

# Introducing Motilal Oswal 5 Year G-Sec ETF

(An open ended scheme replicating/tracking Nifty 5 yr Benchmark G-Sec Index)

## and Motilal Oswal 5 Year G-Sec FoF

(An open ended fund of funds scheme investing in units of Motilal Oswal 5 Year G-Sec ETF)

30<sup>th</sup> November, 2021

- **Low Risk:** Exposure to Government backed securities
- **Economical:** Invests into low cost passive fund
- **Liquid:** Underlying G-Sec is one of the most liquid security
- **Balanced Tenure:** Falls in a sweet spot between short & long duration
- **Simple:** Easy access to Govt Debt Security

# Why Fixed Income securities

## Diversification

- Historically fixed income securities have had **lower correlation with equities**
- **Help reduce** portfolio **volatility**

## Capital Preservation

- Higher quality fixed income securities are ideal for **capital preservation**
- Although there is still risk to the capital in case the issuer does not make the payment; **sovereign bond are considered to have no credit risk**

## Steady Income

- As the name suggests-these securities provide **regular**, predictable **coupon** payments
- Dividends are at the discretion of the company, while coupons are **legally binding**

## Preferential Tax Treatments

- Some securities may have preferential tax treatments
- **Bonds** attract STCG as per slab rate(<3yrs) & LTCG at 20%(>3yrs) with **indexation benefit**

*The above list is illustrative and not exhaustive*

# Fixed Income- risk/return sources

## Sources of Return

## Sources of Risk

*The above list is illustrative and not exhaustive*

# Attributes of different asset classes

Asset Class	Risk	Role
Cash	Least risky	Provides liquidity
Fixed Income	Low to medium	Provides periodic interest income but may have credit risk
Gold	Low to medium	Acts as inflation hedge
Real estate	High	Earns rental income and have potential for capital appreciation but have higher transaction cost and relatively illiquid
Equities	High	Potential to generate inflation beating return but comes with volatility

**Finding the right mix of asset class (typically with lower correlation) may help generate better risk adjusted returns**

*The above list is illustrative and not exhaustive*

# Fixed Deposits lost sheen over last 5 years

- Fixed Deposits (term deposits) has lost its share to Savings Deposits from the peak of 64% in 2015 to 58% in 2019; the trend is expected to continue due to prevailing low interest rate for fixed deposits environment.
- Shift in preference may be attributed to narrowing spread between Savings deposits and Fixed deposits, consumption preference<sup>1</sup> and availability of wider investment avenues
- Falling interest rates<sup>2</sup> on fixed deposits have prompted the investor to explore different avenues

Share in total deposits<sup>3</sup>

Fixed Deposit Rates<sup>2</sup>

Data Source: [www.niftyindices.com](http://www.niftyindices.com). All performance data in INR. Data as on 01-Dec-2011 – 30-Nov-2021; Hypothetical performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve, performance similar to that shown. The above is for illustration purpose only. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy. The SIP amount, tenure of SIP, expected rate of return are assumed figures for the purpose of explaining the concept of advantages of SIP investments. The actual result may vary from depicted results depending on scheme selected. The above are not scheme SIP returns, but simulation of index SIP returns. It should not be construed to be indicative of scheme performance in any manner. Past performance may or may not be sustained in future

# Drawdown

Nifty 5 yr Benchmark G-sec has experienced **lower drawdowns** compared to indices except Nifty Short Duration Debt Index.

Data Source: [www.niftyindices.com](http://www.niftyindices.com)\_AMFI. Performance Data as of 30-Nov-2006 – 30-Nov-2021; Hypothetical performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve, performance similar to that shown. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy. Past performance may or may not be sustained in future

# – Blending G-sec With Domestic Equities

# Calendar year return

## Bonds experience a lower fluctuation of returns compared to equities

Data Source: [www.niftyindices.com](http://www.niftyindices.com). Performance Data from 31-Dec-2006 – 30-Sep-2021; \* refers 31-Dec-2020 – 30-Sep-2021. Above analysis shows calendar year returns. Hypothetical performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve, performance similar to that shown. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy. Past performance may or may not be sustained in future.

