I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital market.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 100,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Equities**

- a. Investments in the equity shares of the Companies constituting the Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- b. The Scheme would invest in the securities comprising the Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Index. As such the Scheme is not actively managed but is passively managed.
- c. As the units of the Scheme are listed on the NSE and BSE, trading in the units of the Scheme may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or SEBI. There could also be trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI circuit filter rules and the Scheme would not be able to buy/sell securities in case of subscriptions/redemptions, which may impact the Scheme. Further, there can be no assurance that the requirements of the exchange necessary to maintain the listing of the Scheme will continue to be met or will remain unchanged.
- d. Listing and trading of the units are undertaken on the Stock Exchanges within the rules, regulation and policy of the Stock Exchange and SEBI. Any change in trading rules, regulation and policy by the regulatory authority would have a bearing on the trading of the units of the Scheme and its prices.
- e. Though the Scheme is listed on the NSE and BSE, there is no assurance that an active secondary market will develop or be maintained. Hence, there would be times when trading in the units of the Scheme would be infrequent.
- f. The NAV of the Scheme reflect the valuation of its investment and any changes in market value of its investments would have a bearing on its NAV. When the units are traded on the Stock Exchange, the units of the Scheme may trade at prices which can be different from the NAV due to various factors like demand and supply for the units of the Scheme, perceived trends in the market outlook, etc.
- g. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the Scheme portfolio.
- h. Investors should note that even though the Scheme is an open ended Scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in specific lot sizes. Generally, these lot sizes are larger as compared to normal funds. Even though this Scheme is open ended due to large lot size, very few investors can directly subscribe and redeem the units of the Scheme with the Fund. However, investors wishing to subscribe/redeem units in other than specific lot sizes can do so by buying/selling the same on the Stock Exchange unless no quotes are available on the exchange for 3 trading days consecutively.

- i. Tracking error may arise due to various reasons like fees and expenses charged to the Scheme, dividend received, corporate actions, change in the Index, etc. Tracking error have an impact on the performance of the Scheme. The Scheme's returns may therefore deviate from those of its Index. However, the Fund would endeavor to keep the tracking error as low as possible.
- **Risk associated with investing in Foreign Securities**
 - a. The Scheme will invest in foreign securities. Such overseas investments will be made subject to any / all approvals, conditions thereof as may be stipulated by SEBI / RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceiling of expenses.
 - b. As per the SEBI (MF) Regulation, the Fund is permitted to invest USD 300 million. However, the overall limit for the Mutual Fund Industry is USD 7 billion. The Scheme therefore may or may not be able to utilise the limit of USD 300 million due to the USD 7 billion limit being exhausted by other Mutual Funds. Further, the overall ceiling for investment in overseas Exchange Traded Funds (ETFs) that invests in securities is USD 1 billion subject to a maximum of USD 50 million per mutual fund. As and when the investment limits are breached, the subscriptions into the Scheme shall be suspended till further notice by the AMC.
 - c. As the Scheme will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the Fund. Thus, returns to investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.
 - d. The risk of investing in foreign securities carries an exchange rate risks related to depreciation of foreign currency and country risks. The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bilateral political tensions leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.
 - e. The Scheme shall invest in securities listed on the overseas stock exchange. Hence all the risk factors pertaining to overseas stock exchange like market trading risk, liquidity risk and volatility risk, as mentioned earlier, are also applicable to the Scheme. The Scheme will also be exposed to settlement risk, as different countries have different settlement periods.
 - f. Some countries prohibit or impose substantial restrictions on investments by foreign entities. Certain countries may restrict investment opportunities in issuers or industries or securities deemed important to national interests. The manner, in which foreign investors may invest in companies/securities in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of the Scheme. Certain risk arises from the inability of a country to meet its financial obligations. It is the risk encompassing economic, social and

political conditions in a foreign country which might adversely affect the interests of the Scheme.

- g. The Scheme may invest in the units of overseas mutual fund schemes including exchange traded funds. Hence scheme specific risk factors of such underlying schemes will be applicable. All risks associated with such schemes, including performance of their underlying stocks, derivative instruments, stock-lending, off-shore investments, liquidity, etc., will therefore be applicable in this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying schemes.

- **Risks associated with Investing in Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risks associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

An investor / Unit holder will therefore be required to furnish such information to the AMC/ Fund to comply with the reporting requirements stated in the FATCA provisions and circulars issued by SEBI / AMFI / Income tax Authorities / such other Regulator in this regard.

India has joined the Multilateral Competent Authority Agreement on Automatic Exchange of Information (AEOI) for Common Reporting Standard (CRS). The CRS on AEOI requires the financial institution of the “source” jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries, such information having to be transmitted “automatically” annually. II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open ended Index Exchange Traded Fund.

