I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital market/debt market.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Motilal Oswal Liquid Fund is name of the Scheme and it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 100,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme.
- Investors in the Scheme are not being offered any guaranteed/indicated returns.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, yield, return and/or its ability to meet its objectives.

- **Market Risk**

The Scheme's NAV will react to the interest rate movements. The Investor may lose money over short or long period due to fluctuation in Scheme's NAV in response to factors such as economic and political developments, changes in interest rates, inflation and other monetary factors and also movement in prices of underlining investments.

- **Regulatory Risk**

Any changes in trading regulations by NSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

- **Asset Class Risk**

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern.

- **Interest Rate Risk**

Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by modified duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading

to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Modified Duration is a measure of price sensitivity, the change in the value of investment to a 1% change in the yield of the investment.

- **Reinvestment Risk**

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

- **Pre-payment Risk**

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

- **Spread Risk**

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

- **Settlement Risk**

Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

- **Credit Risk**

Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.

- **Liquidity or Marketability Risk**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

- **Risks associated with Segregated portfolio**

The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event/actual default at issuer level. Accordingly, Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. The Security comprised of segregated portfolio may not realise any value. Further, Listing of units of segregated portfolio in recognised stock exchange does not

necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

- **Risk factors associated with Securities Lending**

Stock Lending is a lending of securities through an SEBI approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

- **Risks associated with short selling**

Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity, price movement & volatility of the security by the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

- **Trading through mutual fund trading platforms of BSE and/ or NSE**

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

- **Liquidity Risk**

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

- **Risk associated with investing in fixed income securities and Money Market Instruments**

- a. **Credit risk:** Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk debentures are sold at a yield spread above those offered on Treasury securities, which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.
- b. **Counterparty risk:** Counterparty refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments.
- c. **Interest Rate risk:** This risk is associated with movements in interest rate depends on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However, if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
- d. **Reinvestment risk:** This risk arises from uncertainty in the rate at which cash flows from the securities may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the

coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.

- e. **Liquidity or Marketability Risk:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.
- f. Different types of fixed income securities in which the Scheme would invest carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.
- g. The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

h. Settlement Risk:

Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

Risk Factors Associated with Investments in REITs and InvITs:

- **Risk of lower than expected distributions**

The distributions by the REIT or InvITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:

- Success and economic viability of tenants and off-takers
- Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
- Debt service requirements and other liabilities of the portfolio assets
- Fluctuations in the working capital needs of the portfolio assets
- Ability of portfolio assets to borrow funds and access capital markets
- Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- Amount and timing of capital expenditures on portfolio assets
- Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/ InvITs such as fire, natural disasters, accidents, etc.
- Taxation and regulatory factors

- **Price Risk**

The valuation of REIT/ InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/ InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event to insolvency or liquidation of any of the portfolio assets.

- **Market Risk**

REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/ Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

- **Liquidity Risk**

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

- **Reinvestment Risk**

Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

- **Risks associated with investing in Government of India Securities**

a. Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.

b. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

- **Risks associated with investing in TREPS Segments**

The mutual fund is a member of securities and TREPS segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

- **Risk associated with investing in Repo of Corporate Bond Securities**

To the extent the scheme invests in Repo of Corporate Bond Securities, the scheme will be subject to following risks: Corporate Bond Repo will be subject to counter party risk.

The Scheme will be exposed to credit risk on the underlying collateral– downward migration of rating. The scheme may impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral.

Collateral will require to be rated AA and above rated where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

Liquidity of collateral: In the event of default by the counterparty, the scheme would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the Mutual Fund may incur an impact cost at the time of sale (lower price realization).

- **Risk associated with potential change in Tax structure**

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Creation of segregated portfolio:

A. Introduction:

SEBI vide its circular dated 28 December, 2018 (SEBI/HO/IMD/DF2/CIR/P/2018/160) read with its circular dated 07 November, 2019 (SEBI/HO/IMD/DF2/CIR/P/2019/127), has advised that portfolios by mutual fund schemes investing in debt and money market instruments should have provision in the concerned SID for creating portfolio segregation.

