading accounts were temporarily active at the dealing desk solely for the purpose of closing out of outstanding positions and as such, existing open positions were closed out by MOSL by executing sale transaction on 7 May, 2009 for securities of the clients purchased from 22 April to 23 April, 2009. Thereafter the trading accounts of the clients were deactivated. MOSL submitted that there was no malice in trades being executed for clients and that closing out of open position was in line with the directions given by SEBI earlier and consistent with current policies of SEBI. MOSL also cited identical cases as precedent wherein proceedings against brokers were disposed of without imposing any penalty. SEBI vide its order dated December 7, 2015 had issued warning and has closed the proceedings in the matter.

Mohanraj alleging unauthorised trading, issued a letter dated 29th April 2014 to MOSL notifying appointment of an Adjudicating Officer as per SEBI regulations to hold inquiry and adjudge violation of SEBI Regulations and issued show cause as to why an inquiry should not be held against us in terms of Rule 4 of SEBI (Procedure for holding inquiry and imposing Penalties by Adjudicating Officer) Rules 1995 read with section 15-I of SEBI Act 1992 and why penalty should not be imposed on you under the provisions of section 15HB of the SEBI Act. The said Show Cause Notice has been issued alleging that MOSL have violated Regulation 18 and Clause A(1), A(2), A(4), A(5), B(4)(a), B(4)(b) and B(7) of the Code of Conduct for Stock Brokers as specified under Scheduled II read with Regulation 9(f) of the SEBI (Stock Brokers and Sub-brokers) Regulations, 1992 and SEBI circular No. SEBI/MIRSD/DPS-1/Cir-31/2004 dated August 26, 2004. We have visited to SEBI for hearing and it is intended that Adjudication officer will come back to us.

SEBI on the grounds that the client's shares were sold only with his consent, which is evidenced from (a) his voluntary signing of the Member Client Agreement which granted MOSL the authority to deal in the Capital Market, Futures and Options, and Derivatives segments of the securities market on the client's instructions; (b) his signing of numerous Delivery Instruction Slips for transferring shares from his demat account to MOSL as collateral for trading; and (c) the periodic receipt of electronic contract notes and accounting statements sent by MOSL to the client. MOSL also highlighted that the client had failed to bring the alleged irregularities and discrepancies to the MOSL's attention within the stipulated 24-hour period. Further MOSL received some documents from SEBI, through their Letter dated February 25, 2016. SEBI has not commented on remaining requests placed by MOSL. MOSL has received a communication from SEBI which seeks to have a meeting on 11 July 2016. MOSL replied to SEBI vide letter dtd 8 July 2016. To which SEBI adjourned personal hearing scheduled on July 11, 2016 & informed next date of hearing will be intimated in due course.