B. INVESTMENT OBJECTIVE

The Scheme seeks investment return that corresponds (before fees and expenses) generally to the performance of the NASDAQ-100 Index subject to tracking error.

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

C. ASSET ALLOCATION

Under normal circumstances, the asset allocation pattern of the Scheme is as follows:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Securities constituting NASDAQ-100 Index	95	100	Medium to High
Overseas Debt and Money market instruments and cash at call, mutual fund schemes or exchange traded funds based on NASDAQ-100 Index	0	5	Low to Medium

The above stated percentages are indicative and not absolute.

The Scheme may take an exposure to derivatives of the Underlying Index or constituents of the Underlying Index for short duration when the securities of the Underlying Index are unavailable, insufficient or for rebalancing at the time of change in Underlying Index or in case of corporate actions. The total exposure to derivatives would be restricted to 10% of the net assets of the Scheme. The aggregate asset allocation including exposure to derivatives will not exceed 100% of net assets of the Scheme. The margin paid for derivative instruments will form part of Debt and Money market Instruments. All overseas investments mentioned above would comply with the provisions of SEBI Circular dated September 26, 2007 and such circulars issued from time to time.

D. INVESTMENT BY THE SCHEME

Investment in Equity and equity related Instruments

The Scheme will invest in the securities which are constituents of NASDAQ-100 Index. The securities are traded on The NASDAQ Stock Market. As per SEBI Circular No. SEBI/IMD/ CIR No.7/104753/07 dated September 26, 2007, the limits for overseas investment is subject to a maximum of USD 300 million per mutual fund. As and when this limit is revised or modified, the Fund shall adopt such new limits. The investment restrictions and the limits as per SEBI (Mutual Funds) Regulations, 1996 are mentioned under the section 'Investment Restrictions'. The investment in NASDAQ-100 constituents would be in USD equivalent to the amount received in INR by the Scheme.

Investment in Debt and Money market instruments

The Scheme may also invest in overseas debt and money market instruments. As per SEBI Circular No. SEBI/IMD/ CIR No.7/104753/07 dated September 26, 2007, the limits for overseas investment is subject to a maximum of US\$ 300 million per mutual fund. As and when this limit is revised or modified, the Fund shall adopt such new limits. The investment restrictions and the limits are

specified in the Schedule VII of SEBI (Mutual Funds) Regulations, 1996 which are mentioned in the section 'Investment Restrictions'.

Investment in units of overseas mutual fund schemes

The Scheme may invest in units of mutual fund schemes including Exchange Traded Funds which are based on NASDAQ-100 Index and shall comply with the provisions of SEBI circular dated September 26, 2007 and such circulars issued from time to time. As per SEBI Circular no. SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, the limits for overseas investment is subject to a maximum of USD 300 million per mutual fund and the limits for investments in overseas Exchange Traded Funds that invest in securities is subject to a maximum of USD 50 million per mutual fund. As and when this limit is revised or modified, the Fund shall adopt such new limits.

As mentioned under SEBI Regulations, the restriction on the investments in mutual fund units upto 5% of net assets and prohibiting charging of fees on the same, shall not be applicable to investments in mutual funds units in foreign countries. However, the management fees and other expenses charged by the mutual fund in foreign countries along with the management fee and recurring expenses charged to the domestic mutual fund scheme shall not exceed the total limits on expenses as prescribed under Regulation 52(6). Where the scheme is investing only a part of the net assets in the foreign mutual funds, the same principle shall be applicable for that part of investment.

Investment in Derivatives Instrument

The Scheme may take an exposure to derivatives of the Underlying Index or constituents of the Underlying Index for short duration when the securities of the Underlying Index are unavailable, insufficient or for rebalancing at the time of change in Underlying Index or in case of corporate actions. The total exposure to derivatives would be restricted to 10% of the net assets of the Scheme. The aggregate asset allocation including exposure to derivatives will not exceed 100% of net assets of the Scheme.

The Scheme may use derivative instruments such as index futures and options, stock futures and options contracts, warrants, convertible securities, swap agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the scheme's investment objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Underlying Index and will be easy to settle compared to physical portfolio of shares representing the Underlying Index.

In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. This settlement risk is likely to be minimized if the exchange acts as the clearing corporation and the counter party, as is the practice in the developed markets. The Scheme will not maintain any leveraged or trading positions.