Segregated Portfolio: The portfolio comprising of debt and money market instruments, which might be affected by a credit event and shall also include the unrated debt or money market instruments affected by actual default.

Main Portfolio: Scheme portfolio excluding segregated portfolio

Total Portfolio: Scheme portfolio including the securities affected by credit events

B. Need for segregated portfolio:

While very stringent internal credit evaluation norms are being followed by AMC/Mutual Fund, the risk of credit downgrade in portfolio companies due to various factors cannot be ruled out. In the event of credit downgrade the downgrade instrument generally become illiquid making it very difficult for the fund manager to dispose of such instrument/s. In such an event segregation of such an instrument from the main portfolio will prevent the distressed asset(s) damaging the returns generated from more liquid and better-performing assets of the portfolio. It also provides fair treatment to all existing, incoming and outgoing investors, as any recovery from the issuer in future would get distributed among those investors, who would have suffered a loss due to downgrade event.

C. Credit Events

Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- 1) Downgrade of a debt or money market instrument to ‘below investment grade’, or
- 2) Subsequent downgrades of the said instruments from ‘below investment grade’, or
- 3) Similar such downgrades of a loan rating.

The most conservative rating shall be considered, if there is difference in rating by multiple CRAs, Creation of segregated portfolio shall be based on issuer level credit events as detailed at “Credit Events” and implemented at the ISIN level.

Actual default (for unrated debt or money market instruments)

In case of unrated debt or money market instruments, the actual default of either the interest or principal amount by the issuer.

On occurrence of any default, the AMC shall inform AMFI immediately about the actual default by the issuer. Subsequent to dissemination of information by AMFI about actual default by the issuer, the AMC might segregate the portfolio of debt or money market instruments of the said issuer.

D. Segregate portfolio creation process

Creation of segregated portfolio shall be optional and at the discretion of the AMC/ Trustees.

- a. The AMC may decide on creation of segregated portfolio on the day of credit event/ actual default (as applicable). Segregated portfolio has to be created at the issuer level i.e. the scheme having multiple segregated portfolios will have multiple segregated portfolios. Once decided, AMC shall –
 - i. Seek Trustee prior approval,
 - ii. Issue a press release immediately mentioning its intention to segregate such debt and money market instrument and its impact to investors. It should also disclose that the segregation shall be subject to trustee approval. Additionally, the said press release to be prominently disclosed on the website of the AMC.
 - iii. The Trustee approval has to be secured in not more than one business day from the credit event/actual default date & meanwhile the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
- b. On receipt of the Trustee approval –
 - i. the segregated portfolio shall be created effective from credit event/actual default date
 - ii. AMC shall issue press release immediately mentioning all details pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - iii. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
 - iv. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event/ Actual Default.
 - v. All existing investors in the scheme as on the day of the credit event/actual default date will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - vi. No redemption or subscription will be allowed in the segregated portfolio/s. However, AMC shall enable the listing of the units of the segregated portfolio on recognized stock exchange within 10 working days from the date of its creation and shall also enable transfer of units on receipt of transfer request.
- c. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

E. Disclosure Requirements

Communication to the investors, NAV disclosure and other disclosure including scheme performance requirements for segregated portfolio shall be as per the norms specified in the above SEBI circular.

MOAMC will comply with all communication requirements /disclosure requirements prescribed by SEBI in an event of creation of segregated portfolio. This shall include disclosures of NAV, issue of account statement, press release announcing credit event and creation of segregated portfolio/s, Disclosure of segregated portfolio in (Monthly/Half Yearly) portfolio statement, etc.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

If the Trustee rejects the segregated portfolio proposal then AMC to issue press release and inform the decision of the Trustee to investors, post which subscription and redemption applications will be processed based on the NAV of total portfolio.

