INVESTMENT STRATEGY

MOFLF

The Fund Management team will endeavour to maintain a consistent performance in the scheme, giving utmost importance to safety & liquidity of the investments. The fund manager will try to achieve an optimal risk return balance for management of the portfolio. The investments in money market instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, efforts will be made to minimize the volatility by diversification and effective use of hedging techniques. The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

MOFN100FOF

The Scheme follows a passive investment strategy and will predominantly invest in Motilal Oswal Nasdaq 100 ETF. The AMC/ Underlying Scheme does not make any judgments about the investment merit of NASDAQ-100 Index nor will it attempt to apply any economic, financial or market analysis. The Scheme shall invest all of its funds in units of Motilal Oswal Nasdaq 100, except to meet its liquidity requirements. The scheme would also invest in units of Liquid/ debt schemes, debt and money market instruments as stated in the asset allocation table.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Scheme and the NAV of the Scheme. The fund assets will be predominantly invested in the Underlying Scheme and which is valued at the market price of the said units on the principal exchange. The same may be at a variance to the underlying NAV of the Scheme.

Theoretically, the corpus of the Scheme has to be fully invested in the Underlying Scheme completely. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. Tracking Error may arise due to the following reasons:-

1. Fees and expenses of the Scheme.
2. Halt in trading on the Stock exchange due to circuit filter rules
3. Cash balance held by the Scheme due to subscriptions, redemption, etc.
4. Delay in receipt of cash flows
5. Non- availability of units of Underlying Scheme or the Underlying Scheme is temporary closed for subscription
6. Lack of liquidity on Stock Exchange
7. The Scheme has to invest in the Underlying Scheme in whole numbers and has to round off the quantity of units.

MOFEH

The investment objective is to generate equity linked returns by investing in a combined portfolio of equity and equity related instruments including derivatives, Debt instruments, money market instruments, REITs and InvITs.

Equity Investment: The Fund shall follow an active investment style using bottom-up stock picking. The Fund managers shall identify and invest in shares of businesses run by high quality management & having sustainable and scalable business models. They shall invest in shares of high quality businesses having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The Fund Portfolio shall comprise of high conviction stock ideas from across market-capitalization levels/sectors. The portfolio stocks may be potentially concentrated in a few market capitalization levels/sectors which are expected to do well and have lower downside risk

Debt and Money Market: The Fund shall invest in Debt Instruments including Government Securities, Corporate Debt, Other debt instruments and Money Market Instruments with average maturity less than equal to 12 months to protect the portfolio downside during market downturn.

Investments in Derivative Instruments

The Scheme may invest in various derivative instruments which are permissible under the applicable Regulations and shall also be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index).

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities, and equities.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on stock exchanges whereas OTC derivative transactions are generally structured between two counterparties.

The risks associated with derivatives are similar to those associated with equity investments. The additional risks could be on account of

- Illiquidity
- Potential mis - pricing of the Futures/Options

- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates)
- Cost of hedge can be higher than adverse impact of market movements
- An exposure to derivatives in excess of the hedging requirements can lead to losses
- An exposure to derivatives can also limit the profits from a genuine investment transaction

Exchange traded derivative contracts in stocks and indices in India are currently cash settled at the time of maturity.

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives.

MOFDYNAMIC

In the Scheme, the core long only equity exposure shall be a minimum of 30% of the portfolio value. Long only equity exposure means exposure to equity shares alone without a corresponding equity derivative exposure.

The Fund will use Motilal Oswal Value Index (MOVI) as an indicator for the asset allocation between Equities, Arbitrage, Derivatives strategies and Debt. The asset allocation shall be reviewed twice a month and the rebalancing will be conducted on 15th of every month and a day prior to derivative expiry day on the Exchange (if the above days are a non-business day, the previous business day shall be considered for rebalancing). However, there may be additional rebalances at the discretion of the Fund manager. However the rebalancing will always be based on the MOVI levels.

