I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital market/debt market.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Motilal Oswal Nifty 50 Index Fund (MOFNIFTY50) is the name of the Scheme and it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 100,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Equities**
 - a. Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
 - b. The Scheme would invest in the securities comprising the Underlying Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index. As such the Scheme is not actively managed but is passively managed.
 - c. **Risks of Total Return**

Dividends are assumed to be reinvested into the Nifty 50 Index after the ex-dividend date of the constituents. However in practice, the dividend is received with a lag. This can lead to some tracking error.
- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.
- **Concentration risk**

This is the risk arising from over exposure to few securities/issuers/sectors.

NFO SID of Motilal Oswal Nifty 50 Index Fund (MOFNIFTY50)

- **Passive Investments**

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

- **Right to Limit Redemptions**

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

- **Risk Factors relating to Portfolio Rebalancing**

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

- **Index Fund**

The Scheme being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Risks Associated with Debt & Money Market Instruments

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk**
Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- **Risks associated with Segregated portfolio:**
The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event/actual default at issuer level. Accordingly, Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. The Security comprised of segregated portfolio may not realise any value. Further, Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- **Risks associated with investing in Tri-Party Repos Segments**
The mutual fund is a member of securities and Tri-Party Repos segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-Party Repos segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.
- **Risks associated with Investing in Derivatives**
Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest

rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risks associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

- **Tracking Error Risk**

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC’s ability to achieve close correlation with the underlying index of the Scheme. The Scheme’s returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.

- **Trading through mutual fund trading platforms of BSE and/ or NSE**

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and

measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

An investor / Unit holder will therefore be required to furnish such information to the AMC/ Fund to comply with the reporting requirements stated in the FATCA provisions and circulars issued by SEBI / AMFI / Income tax Authorities / such other Regulator in this regard.

India has joined the Multilateral Competent Authority Agreement on Automatic Exchange of Information (AEOI) for CRS. The CRS on AEOI requires the financial institution of the “source” jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries, such information having to be transmitted “automatically” annually. Accordingly, Income Tax Rules, 1962 were amended to provide legal basis for the reporting financial institution for maintaining and reporting information about the reportable accounts.

In accordance with the SEBI circular no. CIR/MIRSD/2/2015 dated August 26, 2015 and AMFI Best Practice guidelines no. 63/2015-16 dated September 18, 2015 with respect to uniform implementation of FATCA and CRS and such other guidelines/notifications issued from time to time, all Investors/Unitholder will have to mandatorily provide the details and declaration pertaining to FATCA/CRS for all new accounts failing which the application will be liable to be rejected. For accounts opened between July 1, 2014 and October 31, 2015 and certain pre-existing accounts satisfying the specified criteria, the Unitholders need to submit the details/declarations as per FATCA/CRS provisions. In case the information/declaration is not received from the Unitholder within the stipulated time, the account shall be treated as reportable account.

Ministry of Finance had issued Press Release dated April 11, 2017 issued by Ministry of Finance, for informing the revised timelines for Self-certifications which was April 30, 2017. So, investors who had not completed their self-certification were advised to complete their self-certification, on or before April 30, 2017. The folios of investors who had invested during July 1, 2014 to August 31, 2015 and have not provided self-certification were blocked and shall stay blocked unless self-certification is provided by the Investor and due diligence is completed.

Investors/Unitholders should consult their own tax advisors regarding the FATCA/CRS requirements with respect to their own situation and investment in the schemes of MOMF.

Creation of segregated portfolio:

A. Introduction:

SEBI vide its circular dated 28 December, 2018 (SEBI/HO/IMD/DF2/CIR/P/2018/160) read with its circular dated 07 November, 2019 (SEBI/HO/IMD/DF2/CIR/P/2019/127), has advised that portfolios by mutual fund schemes investing in debt and money market instruments should have provision in the concerned SID for creating portfolio segregation with a view to,

- 1) Reducing Sharp fall in NAV of Schemes.
- 2) Reducing Redemption pressure & liquidity risk,
- 3) Safeguarding good quality papers & creating confidence in market, and
- 4) Mitigating reputational risk.
- 5) Accordingly, this policy is being laid down to comply with the SEBI instructions

Segregated Portfolio: The portfolio comprising of debt and money market instruments, which might be affected by a credit event and shall also include the unrated debt or money market instruments affected by actual default.