F. Valuation of security:

From the date of credit downgrade to non-investment grade, the Security shall be valued based on principal of fair valuation & hair cut prescribed by the AMFI till the time valuation agency(ies) start providing valuation for the security.

The valuation of the instruments/portfolio shall be done based on the quote/price obtained from the independent valuation agency(ies). In cases where quote/price is not available from an independent agency, the Valuation Committee will decide the methodology for valuation of such instruments/portfolio.

All subscription and redemption requests for which NAV of the day of credit event/ Actual Default or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

- i. Upon trustees' approval to create a segregated portfolio –
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

G. Total Expense Ratio (TER) for segregated portfolio:

AMC shall not charge investment and advisory fees on the segregated portfolio.

TER (including legal charges and excluding the investment and advisory fees) shall be charged pro-rata basis only on upon recovery of investment in the segregated portfolio. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. The maximum TER limit shall be same as applicable to the main portfolio. TER in excess of limit shall be borne by AMC. However, the costs related to segregated portfolio shall in no case be charged to the main portfolio.

The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

H. Distribution of recovery:

Any recovery of investment of the segregated portfolio/s (including recovery after write-off) shall be distributed immediately to the investors in proportion to their holdings in the segregated portfolio/s.

I. Monitoring of segregated portfolio:

Trustees shall monitor the compliance of the SEBI Circular in respect of creation of segregated portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports to be filed with SEBI.

J. Evaluation of negative impact on the performance incentives:

In order to avoid mis-use of the segregated portfolio, Trustees will put in place a mechanism to evaluate the negative impact of such segregation, on the performance incentives of the Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of MOAMC., including claw back of such amount to the segregated portfolio of the scheme.

The amount forfeited shall be credited to the segregated portfolio of the concern scheme(s) in the ratio of value of the securities downgraded in the respective schemes before the credit event.

K. Action Taken Report:

AMC shall put sincere efforts to recover the bad investment. An Action Taken Report should be prepared and placed before the Board of Trustee meeting/s till the matter is finally resolved.

B. INVESTMENT OBJECTIVE

The investment objective of the Scheme is to generate optimal returns with high liquidity to the investors through a portfolio of money market securities.

However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

C. ASSET ALLOCATION

The asset allocation pattern of the Scheme would be as follows:

Instrument	Allocations (% of total assets)	Risk Profile High/Medium/ Low
TREPs, Treasury Bills a Cash Management Bills and Commercial Deposits of Scheduled Commercial Banks having maturity upto 91 days only	0% - 100%	Low

Pursuant to SEBI circular no. SEBI/IMD/CIR No. 13/150975/09 dated January 19, 2009, the Scheme shall make investment in / purchase debt and money market securities with maturity of up to 91 days only. In case of securities with put and call options (daily or otherwise) the residual maturity shall not be greater than 91 days.

Explanation:

1. In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.
2. In case the maturity of the security falls on a non-business day then settlement of securities will take place on the next business day.

The Scheme retains the flexibility to invest across all the securities in the debt and Money Market Instruments as per investment objectives of the Scheme and as per the SEBI Regulations. The Scheme may also invest in units of debt and liquid mutual fund schemes. Money Market Instruments include T-Bills, and Government securities with an unexpired maturity upto one year, TREPS & Repo/ Reverse Repo. The scheme will not invest in Securitised debt, foreign securities, corporate repo & reverse repo and derivatives.

Change in Asset Allocation

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In case of deviation, the portfolio would be rebalanced within 30 days from the date

of deviation. In case the same is not aligned to the above asset allocation pattern within 30 days, justification shall be provided to the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action.

