## Large Scale of Operations

Low marginal cost

## Capital Efficiency

Leverage at competitive costs

## Matured Businesses

Stability and visibility

## Big Balance Sheets

Benefit of capital investments

## Ability to withstand downturns

Absolute returns

Falling market periods

Past performance may or may not be sustained in future.

Source: MFI Explorer. Large Caps are represented by S&P BSE Sensex. Mid Caps by S&P BSE Midcap. Small Caps by S&P BSE Smallcap.

The above illustration is to explain the performance of various categories during the periods where markets have shown downward bend. Further since the above returns are calculated for a specific period, which may or may not be greater than 1 year, the returns are shown in absolute terms.

At Motilal Oswal Asset Management Company (MOAMC), our investment philosophy is centered on '**Buy Right: Sit Tight**' principle.

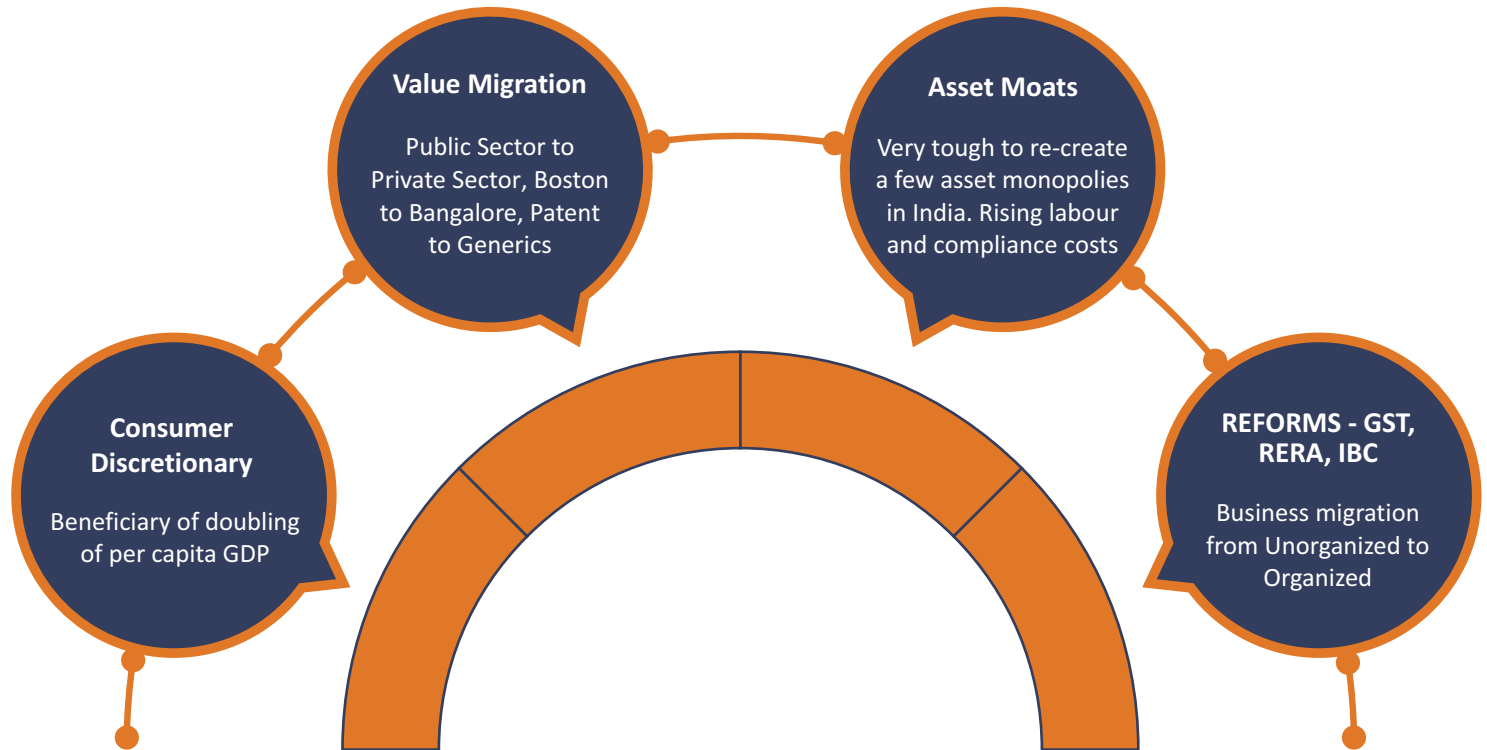

### Buy Right

#### QGLP

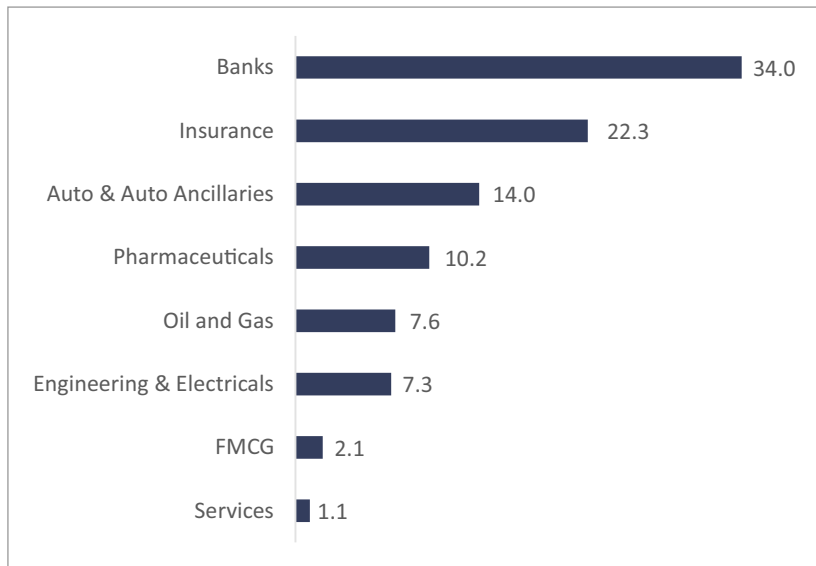

- ☞ **'Q'uality** denotes quality of the business and management
- ☞ **'G'rowth** denotes growth in earnings and sustained RoE
- ☞ **'L'ongevity** denotes longevity of the competitive advantage or economic moat of the business
- ☞ **'P'rice** denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

### Sit Tight

- ☞ **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- ☞ **Focus:** Our portfolios are high conviction portfolios with 25 to 30 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk

## Sectoral Allocation

**Please Note:** Data as on 31st December 2019. The stocks mentioned are a part of existing Value Strategy clients and may or may not be bought for new clients. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. The strategy may or may not have any future holdings in these stocks and should not be construed as recommendations from MOAMC.

## Top 10 Holdings

Script Name	% Holding

Name of the PMS Strategy does not in any manner indicate its future prospects and returns.

- ☞ The data shows rolling returns of the Value Strategy over various time frames.
- ☞ It is worth noting that on 1 year rolling basis, the returns are in a very wide range. The best return made by the Strategy is 175% and the worst return is -48%.
- ☞ As we increase the time horizon, the outcomes narrow significantly from the average.
- ☞ For instance, if we consider the 5 year time frame, historically the best return (CAGR) is 52%, least return is 4.3% and average return is 17%.
- ☞ It may also be noteworthy that the negative returns above 3 years rolling periods are zero.

Please Note: The Above strategy returns are of a Model Client as on 31st December 2019. Returns of individual clients may differ depending on time of entry in the strategy. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Strategy returns shown above are post fees & expenses. Returns above 1 year are annualized. Motilal Oswal AMC does not provide any guarantee/ assurance any minimum or maximum returns.