The MOVI helps gauge attractiveness of the equity market. The MOVI is calculated taking into account Price to Earnings (P/E), Price to Book (P/B) and Dividend Yield of the Nifty 50 Index. The MOVI is calculated on 30 Daily Moving Average of the above parameters. A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

The equity allocation based on the MOVI levels is as below:

MOVI Levels		Equity Exposure
Less than 70		100%
70	<80	90%
80	<90	80%
90	<100	70%
100	<110	55%
110	<120	40%
120	<130	25%
130 or above		0%

India Index Services & Products Ltd. (IISL) is the calculating agent of NIFTY MOVI. IISL shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.

Any change in methodology of MOVI would be construed as change in Investment Strategy and will be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund. Hence, it will be construed as a change in fundamental attribute and accordingly, the relevant regulatory provisions will be

applicable.

Equity Investment: The Fund shall follow an active investment style using bottom-up stock picking based on the ‘Buy Right : Sit Tight’ investment philosophy. The Fund managers shall identify and invest in shares of businesses run by high quality management & having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The Fund Portfolio shall comprise of high conviction stock ideas from across market-capitalization levels/sectors. The portfolio stocks may be potentially concentrated in a few market capitalization levels/sectors which are expected to do well and have lower downside risk.

Debt: The Fund shall invest in various types of permitted Debt Instruments including Government Securities, Corporate Debt, Other debt instruments and Money Market Instruments of various maturities and ratings with the objective of providing liquidity and achieving optimal returns.

Arbitrage and Derivative Strategies: The Fund shall undertake Cash/Futures Arbitrage to take advantage of the volatile situation in the market. The Fund may use Derivative including Index Futures, Stock Futures, Index Options and Stock Options etc.

Following depicts more clarity on MOVI based Scheme allocation.

MOVI Levels		Equity Exposure as per MOVI	Net Equity (%)	Equity Arbitrage (%)	Debt Instruments (%)
Less than 70		100	100	0	0
70	<80	90	90 – 95	0	Upto 10
80	<90	80	80 – 85	0	Upto 20
90	<100	70	70 – 75	0	Upto 30
100	<110	55	55 – 60	5-35	Upto 35
110	<120	40	40 – 45	20-35	Upto 35
120	<130	25	30 – 40	25-35	Upto 35
130 or above		0	30 – 40	25-35	Upto 35

Scenario 1 - Let’s assume the MOVI level is at 60 which means it falls in the range of 100% equity allocation. Therefore, the fund manager in the above case will take upto 100% long only equity exposure.

Scenario 2 - Let’s assume the MOVI level is at 100 which means it falls in the range of 55% equity allocation. Therefore, the fund manager in the above case will take 55% to 60% long only equity exposure and minimum 5% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 3 - Let’s assume the MOVI level is at 120 which means it falls in the range of 25% equity allocation. Therefore, the fund manager in the above case will take 30% to 40% long only equity exposure and minimum 25% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 4 - Let's assume the MOVI level is at 150 which means it falls in the range of 0% equity allocation. Therefore, the fund manager in the above case will take 30% to 40% long only equity exposure and minimum 25% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

In the periods where the MOVI levels indicates a 100% equity allocation, the exposure of the scheme in equity and equity related instruments will increase upto 100%. However, if the MOVI levels reflect high valuation, the Scheme will restrict its investment in equity to 30% - 40% and shall take arbitrage positions to the extent of 25% - 35% of the portfolio, therefore resulting into an equity category exposure of 65%. In such a scenario the balance will be invested into debt market instruments.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration. The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

MOFLTE

The Scheme will invest in securities across asset classes (debt and equity) and across sectors and capitalization levels. Emphasis will be placed on identifying high quality/high & sustainable growth companies for investment.

The fund shall follow an active investment style using bottom-up stock picking. The fund managers shall identify and invest in shares of high quality businesses having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The fund shall be benchmark agnostic with a portfolio of high conviction stock ideas from across market-capitalization levels/ sectors. The portfolio stocks could be potentially concentrated in a few market capitalization levels/sectors which have very low downside risk.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

MOF35

The Scheme will invest in attractive securities across asset classes (debt and equity) and across sectors and capitalization levels. Emphasis will be placed on identifying high quality/high & sustainable growth companies for investment.