D. INVESTMENT BY THE SCHEME

The corpus of the Scheme will be invested in money market & debt instruments with maturity up to 91 days which will include but not limited to:

- Tri-party repo (TREPS)
- Certificate of Deposit (CD)
- Reverse Repo
- Treasury Bill (T-Bill) Securities created and issued by the Central and State Governments as may be permitted by RBI

The Scheme reserves the right to invest its entire allocation in Money market instruments having maturity upto 91 days, Commercial Deposits in any one of the fixed income security classes. Investments in rated fixed income securities will be in securities rated by at least one recognized rating agency. Investments in unrated securities will be made with the approval of the Investment Committee of MOAMC, within the parameters laid down by the Board of Directors of the AMC & the Trustees.

Short-term debt considerations for this Scheme include maintaining an adequate float to meet anticipated levels of redemptions, expenses, and other liquidity needs. The scheme intends to invest its assets in securities of Government of India and /or State Government to the extent of SEBI prescribed limits.

The above will depend upon the nature of securities invested. The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by them as per the guidelines and regulations applicable to such transactions.

The above-mentioned securities could be listed, unlisted, secured, unsecured, rated or unrated and may be acquired through initial public offerings, secondary market offerings, private placements, rights offers etc. To avoid duplication of portfolios and to reduce expenses, the Scheme may invest in any other schemes of the Fund to the extent permitted by the Regulations. In such an event, the AMC will not charge management fees on the amounts of the Schemes so invested, unless permitted by the Regulations.

Investments may be in listed or unlisted debt instruments, as permitted under SEBI Regulations. These would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, rights offers, etc., subject to SEBI Regulations.

Investments in money market securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency. The instruments may be rated / unrated and listed / unlisted. The final portfolio will depend on the availability and desirability of assets in terms of maturity profile, asset quality and yields. The portfolio formulation is a dynamic process and thus, an instrument which is attractive today may not be attractive tomorrow.

CHANGE IN THE INVESTMENT PATTERN

Subject to SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentage stated above are only indicative and not absolute. These proportions may vary substantially depending upon the perception of the AMC, the intention being all the times to seek to protect the interest of the unit holders. Such changes in the investment pattern will be for short term only.

The AMC retains the flexibility to invest across all the securities/instruments in money market. The flexibility is being retained to adjust the portfolio in response to a change in the risk-return equation for asset classes under investment, with view to maintain risk within manageable limits.

Debt and Money Markets in India

The instruments available in Indian Debt Market are classified into two categories, namely Government and Non - Government debt. The following instruments are available in these categories:

A] Government Debt	
• Central Government Debt	• State Government Loans
• Zero Coupon Bonds	State Developmental Loans
• Treasury Bills	• Coupon Bearing Bonds
• State Government Debt	• Floating Rate Bonds
• Dated Government Securities	• Coupon Bearing Bonds

These instruments comprise close to 50% of all outstanding debt and close to 75% of the daily trading volume on the Wholesale Debt Market Segment of the National Stock Exchange of India Limited.

In the money market, activity levels of the Government and Non-Government Debt vary from time to time. Instruments that comprise a major portion of money market activity include but are not limited to,

- Tri-party Repo on Government securities or treasury bills

The following table gives approximate yields prevailing on March 31, 2021 on some of the instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy.

INSTRUMENT	Current Yield (% PA)
Interbank Call Money	2.75-2.80
91 Day Treasury Bill	3.30-3.35
182 Day Treasury Bill	3.44-3.49
A1+ Commercial Paper	3.5-3.55
5 Year Government of India Security	5.7-5.75
10 Year Government of India Security	6.16-6.21
1 Year Corporate AAA	4.15-4.20

Generally, for instruments issued by a non-Government entity (corporate/PSU bonds), the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on various factors including the credit rating of the entity