Main Portfolio: Scheme portfolio excluding segregated portfolio

Total Portfolio: Scheme portfolio including the securities affected by credit events

B. Need for segregated portfolio:

While very stringent internal credit evaluation norms are being followed by AMC/Mutual Fund, the risk of credit downgrade in portfolio companies due to various factors cannot be ruled out. In the event of credit downgrade the downgrade instrument generally become illiquid making it very difficult for the fund manager to dispose of such instrument/s. In such an event segregation of such an instrument from the main portfolio will prevent the distressed asset(s) damaging the returns generated from more liquid and better-performing assets of the portfolio. It also provides fair treatment to all existing, incoming and outgoing investors, as any recovery from the issuer in future would get distributed among those investors, who would have suffered a loss due to downgrade event.

C. Credit Events

Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- 1) Downgrade of a debt or money market instrument to 'below investment grade', or
- 2) Subsequent downgrades of the said instruments from 'below investment grade', or
- 3) Similar such downgrades of a loan rating.

The most conservative rating shall be considered, if there is difference in rating by multiple CRAs, Creation of segregated portfolio shall be based on issuer level credit events as detailed at "Credit Events" and implemented at the ISIN level.

Actual default (for unrated debt or money market instruments)

In case of unrated debt or money market instruments, the actual default of either the interest or principal amount by the issuer.

On occurrence of any default, the AMC shall inform AMFI immediately about the actual default by the issuer. Subsequent to dissemination of information by AMFI about actual default by the issuer, the AMC might segregate the portfolio of debt or money market instruments of the said issuer.

D. Segregate portfolio creation process

Creation of segregated portfolio shall be optional and at the discretion of the AMC/ Trustees.

- a. The AMC may decide on creation of segregated portfolio on the day of credit event/ actual default (as applicable). Segregated portfolio has to be created at the issuer level i.e. the scheme having multiple segregated portfolios will have multiple segregated portfolios. Once decided, AMC shall
 - i. Seek Trustee prior approval,
 - ii. Issue a press release immediately mentioning its intention to segregate such debt and money market instrument and its impact to investors. It should also disclose that the segregation shall

be subject to trustee approval. Additionally, the said press release to be prominently disclosed on the website of the AMC.

iii. The Trustee approval has to be secured in not more than one business day from the credit event/actual default date & meanwhile the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

b. On receipt of the Trustee approval –

- i. the segregated portfolio shall be created effective from credit event/actual default date
- ii. AMC shall issue press release immediately mentioning all details pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
- iii. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
- iv. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event/ Actual Default.
- v. All existing investors in the scheme as on the day of the credit event/actual default date will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
- vi. No redemption or subscription will be allowed in the segregated portfolio/s. However, AMC shall enable the listing of the units of the segregated portfolio on recognized stock exchange within 10 working days from the date of its creation and shall also enable transfer of units on receipt of transfer request.

c. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

E. Disclosure Requirements

Communication to the investors, NAV disclosure and other disclosure including scheme performance requirements for segregated portfolio shall be as per the norms specified in the above SEBI circular.

MOAMC will comply with all communication requirements /disclosure requirements prescribed by SEBI in an event of creation of segregated portfolio. This shall include disclosures of NAV, issue of account statement, press release announcing credit event and creation of segregated portfolio/s, Disclosure of segregated portfolio in (Monthly/Half Yearly) portfolio statement, etc.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

If the Trustee rejects the segregated portfolio proposal then AMC to issue press release and inform the decision of the Trustee to investors, post which subscription and redemption applications will be processed based on the NAV of total portfolio.