The fund shall follow an active investment style using bottom-up stock picking. The fund managers shall identify and invest in shares of high quality businesses having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The fund shall be benchmark agnostic with a portfolio of high conviction stock ideas from across market-capitalization levels/ sectors. The portfolio stocks could be potentially concentrated in a few market capitalization levels/ sectors which have very low downside risk.

The fund can invest in compelling opportunities in foreign listed securities (including ETFs and other overseas funds)

The fund may also selectively invest in strong business franchises in the unlisted space, with a scalable business model and available at attractive valuations.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

MOF30

The primary investment objective of the Scheme is to generate returns by investing in a portfolio of midcap equity and equity related instruments, money market instruments, cash and cash equivalents. The Fund may also enter into securities lending or such other transactions, in accordance with the Regulations, as may be allowed to Mutual Funds from time to time.

The portfolio will essentially follow MOAMC's QGLP philosophy – i.e. invest in Quality businesses with reasonable Growth potential and with sufficient Longevity of that growth potential at a fair Price. The scheme shall follow an active investment style and will seek to invest in midcap companies with a strong competitive position or economic moat, good business prospects, run by a competent management that will help them achieve good growth over the medium to long term and available at reasonable valuations. The fund shall practice a concentrated, high-conviction portfolio strategy with a low-churn, buy and hold approach to investing. It will typically select companies with full market capitalization within the range from 101st to 250th on recognized stock exchange.

The long-term India growth story provides an excellent platform for small and mid-size businesses to unleash their growth potential and to emerge as large cap companies of the future. India has a plethora of mid-size listed companies and their number has only risen in recent years. We believe the midcap universe in India even today presents similar such investment opportunities from a medium to long term perspective. Besides, midcaps are typically found to be under-owned and under-researched and hence provide a large universe of exciting investment prospects.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

MOF25

The primary investment objective of the Scheme is to generate returns by investing in a portfolio of primarily in equity and equity related instruments including derivatives, Debt instruments, money market instruments, REITs and InvITs. The Fund may also enter into "Stock Lending" or such other

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

MOFUSTF

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios. The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques. The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets. Investment in debt instruments carries various risks like Interest Rate Risk, Liquidity Risk, Credit Risk, etc. While they cannot be eliminated, they can be reduced by diversification and effective use of hedging techniques.

Investment views/decisions will be taken on the basis of following parameters:

1. Liquidity of the security.
2. Maturity profile of the instruments.
3. Quality of the Security/instrument (including the financial health of the issuer).
4. Returns offered relative to alternative investment opportunities.
5. Prevailing interest rate scenario.
6. Any other factors considered relevant in the opinion of the AMC.

RISK PROFILE OF THE SCHEME

Mutual Fund units involve risks including the possible loss of principal. Please read Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme Specific Risk factors are summarized below:

Risk factors for the Schemes, MOFLF, MOFN100FOF, MOFEH, MOFDYNAMIC, MOFLTE*, MOF35, MOF30 and MOF25

- **Risks associated with investing in Funds of Fund Scheme**
 - a. Investors may please note that they will be bearing the expenses of the fund of fund scheme in addition to the expenses of the underlying scheme in which the fund of fund scheme makes investment.
 - b. The Scheme may invest predominantly in MOFN100. Hence the Scheme's performance may depend upon the performance of the underlying mutual fund scheme. Any change in the

- investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme.
- c. The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying scheme where the Scheme has invested and will not include the investments made by the underlying Scheme.
 - d. The fund assets are predominantly invested in MOFN100 and valued at the market price of the said units on the exchange. The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme.
 - e. The Fund will subscribe according to the value equivalent to unit creation size as applicable for each of the underlying scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in debt and money market instruments. The Scheme may also invest in such instruments to meet the liquidity requirements. As a result the returns of the Scheme may differ from the underlying ETF(s).
 - f. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant.
 - g. The NAV of the scheme to the extent invested in Money market securities are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme's holdings and thus the value of the Scheme's Units.
 - h. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- **Risk associated with investing in Motilal Oswal Nasdaq 100 ETF (MOFN100)**
 - a. Investments in the equity shares of the Companies constituting the Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
 - b. The Scheme would invest in the securities comprising the Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the Scheme. The Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Index. As such the Scheme is not actively managed but is passively managed.
 - c. As the units of the Scheme are listed on the Stock Exchange, trading in the units of the Scheme may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or SEBI. There could also be trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI circuit filter rules and the Scheme would not be able to buy/sell securities in case of subscriptions/redemptions, which may impact the Scheme. Further, there can be no assurance that the requirements of the exchange necessary to maintain the listing of the Scheme will continue to be met or will remain unchanged.
 - d. Listing and trading of the units are undertaken on the Stock Exchanges within the rules, regulation and policy of the Stock Exchange and SEBI. Any change in trading rules,

regulation and policy by the regulatory authority would have a bearing on the trading of the units of the Scheme and its prices.

- e. Though the Scheme is listed on the NSE and BSE, there is no assurance that an active secondary market will develop or be maintained. Hence, there would be times when trading in the units of the Scheme would be infrequent.
- f. The NAV of the Scheme reflect the valuation of its investment and any changes in market value of its investments would have a bearing on its NAV. When the units are traded on the Stock Exchange, the units of the Scheme may trade at prices which can be different from the NAV due to various factors like demand and supply for the units of the Scheme, perceived trends in the market outlook, etc.
- g. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the Scheme portfolio.
- h. Investors should note that even though the Scheme is an open ended Scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in specific lot sizes. Generally, these lot sizes are larger as compared to normal funds. Even though this Scheme is open ended due to large lot size, very few investors can directly subscribe and redeem the units of the Scheme with the Fund. However, investors wishing to subscribe/redeem units in other than specific lot sizes can do so by buying/selling the same on the Stock Exchange unless no quotes are available on the exchange for 3 trading days consecutively.
- i. Tracking error may arise due to various reasons that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. However, the Fund would endeavor to keep the tracking error as low as possible.
- j. The Scheme will invest in foreign securities. Such overseas investments will be made subject to any / all approvals, conditions thereof as may be stipulated by SEBI / RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceiling of expenses.
- k. As per the SEBI (MF) Regulation, the Fund is permitted to invest USD 300 million. However, the overall limit for the Mutual Fund Industry is USD 7 billion. The Scheme therefore may or may not be able to utilise the limit of USD 300 million due to the USD 7 billion limit being exhausted by other Mutual Funds. Further, the overall ceiling for investment in overseas Exchange Traded Funds (ETFs) that invests in securities is USD 1 billion subject to a maximum of USD 50 million per mutual fund. As and when the investment limits are breached, the subscriptions into the Scheme shall be suspended till further notice by the AMC.
- l. As the Scheme will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the Fund. Thus, returns to investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee.

Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.

- m. The risk of investing in foreign securities carries an exchange rate risks related to depreciation of foreign currency and country risks. The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bilateral political tensions leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise. Some countries prohibit or impose substantial restrictions on investments by foreign entities. Certain countries may restrict investment opportunities in issuers or industries or securities deemed important to national interests. The manner, in which foreign investors may invest in companies/securities in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of the Scheme. Certain risk arises from the inability of a country to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country which might adversely affect the interests of the Scheme.

- **Risks associated with investing in Equities**

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, should there be a subsequently decline in the value of the securities held in the Schemes portfolio. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments. This may impact the ability of the unit holders to redeem their units. In view of this, the Trustee has the right, in its sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.

The Scheme may find itself invested in unlisted securities either by choice or due to external events or corporate actions. This may increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.

- **Regulatory Risk**

Any changes in trading regulations by NSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

- **Asset Class Risk**
 The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.
- **Interest Rate Risk**
 Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.
- **Credit Risk**
 Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.
- **Liquidity or Marketability Risk**
 This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.
- **Right to Limit Redemptions**
 The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. This could also happen in the event of receipt of inordinately large number of redemption requests or a restructuring of a Scheme portfolio.
- **Risks associated with Investing in Derivatives**
 Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager

involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risk associated with securities lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes securities lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

- **Trading through mutual fund trading platforms of BSE and/ or NSE**

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

- **Selection Risk** (Applicable to the Scheme, MOFEH)

The risk that a security chosen will underperform the market for reasons that cannot be anticipated.