E. INVESTMENT STRATEGY

The Fund Management team will endeavour to maintain a consistent performance in the scheme, giving utmost importance to safety & liquidity of the investments. The fund manager will try to achieve an optimal risk return balance for management of the portfolio. The Scheme will pay reasonable administrative and custodial fees in connection with the lending of securities. The Scheme will be exposed to the risk of loss should a borrower default on its obligation to return the borrowed securities. <p>Ongoing Offer Period This is the date from which the scheme will reopen for subscriptions/redemptions after the closure of the NFO period.</p>	<p>The Ongoing Offer for subscription and redemption commenced from December 20, 2018.</p>
<p>Ongoing price for subscription (purchase)/switch-in (from other schemes/plans of the Mutual Fund) by investors This is the price you need to pay for purchase/switch-in.</p>	<p>Ongoing price for subscription (purchase) by investors will be the applicable NAV of the plan selected. Purchase Price = Applicable NAV.</p> <p>In accordance with the requirements specified by the SEBI circular no. SEBI/IMD/CIR No.4/168230/09 dated June 30, 2009 no entry load will be charged for purchase / additional purchase/ switch-in accepted for the scheme with effect from August 01, 2009. Similarly, no entry load will be charged with respect to applications for registrations under Systematic Investment Plans. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder. Pursuant to SEBI circular No. SEBI/IMD/CIR No. 14/120784/08 dated March 18, 2008, with effect from April 1, 2008, no entry load or exit load shall be charged in respect of bonus units and of units allotted on reinvestment.</p>
<p>Ongoing price for redemption (sale) /switch outs (to other schemes/plans of the Mutual Fund) by investors This is the price you will receive for redemptions/switch outs.</p>	<p>At the applicable NAV subject to prevailing exit load, if any.</p>
<p>Methodology and illustration of sale and repurchase price of Units</p>	<p>a) Methodology of calculating sale price The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)</p> <p>Pursuant to SEBI Circular No. SEBI/IMD/DF2/OW/P/2020/11099/1 dated June 29, 2020, Gazette notification dated March 30, 2020 for extending the effective date for applicability of new stamp duty rules and as per Notification No. S.O. 4419(E) dated December 10, 2019 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, a stamp duty @ 0.005% of the transaction value would be levied on all mutual</p>

fund inflow transactions i.e. purchases (including Switch-ins), SIP / STP installments (including IDCW reinvestment) with effect from July 01, 2020. Accordingly, pursuant to levy of stamp duty, the number of units allotted to the unit holders would be lower to that extent. Kindly refer the example below for better understanding.

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/-. After deduction of stamp duty investor will receive 999.95 units

Investment amount	Rs.10,000/-	A
Less: Transaction charges (deducted and paid to distributor, if applicable)	NIL	B
Stamp duty applicable (@0.005%)	0.50	$C = (A - B) * 0.005 / 100.005$
Net Investment amount	9,999.50/-	$D = (A - B - C)$
NAV	Rs.10/-	E
Units allotted	999.95	$F = D / E$

b) Methodology of calculating repurchase price of Units

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the “Applicable NAV” to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV * (1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 * (1-0.02) = Rs. 10 * (0.98) = Rs. 9.80

F. Motilal Oswal Value Index (MOVI) Pack Plan

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal Liquid Fund* (referred to as Transferor Scheme) to Motilal Oswal Flexi Cap Fund (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

- 1) MOVI helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and IDCW Yield of the Nifty 50 Index.
- 2) A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.
- 3) NSE Indices Ltd is the calculating agent of NIFTY MOVI. NSE Indices Ltd shall calculate, compile, maintain and provide NIFTY MOVI values to MOAMC NIFTY MOVI values will be published on the MOAMC website on a daily basis.
- 4) Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.
- 5) Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.
- 6) This Plan presently offers two enrolment options:
 - a. One Time Investment
 - b. Systematic Transfer Plan (STP) with a minimum of 6 instalments.
- 7) Minimum amount under this Plan is as follows:

Options	Minimum Amount of Transfer (Rs.)
One Time Investment	Rs. 500/- and in multiples of Re. 1/- thereafter
STP	Rs. 500/- and in multiples of Re. 1/- thereafter

8) The date of allocation will be the 15th of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

Note: Under ‘One Time Investment’ enrolment option, in addition to the 15th of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

9) Under ‘STP’ enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15th of every month, then allocation for that amount will occur on 15th of the subsequent month.

