Why invest in an Index Fund?

- Index Funds are an easy and convenient way to invest in an index (such as the Sensex and the Nifty).
- **Eliminates fund manager risk** and therefore the risk of underperforming the benchmark
- **Diversification** – Generally tracks broad based indices thus reducing the impact of decline in value of any one stock or industry, sector
- **Low Costs** – Since index funds are passively managed, cost are kept relatively low
- **Long-term** – Fund managers change and funds close down frequently. An investor who is looking to invest for over 10 years+ is better suited for index funds