F. Valuation of security:

From the date of credit downgrade to non-investment grade, the Security shall be valued based on principal of fair valuation & hair cut prescribed by the AMFI till the time valuation agency(ies) start providing valuation for the security.

The valuation of the instruments/portfolio shall be done based on the quote/price obtained from the independent valuation agency(ies). In cases where quote/price is not available from an independent agency, the Valuation Committee will decide the methodology for valuation of such instruments/portfolio.

All subscription and redemption requests for which NAV of the day of credit event/ Actual Default or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

- i. Upon trustees' approval to create a segregated portfolio –
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

G. Total Expense Ratio (TER) for segregated portfolio:

AMC shall not charge investment and advisory fees on the segregated portfolio.

TER (including legal charges and excluding the investment and advisory fees) shall be charged pro-rata basis only on upon recovery of investment in the segregated portfolio. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. The maximum TER limit shall be same as applicable to the main portfolio. TER in excess of limit shall be borne by AMC. However, the costs related to segregated portfolio shall in no case be charged to the main portfolio.

The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.

H. Distribution of recovery:

Any recovery of investment of the segregated portfolio/s (including recovery after write-off) shall be distributed immediately to the investors in proportion to their holdings in the segregated portfolio/s.

I. Monitoring of segregated portfolio:

Trustees shall monitor the compliance of the SEBI Circular in respect of creation of segregated portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports to be filed with SEBI.

J. Evaluation of negative impact on the performance incentives:

In order to avoid mis-use of the segregated portfolio, Trustees will put in place a mechanism to evaluate the negative impact of such segregation, on the performance incentives of the Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of MOAMC., including claw back of such amount to the segregated portfolio of the scheme.

The amount forfeited shall be credited to the segregated portfolio of the concern scheme(s) in the ratio of value of the securities downgraded in the respective schemes before the credit event.

K. Action Taken Report:

AMC shall put sincere efforts to recover the bad investment. An Action Taken Report should be prepared and placed before the Board of Trustee meeting/s till the matter is finally resolved.

Investment in Derivatives

The Scheme may take an exposure to equity derivatives of constituents of the Underlying Index when securities of the Index are unavailable, insufficient or for rebalancing at the time of change in Index or in case of corporate actions, for a short period of time. The total exposure to derivatives would be restricted to 50% of the net assets of the Scheme.

The Scheme may use derivative instruments such as stock futures and options contracts, warrants, convertible securities, swap agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objective of the Scheme.

Limit for investment in derivatives instruments

In accordance with SEBI Circulars Nos. DNP/DF/Cir-29/2005 dated September 14, 2005, DNP/DF/Cir-30/2006 dated January 20, 2006, SEBI/DNP/DF/Cir-31/2006 dated September 22, 2006, and Cir/IMD/DF/11/2010 dated August 18, 2010 and SEBI Circular No. SEBI/HO/MRD/DP/CIR/P/2016/143 dated December 27, 2016 and such other amendments issued by SEBI from time to time, the following conditions shall apply to the Scheme's participation in the derivatives market. The investment restrictions applicable to the Scheme's participation in the derivatives market will be as prescribed or varied by SEBI or by the Trustees (subject to SEBI requirements) from time to time.

i. Position limit for the Mutual Fund in index options contracts

1. The Mutual Fund's position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.

2. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in index futures contracts

1. The Mutual Fund's position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per stock Exchange.
2. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging for the Mutual Fund:

In addition to the position limits at point (i) and (ii) above, the Mutual Fund may take exposure in equity index Derivatives subject to the following limits:

1. Short positions in index Derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Fund's holding of stocks.
2. Long positions in index Derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, Government Securities, T-Bills and similar instruments.

iv. Position limit for the Mutual Fund for stock based derivative contracts:

- The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts will be as follows :-
- The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).

v. Position limit for the Scheme:

1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of the Scheme shall not exceed the higher of: 1% of the free float market capitalisation (in terms of number of shares) or 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a stock exchange.
3. For index based contracts, the Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

As and when SEBI amends the limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

Definition of Exposure in case of Derivative Positions

Each position taken in Derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain Derivative positions may theoretically have unlimited possible loss. Exposure in Derivative positions shall be computed as:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought Contracts	Option Premium Paid * Lot Size * Number of

Concepts and Examples:

Futures

Futures (Index & Stocks) are forward contracts traded on the exchanges & have been introduced both by BSE and NSE. Currently futures of 1 month (near month), 2 months (next month) and 3 months (far month) are presently traded on these exchanges. These futures expire on the last working Thursday of the respective months.

Illustration with Index Futures

In case the Nifty near month future contract is trading at say, Rs. 9,600, and the fund manager has a view that it will depreciate going forward; the Scheme can initiate a sale transaction of Nifty futures at Rs. 9,610 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to Rs. 9,500 after say, 20 days, the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 110.

Correspondingly, if the fund manager has a positive view he can initiate a long position in the index / stock futures without an underlying cash/ cash equivalent subject to the extant regulations.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. The profitability of index /stock future as compared to an individual security will inter-alia depend upon:

- The Carrying cost,
- The interest available on surplus funds, and
- The transaction cost

Example of a typical future trade and the associated costs:

Particulars	Index Future	Actual Purchase of Stocks
Index at the beginning of the month	9,600	9,600
Price of 1 Month Future	9,620	-
A. Execution Cost: Carry and other index future costs	20	-
B. Brokerage Costs (0.05% of Index Future and 0.12% for spot stocks)	4.81	11.52
C. Gains on Surplus Funds: (Assumed 6.00% p.a. return on 85% of the money left after paying 15% margin)	40.325	0
(6.00%*9600*85%*30days/365)		
Total Cost (A+B-C)	-15.51	11.52

Few strategies that employ stock /index futures and their objectives:

A. Arbitrage

1. Buying spot and selling future: Where the stock of a company "A" is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

2. Selling spot and buying future: In case the Scheme holds the stock of a company “A” at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too, the Scheme will have a benefit of Rs. 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

Note: The same strategy can be replicated with a basket of Nifty-50 stocks (Synthetic NIFTY) and the Nifty future index.

B. Buying/ Selling Stock future:

When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the Scheme can square up the short position thereby earning a profit of Rs.10 vis-a- vis a fall in stock price of Rs. 8.

C. Hedging:

The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Both index and stock futures and options may be used to hedge the stocks in the portfolio.

D. Alpha Strategy:

The Scheme will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying a bank stock and selling Bank Nifty future.

Risk associated with these strategies:

1. Lack of opportunities
2. Inability of derivatives to correlate perfectly with underlying security and
3. Execution Risk, whereby ultimate execution takes place at a different rates than those devised by the strategy.

Execution of these strategies depends upon the ability of the fund manager to identify and execute based on such opportunities. These involve significant uncertainties and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Option Contracts (Stock and Index)

An Option gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed upon price during a certain period of time or on a specific date.

Options are used to manage risk or as an investment to generate income. The price at which underlying security is contracted to be purchased or sold is called the Strike Price.

Options that can be exercised on or before the expiration date are called American Options while, Options that can be exercised only on the expiration date are called European Options

Options Risk / Return Pay – off Table

	Stock / Index Options	Buy Call	Sell Call	Buy Put	Sell Put
1.	View on Underlying	Positive	Negative	Negative	Positive
2.	Premium	Pay	Receive	Pay	Receive
3.	Risk Potential	Limited to premium paid	Receive	Limited to premium paid	Receive
4.	Return Potential	Unlimited	Premium Received	Unlimited	Premium Received

Note: The above table is for the purpose of explaining concept of options contract. As per the current Regulations, the Scheme(s) cannot write option or purchase instrument with embedded write option.