10) On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.

11) The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.

12) The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.

13) Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.

14) This Plan will be automatically terminated if all units are liquidated or withdrawn or pledged or upon receipt of intimation of death of the unit holder.

15) Unit holders should note that investor details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme. Units will be allotted under the same folio number.

16) Any change in methodology of MOVI would only be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund.

17) Given the two way movement of investments between funds, liquidity at times may be restricted by trading volumes, settlement periods, and inordinately large number of redemption requests or restructuring of the Scheme. This may impact the performance of the underlying scheme.

Investors may approach/consult their tax consultants in regard to the treatment of the transfer of units from the tax point of view.

Investors are required to refer to the terms and conditions mentioned in the enrolment form.

The Trustee/AMC reserves the right to change/modify the terms and conditions of the MOVI Pack Plan or withdraw this facility.

This facility will also be available for transfer into any other equity scheme of Motilal Oswal Mutual Fund that may be launched in future.

<p>Swing Pricing</p>	<p>Swing Pricing</p> <p>Swing pricing refers to a process for adjusting a scheme's Net Asset Value (NAV) to effectively pass on transaction costs stemming from significant net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity. It is aimed at reducing the impact of large redemptions on existing investors by reducing dilution of the value of a fund's units.</p> <p>Applicable on schemes Circumstances when Swing Pricing Triggered</p> <p>In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market. Swing pricing is needed to address issues in addition to costs of bid-offer spread and transaction costs, particularly arising during market dislocation in the mutual fund industry or in the underlying bond market. Further, liquidity is concentrated in high quality paper and during market dislocation, very high risk aversion is observed and in terms of yield of bonds, spread over benchmark spike, particularly for relatively lower quality paper.</p>

Accordingly, swing pricing, an anti-dilution adjustment that seeks to protect investors in a fund from performance dilution as a result of significant outflows from the fund, particularly during market dislocation.

Mandatory Swing pricing during market dislocation

The swing pricing framework will be made applicable only for scenarios related to net outflows from the above mentioned Schemes. SEBI will determine ‘market dislocation’ either based on AMFI’s recommendation or suo-moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period. Subsequent to the announcement of market dislocation, the swing pricing framework shall be mandated only for open ended debt schemes which –

A minimum swing factor as under shall be made applicable to the schemes as mentioned in the addendum dated December 28, 2021 and the NAV will be adjusted for swing factor. This will be applicable to both purchase and redemption for the above mentioned schemes during market dislocation period announced by SEBI.

D. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Asset Value (NAV) of the units under the Scheme shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Receivables} + \text{Accrued Income} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

No. of Units outstanding under Scheme on the Valuation Day

The NAV will be calculated up to four decimals.

The NAV will be calculated on all calendar days and disclosed in the manner specified by SEBI. The computation of NAV shall be in conformity with SEBI Regulations and guidelines as prescribed from time to time.

Subsequently, the NAV shall be calculated and disclosed on each business day on AMFI's website www.amfiindia.com, by 11.00 p.m. and also on www.motilaloswalmf.com. The computation of NAV shall be in conformity with SEBI Regulations and guidelines as prescribed from time to time.

Hence, for the purposes of valuation and calculating NAV of the Scheme for a particular day, the last available prices of securities on NSE BSE shall be considered (which would be the previous day's closing prices). This will enable the disclosure of the NAV of the Scheme before the deadline as provided by SEBI guidelines.

3. Details of all enforcement actions taken by SEBI in the last three years and/ or pending with SEBI for the violation of SEBI Act, 1992 and Rules and Regulations framed there under including debarment and/ or suspension and/ or cancellation and/ or imposition of monetary penalty/adjudication/enquiry proceedings, if any, to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel (especially the fund managers) of the AMC and Trustee Company were/ are a party. The details of the violation shall also be disclosed.