# Hypothetical portfolio allocations

Historically Debt/Bonds (Government Securities) have had **very low correlation of ~13% with domestic equities**, which offers very good diversification opportunity

## Following Hypothetical Allocations between G- Sec and Domestic Equities studied:

#	Portfolio Name	Domestic Equity (Nifty 50 TRI)	Debt (Nifty 5 yr G-sec )
1.	Nifty 5 yr G-sec	100%	0
2.	<b>Nifty 50: Nifty 5 yr G-sec (60:40)</b>	<b>60%</b>	<b>40%</b>
3.	<b>Nifty 50: Nifty 5 yr G-sec (40:60)</b>	<b>40%</b>	<b>60%</b>
4.	Nifty 50 TR index	0%	100%

Data Source: MOAMC Research, [www.niftyindices.com](http://www.niftyindices.com). Correlation of daily total returns as of Close of 30-Sep-2006 to 30-Sep-2021. Performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve. Past performance may or may not be sustained in future.

# Blending Nifty 5 yr. with domestic equities helps increase portfolio returns

The blended debt-equity portfolio helps reduce volatility and enhances portfolio risk adjusted returns

Historical Blended Performance

Data Source: MOAMC Research, [www.niftyindices.com](http://www.niftyindices.com). Performance as of Close of 30-Sep-2006 to 30-Sep-2021. Performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve. Past performance may or may not be sustained in future. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy.

# Risk>Returns profile of indices: blended portfolio

# Returns during stress period

**During period of stress, blended portfolio noted relatively lesser drawdowns**

Period of stress	Nifty 50 TRI	Nifty 5 yr Benchmark G-sec Index	Nifty 50:Nifty 5 yr G-sec (60:40)	Nifty 50:Nifty 5 yr G-sec (40:60)
<b>Global Financial Crisis</b> (01-Jan-2008 To 27-Feb-2009)	-54.4%	16.4%	-27.0%	-12.8%
<b>Taper Tantrum</b> (01-Jan-2013 To 30-Aug-2013)	-7.2%	1.0%	-3.9%	-2.3%
<b>Yuan Devaluation</b> (03-Aug-2015 To 29-Feb-2016)	-18.0%	5.7%	-8.8%	-4.1%
<b>COVID-19</b> (19-Feb-2020 To 23-Mar-2020)	-37.1%	-1.7%	-22.6%	-15.6%

Source- MOAMC Research, [www.niftyindices.com](http://www.niftyindices.com). Performance data as on close of 01-Jan-2008 to 31-Oct-2020. Above analysis shows absolute returns. Hypothetical performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve, performance similar to that shown. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy. Past performance may or may not be sustained in future.

# Index performance- Covid 19 pandemic

The blended portfolio experienced lesser drawdown as compared to pure equity portfolio

## Recent Performance- During COVID 19 Pandemic

- Nifty 5 yr Benchmark G-Sec Index
- Nifty 50 TR Index
- Nifty 50 : Nifty 5yr Benchmark G-sec Index (60 : 40)
- Nifty 50 : Nifty 5yr Benchmark G-sec Index (40 : 60)

Data Source: MOAMC Research, Index Values - [www.niftyindices.com](http://www.niftyindices.com). Performance as of Close of 31-Dec-2019 to 30-Sep-2021. Performance results may have inherent limitations and no representation is being made that any investor will, or is likely to achieve. Past performance may or may not be sustained in future. The above table/graph is used to explain the concept and is for illustration purpose only. It should not be used for development or implementation of any investment strategy.