- **Concentration risk** (Applicable to the Scheme, MOFEH)

This is the risk arising from over exposure to few securities/issuers/sectors.

- **Reinvestment risk** (Applicable to the Scheme, MOFEH)

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. Investments in fixed income securities may carry re-investment risk as

interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.

- **Risks associated with investing in TREPs Segments (Applicable to the Scheme, MOFEH)**
The mutual fund is a member of securities and TREPs segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPs segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.
- **Risk associated with MOVI (Applicable to the scheme, MOFDYNAMIC)**
The Scheme shall invest a portion of its assets into equity and debt securities based on Motilal Oswal Value Index (MOVI) levels. Hence, the risk associated with the calculation of MOVI and allocations based on MOVI would be applicable to the Scheme. The allocations as per MOVI shall vary due to market conditions. These allocations based on MOVI level may not outperform a fully invested equity portfolio.
- **Risk associated with Investment in foreign securities/overseas investments (Applicable to the Scheme, MOF35)**
The Scheme may invest in foreign securities. Such overseas investments will be made subject to necessary approvals, conditions thereof as may be stipulated from time to time. The investment in foreign securities carries an exchange rate risks related to depreciation of foreign currency and country risks. The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bilateral political tensions leading to immobilisation of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise.

As the Scheme shall invest in securities listed on the overseas stock exchange, all the risk factors pertaining to overseas stock exchange like market trading risk, liquidity risk and volatility risk, as mentioned earlier, are also applicable to the Scheme. The Scheme will also be exposed to settlement risk, as different countries have different settlement periods.

* As per the provision of lock-in under the ELSS Guidelines, the ability of Unitholders to realize returns in the Scheme is restricted for the first three years from the date of their allotment.

Risk factors for the Scheme, MOFUSTF

- **Market Risk**
The Scheme's NAV will react to the interest rate movements. The Investor may lose money over short or long period due to fluctuation in Scheme's NAV in response to factors such as economic and political developments, changes in interest rates, inflation and other monetary factors and also movement in prices of underlining investments.

- **Regulatory Risk**
Any changes in trading regulations by NSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- **Right to Limit Redemptions**
The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.
- **Asset Class Risk**
The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.
- **Interest Rate Risk**
Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by modified duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Modified Duration is a measure of price sensitivity, the change in the value of investment to a 1% change in the yield of the investment.

- **Credit Risk**
Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.
- **Liquidity or Marketability Risk**
This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

- **Risks associated with short selling**

Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity, price movement & volatility of the security by the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

Risk Factors Associated with Investments in REITs and InvITs (Applicable to the scheme, MOF25, MOF30, MOFUSTF, MOFEH and MOFDYNAMIC):

- **Risk of lower than expected distributions**

The distributions by the REIT or InvITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:

- Success and economic viability of tenants and off-takers
- Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
- Debt service requirements and other liabilities of the portfolio assets
- Fluctuations in the working capital needs of the portfolio assets
- Ability of portfolio assets to borrow funds and access capital markets
- Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- Amount and timing of capital expenditures on portfolio assets
- Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/ InvITs such as fire, natural disasters, accidents, etc.
- Taxation and regulatory factors

- **Price Risk**

The valuation of REIT/ InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/ InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event to insolvency or liquidation of any of the portfolio assets.

- **Market Risk**

REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/ Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

- **Liquidity Risk**

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the

investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

- **Reinvestment Risk**

Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Risk Control: Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

PLANS AND OPTIONS

PLANS

Each Scheme has two Plans: Regular Plan and Direct Plan

Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

There will be no separate portfolio for Direct Plan and Regular Plan. Further, both the options i.e. Growth and Dividend will have common portfolio under the Scheme.

DEFAULT PLAN

Investors subscribing Units under Direct Plan of a Scheme should indicate “Direct Plan” against the Scheme name in the application form. Investors should also mention “Direct” in the ARN column of the application form.