A. SEBI vide Notice dated May 09, 2019, under Rule 4 (1) of SEBI (Procedure for holding Inquiry and Imposing penalties by Adjudicating Officer) rules, 2005 inquired into alleged violation of the provisions of SEBI circular no. SMD/SED/CIR/93/23321 dated November 18, 1993.

SEBI conducted Inspection of MOFSL to examine whether MOFSL has complied with requirements of SEBI circular dated November 18, 1993. Inspection team observed the MOFSL has mis-utilised the funds of client's credit balance lying with the broker for the settlement obligation of the debit balance clients. MOFSL in its reply submitted that Inspection team has not included margin requirements of clients while calculating total creditor balance and hence the same is on higher side and that there would be considerable decrease in the figures if the margin dues are deducted from creditor balance. SEBI did not accept argument of the MOFSL since the margins collected from clients are in the form of funds and/or securities. The fund portion of the margin collected from the client has already been considered while calculating client deposits with the broker.

In view of the above SEBI called upon to show cause as to why an inquiry should not be held against MOFSL in terms of Rule 4 of the Adjudication Rules read with Section 23 of the SCRA 1956 and why penalty should not be imposed on terms of the provisions of Section 23D of the SCRA 1956.

MOFSL has filed its reply dated October 03, 2019. SEBI has passed adjudication order dated 28th February, 2020 against MOFSL and imposed a monetary penalty of Rs. 17,00,000/- to be paid within 45 days of order issued. We have paid penalty to SEBI and the matter is closed.

B. SEBI has initiated Adjudication vide letter dated December 11, 2019, for transactions of a customer in the scrip of Zylog Systems Limited. MOFSL has accepted the order for trading in ZSL from person other than client without any authority i.e. the trade order was issued by Mr. P Srikanth, husband of Client, Mrs. Srikanth Sripriya instead of client herself. With regard to aforesaid, MOFSL sent the reply to SEBI on December 30, 2019 thereby denying the said allegations and to understand the reasons for issuance of said notice without any factual background. MOFSL sent reply to SEBI on May 20, 2020. Further our officials attended the

video hearing with SEBI officials on 26th May, 2020. SEBI issued an Order dated 28th May, 2020 whereby they disposed-of the SCN without any penalty or action. The matter is disposed off.

- C. SEBI has initiated adjudication notice against MOFSL vide notice no. SEBI/HO/EAD/EAD4/P/OW/2021/27159/3 dated 05th October, 2021 under rule 4(1) of SEBI (Procedure for holding inquiry and Imposing penalties) rules, 1995 in the matter of Resurgere Mines and Minerals India Limited (RMMIL) Personal Hearing scheduled by SEBI held on 4th April 2022. **Outcome awaited. Mr. Somshekar Sunderesan Represented.**
- D. SEBI has sent show cause notice vide letter no: SEBI/EAD-3/BM/LD/31186/2021 against MOFSL dated November 01, 2021 based on Rule 4(1) of SEBI (Procedure of Holding inquiry and Imposing Penalties) Rules 1995 and Rule 4 (1) of Securities Contract Regulation (Procedure of Holding inquiry and Imposing Penalties) Rules 2005 where non-compliances observed during inspection viz: Mis-utilisation of client funds, Incorrect Reporting/Short collection of Margin, Client funding beyond stipulated time, Discrepancies in CKYC process, Non maintenance of evidence of client order placement, incorrect reporting of Weekly Enhanced Supervision data, are highlighted and have asked to revert with clarifications and supporting within 21 days from date of notice. MOFSL had asked for extension to file the revert which was considered by SEBI. Later, MOFSL had filed its reply to SEBI on 28th December, 2021. Personal hearing was conducted on 14th Feb 2022. Basis direction of Adjudicating officer we have filed additional data w.r.t Margin reporting wherein funds were transferred from one segment to another. **Final outcome awaited. Mr. Somshekar Sunderesan Represented.**