# 4 reasons to invest in Motilal Oswal 5 Year G-sec ETF

**1**

**'NO'  
Default Risk**

(G-secs backed by  
Government of India)

**2**

**Low Cost**

(Passively managed  
hence low cost)

**3**

**Alternative to  
Fixed Deposits**

(No Lock-in, Indexation  
Benefit, Historical  
outperformance)

**4**

**Diversification  
benefit**

(Low correlation with  
equities)

# Key Take Away

1. Motilal Oswal Nifty 5 yr Benchmark G-Sec ETF **offers investors an opportunity to invest in most liquid G-sec** in the 5 year segment
2. With no lock-in, indexation benefit, and historical higher pre & post tax returns over Fixed Deposits, the **Nifty 5 yr. Benchmark G-Sec Index can be good alternative to traditional Fixed Deposits.** Nifty 5 Yr. Benchmark G-Sec with it's **low correlation with equities**, offers diversification opportunity helping investors reduce overall **portfolio volatility**
3. Given the duration of Nifty 5 Yr. Benchmark G-Sec Index, it falls in the **sweet spot between short and long duration G-Sec**

# - Annexure

# Assumptions

- There is new bond issued at the end of every year with a maturity of 5 year
- It is assumed that the bond is purchased at auction and it is issued at par (coupon=YTM)
- The coupon on the newly issued bond would be equal to the yield on the outgoing old bond as on that day. The coupon is paid out semi annually
- Yield rise/fall if any happens only semi annually
- Starting yield assumed to be 5%

**The above stated assumptions are critical to the simulations, any changes in the above assumption may possibly change the results**

# Simulated impact of yield movement

## Rising yield scenario

Exhibit 1	Performance of 5yr bond subject to 10bps yield rise every 6m			
	6m	1y	2y	3y
Yield	<b>5.10%</b>	<b>5.20%</b>	<b>5.40%</b>	<b>5.60%</b>
Simulated performance	2.10%	4.28%	4.38%	4.48%

Exhibit 2	Performance of 5yr bond subject to 25bps yield rise every 6m			
	6m	1y	2y	3y
Yield	<b>5.25%</b>	<b>5.50%</b>	<b>6.00%</b>	<b>6.50%</b>
Simulated performance	1.51%	3.21%	3.47%	3.72%

## Falling yield scenario

Exhibit 1	Performance of 5yr bond subject to 10bps yield decrease every 6m			
	6m	1y	2y	3y
Yield	<b>4.90%</b>	<b>4.80%</b>	<b>4.60%</b>	<b>4.40%</b>
Simulated performance	2.90%	5.73%	5.63%	5.53%

Exhibit 2	Performance of 5yr bond subject to 25bps yield decrease every 6m			
	6m	1y	2y	3y
Yield	<b>4.75%</b>	<b>4.50%</b>	<b>4.00%</b>	<b>3.50%</b>
Simulated performance	3.50%	6.83%	6.59%	6.35%

Recipient shall understand that the aforementioned statements cannot disclose all the risks and characteristics. The recipient is requested to take into consideration all the risk factors including their financial condition, suitability to risk return, etc. and take professional advice before investing.

**Passive Investments** - The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

## **Risks associated with investing in Government of India Securities**

- Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.
- Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

## **Mutual Fund Investments are subject to market risks, read all scheme related documents carefully**

**NSE Indices Limited Disclaimer:** Motilal Oswal 5 Yr G-Sec ETF is offered by **Motilal Oswal Asset Management Company Limited (MOAMC)** or its affiliates is not sponsored, endorsed, sold or promoted by **NSE Indices Limited** and its affiliates. **NSE Indices Limited** and its affiliates do not make any representation or warranty, express or implied (including warranties of merchantability or fitness for particular purpose or use) to the owners of **Motilal Oswal 5 Yr G-Sec ETF** or any member of the public regarding the advisability of investing in securities generally or in the **Motilal Oswal 5 Yr G-Sec ETF** linked to **Nifty 5 Yr Benchmark G-Sec Index** or particularly in the ability of **Nifty 5 Yr Benchmark G-Sec Index** to track general G-Sec performance in India.