The table showing various scenarios for treatment of application under “Direct/Regular” Plan is as follows:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct
2	Not mentioned	Direct	Direct
3	Not mentioned	Regular	Direct
4	Mentioned	Direct	Direct
5	Direct	Not Mentioned	Direct
6	Direct	Regular	Direct

7	Mentioned	Regular	Regular
8	Mentioned	Not Mentioned	Regular

In cases of wrong/ invalid/ incomplete ARN code mentioned on the application form, the application will be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load, if applicable.

METHODOLOGY AND ILLUSTRATION OF SALE AND REPURCHASE OF UNITS

a) Methodology of calculating sale price

The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives $10,000/10 = 1000$ units.

b) Methodology of calculating repurchase price of Units

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the “Applicable NAV” to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV *(1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 * (1-0.02) = Rs. 10 * (0.98) = Rs. 9.80.

\$ As per SEBI Circular dated March 25, 2019, it has been decided that inflows of amount upto Rs. 2,00,000/- per transaction, by the individual investors shall be considered as inflows from retail investors.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route. Such expenses can be paid out of AMC's books at actuals or not exceeding 2 bps of respective scheme AUM, whichever is lower

However, the upfront trail commission shall be paid from AMC's books for inflows through SIPs from new investors as per the applicable regulations. Fungibility of expenses: The expenses towards Investment Management and Advisory Fees under Regulation 52 (2) and the various sub-heads of recurring expenses mentioned under Regulation 52 (4) of SEBI (MF) Regulations are fungible in nature. IV. Motilal Oswal Value Index (MOVI) Pack Plan:

(Applicable to the Schemes, MOFDYNAMIC, MOF35, MOF30, MOF25, MOFEH and MOFUSTF, MOFLF)

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal Liquid Fund* (referred to as Transferor Scheme) to Motilal Oswal Focused 25 Fund (MOF25), Motilal Oswal Midcap 30 Fund (MOF30), Motilal Oswal Multicap 35 Fund (MOF35), Motilal Oswal Equity Hybrid Fund (MOFEH) and Motilal Oswal

Dynamic Fund (MOFDYNAMIC) (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

1. Motilal Oswal Value Index (MOVI) helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and Dividend Yield of the Nifty 50 Index.

A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

2. NSE Indices LTD is the calculating agent of NIFTY MOVI. NSE Indices LTD shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.
3. Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.

Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.

4. This Plan presently offers two enrolment options:
 - a. One Time Investment
 - b. Systematic Transfer Plan (STP) with a minimum of 6 installments.
5. Minimum amount under this Plan is as follows:

Options	Minimum Amount of Transfer (Rs.)
One Time Investment	Rs. 500/- and in multiples of Re. 1/- thereafter
STP	Rs. 500/- and in multiples of Re. 1/- thereafter

6. The date of allocation will be the 15th of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

Note: Under ‘One Time Investment’ enrolment option, in addition to the 15th of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

Under ‘STP’ enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15th of every month, then allocation for that amount will occur on 15th of the subsequent month.

7. On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.
8. The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of

submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.

9. The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.
10. Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.
11. This Plan will be automatically terminated if all units are liquidated or withdrawn or pledged or upon receipt of intimation of death of the unit holder.
12. Unit holders should note that investor details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme. Units will be allotted under the same folio number.
13. Any change in methodology of MOVI would only be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund.
14. Given the two way movement of investments between funds, liquidity at times may be restricted by trading volumes, settlement periods, and inordinately large number of redemption requests or restructuring of the Scheme. This may impact the performance of the underlying scheme.
15. Investors may approach/consult their tax consultants in regard to the treatment of the transfer of units from the tax point of view.
16. Investors are required to refer to the terms and conditions mentioned in the enrolment form.
17. The Trustee/AMC reserves the right to change/modify the terms and conditions of the MOVI Pack Plan or withdraw this facility.

This facility will also be available for transfer into any other equity scheme of Motilal Oswal Mutual Fund that may be launched in future.

*The change will be effective from July 15, 2019.