Limit for investment in derivatives instruments

In accordance with SEBI circulars nos. DNP/Cir-29/2005 dated September 14, 2005, DNP/Cir-30/2006 dated January 20, 2006 and SEBI/DNP/Cir-31/2006 dated September 22, 2006, the following conditions shall apply to the Scheme's participation in the derivatives market. The

As and when SEBI amends the limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

E. INVESTMENT STRATEGY

The Scheme employs an investment approach designed to track the performance of NASDAQ-100 Index. The Scheme seeks to achieve this goal by investing in securities constituting NASDAQ-100 Index in same proportion as in the index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in overseas debt and money market instruments to meet the liquidity and expense requirements. The Scheme may also take exposure in derivative instruments in order to minimize the tracking error.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. Further, AMC has implemented Bloomberg Portfolio Order Management System as the Front Office System for managing risk. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner. The AMC will appoint at least two Authorised Participant's who would endeavour to provide liquidity of the units of the Scheme on the exchange at all times.

Portfolio Turnover

Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. Generally, Portfolio Turnover would depend upon the rebalancing of the portfolio due to change in composition of the Index or due to corporate actions of the securities constituting the Index.

Investment by AMC in the Scheme

The AMC may invest in the Scheme during the New Fund Offer or on an ongoing basis in accordance with the SEBI (MF) Regulations. The AMC shall not charge investment management fees on investment by the AMC in the Scheme.

The AMC will also invest a portion of its assets into the Scheme as seed capital to the extent mandated by the SEBI Regulations and such seed capital will not be redeemed or withdrawn by the AMC until the winding up of the Scheme.

Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

The Scheme may lend securities from its portfolio in accordance with the Regulations and the applicable SEBI guidelines. Securities' lending shall enable the Scheme to earn income that may partially offset its expenses and thereby reduce the effect these expenses have on the Scheme's ability to provide investment returns that correspond generally to the performance of its Index. The Scheme will pay reasonable administrative and custodial fees in connection with the lending of securities. The Scheme will be exposed to the risk of loss should a borrower default on its obligation to return the borrowed securities. The Scheme share of income from the lending collateral will be included in the Scheme's gross income. The Fund will comply with the conditions for securities lending specified by SEBI Regulations and circulars issued from time to time.

The maximum exposure of each Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or upto such limits as may be specified by SEBI. Each Scheme will not lend more than 75% of its corpus.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Index in the same proportion of weightage as the securities have in the Index. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, corporate actions pertaining to the securities constituting Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Index, etc. The Scheme's returns may therefore deviate from those of its Index. Tracking Error may arise due to the following reasons: -

1. Fees and expenses of the Scheme.
2. Cash balance held by the Scheme due to dividend received, subscriptions, redemption, etc.
3. Halt in trading on the stock exchange due to circuit filter rules.
4. Corporate actions.
5. The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities shares.
6. Dividend payout.
7. Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may effect the NAV of the Scheme.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. During the first 12 months of the existence of the Fund, such tracking error is not expected to exceed 2%. Under normal market circumstances, such tracking error is not expected to exceed 2% p.a. However, in case of events like market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket or in abnormal market circumstances, the tracking error may exceed the above limits. For the purpose of calculating this tracking error, the Underlying Index will be converted into Indian Rupees using RBI reference rate for the day. The tracking error would be disclosed in the monthly fact sheet of the Scheme.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

D. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Asset Value (NAV) of the units under the Scheme shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Receivables} + \text{Accrued Income} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

The NAV will be calculated up to four decimals.

The NAV shall be calculated and announced on each working day. The computation of NAV shall be in conformity with SEBI Regulations and guidelines as prescribed from time to time.

Due to difference in time zones of different markets, in case the closing prices of securities are not available within a given time frame to enable the AMC to upload the NAV for a Valuation Day, the AMC may use the last available traded price for the purpose of valuation. The use of the closing price / last available traded price for the purpose of valuation will also be based on the practice followed in a particular market. In case any particular security is not traded on the Valuation Day, the same shall be valued on a fair value basis by the valuation committee of the AMC.

Hence, for the purposes of valuation and calculating NAV of the Scheme for a particular day, the last available prices of securities on NASDAQ shall be considered (which would be the previous day's closing prices). This will enable the disclosure of the NAV of the Scheme before the deadline as provided by SEBI guidelines.

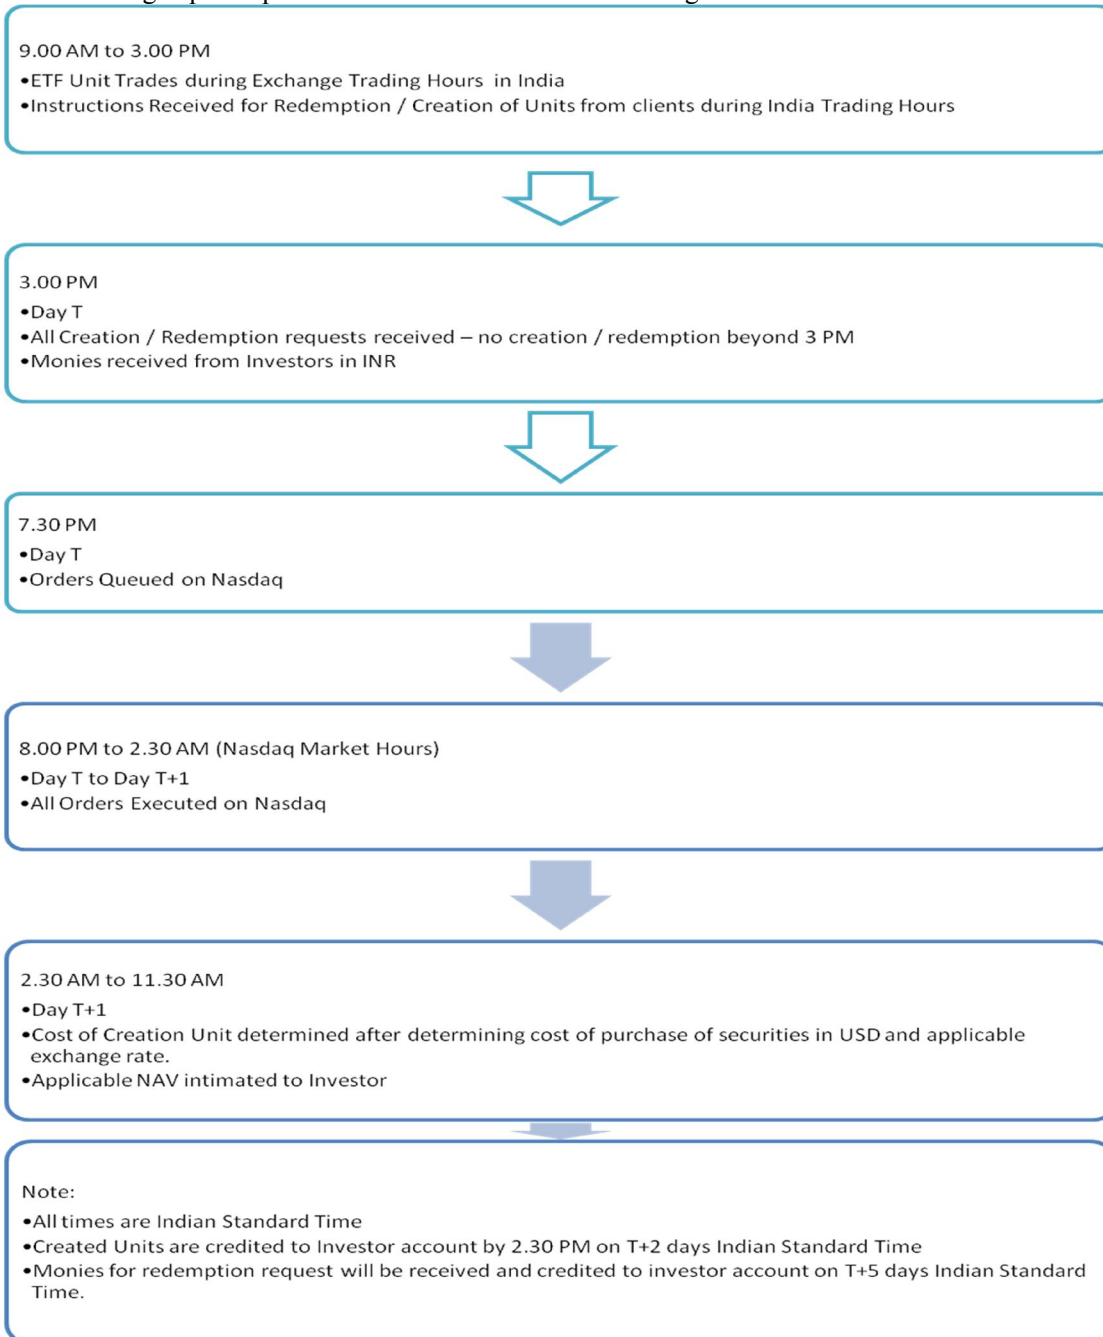

The example for consideration of prices of securities for calculating NAV of the Scheme is as follows:

For calculation and disclosure of NAV as on February 28, 2011, prices of securities at the close of trading on NASDAQ Stock Market on February 27, 2011 would be considered.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate made available by Reserve Bank of India failing which exchange rates made available by Bloomberg / Reuters or any other standard reference rate at the close of banking hours in India. The Trustees reserve the right to change the source for determining the exchange rate.

Also refer SAI for valuation of overseas investments.

The following explains process flow and time frames including NAV calculation