Option contracts are of two types - Call and Put

Call Option:

A call option gives the buyer, the right to buy specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of call option however, has the obligation to sell the underlying asset if the buyer of the call option decides to exercise the option to buy.

Put Option:

A put option gives the buyer the right to sell specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of put option however, has the obligation to buy the underlying asset if the buyer of the put option decides to exercise his option to sell.

Index Options / Stock Options

Index options / Stock options are termed to be an efficient way of buying / selling an index/stock compared to buying / selling a portfolio of physical shares representing an index for ease of execution and settlement. The participation can be done by buying / selling either Index futures or by buying a call/put option.

The risk are also different when index /stock futures are bought/sold vis-a-vis index/ stocks options as in case of an index future there is a mark to market variation and the risk is much higher as compared to buying an option, where the risk is limited to the extent of premium paid.

In terms of provision of SEBI circular dated August 18, 2010, the Scheme shall not write options or purchase instruments with embedded written options.

The illustration below explains how one can gain using Index call / put option. These same principals of profit / loss in an Index option apply in Toto to that for a stock option.

Call Option

Suppose an investor buys a Call option on 1 lot of Nifty 50 (Lot Size: 75 units)

- Nifty index (European option)
- Nifty 1 Lot Size: 75 units
- Spot Price (S): 9600
- Strike Price (x): 9700 (Out-of-Money Call Option)
- Premium: 37

Total Amount paid by the investor as premium $[75 \times 37] = 2775$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

Case 1- The index goes up

- **An investor sells the Nifty Option described above before expiry:**

Suppose the Nifty index moves up to 9900 in the spot market and the premium has moved to Rs 250 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His gains are as follows:

- Nifty Spot: 9600
- Current Premium: Rs.250
- Premium paid: Rs.37
- Net Gain: $\text{Rs.}250 - \text{Rs.}37 = \text{Rs.}213$ per unit
- Total gain on 1 lot of Nifty (75 units) = $\text{Rs.}15,975$ (75×213)

In this case the premium of Rs.250 has an intrinsic value of Rs. 200 per unit and the remaining Rs. 50 is the time value of the option.

- **An investor exercises the Nifty Option at expiry**

Suppose the Nifty index moves up to 9800 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty call option as the option now is in the money.

His gains are as follows:

- Nifty Spot: 9800
- Premium paid: Rs.37
- Exercise Price: 9700
- Receivable on exercise: $9800 - 9700 = 100$
- Total Gain: $\text{Rs.} 4725 \{(100 - 37) \times 75\}$

In this case the realised gain is only the intrinsic value, which is Rs.100, and there is no time value.

Case 2 - The Nifty index moves to any level below 9700

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.2775 (Loss is capped to the extent of Premium Paid) ($\text{Rs } 37 \text{ Premium paid} \times \text{Lot Size: } 75 \text{ units}$).

Put Option

Suppose an investor buys a Put option on 1 lot of Nifty 50.

- Nifty 1 Lot Size: 75 units
- Spot Price (S): 9600
- Strike Price (x): 9500 (Out-of-Money Put Option)
- Premium: 40
- Total Amount paid by the investor as premium $[75*40] = 3000$

There are two possibilities i.e. either the index moves over the strike price or moves below the strike price.

Let us analyze these scenarios.

Case 1 - The index goes down

- **An investor sells the Nifty Option before expiry:**

Suppose the Nifty index moves down to 9400 in the spot market and the premium has moved to Rs. 140 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty Put Option as the option now is in the money. His gains are as follows:

- Nifty Spot: 9400
- Premium paid: Rs.40
- Net Gain: $Rs.140 - Rs.40 = Rs.100$ per unit
- Total gain on 1 lot of Nifty (75 units) = $Rs.7500 (100*75)$

In this case the premium of Rs.140 has an intrinsic value of Rs. 100 per unit and the remaining Rs.40 is the time value of the option.

- **An investor exercises the Nifty Option at expiry (It is an European Option)**

Suppose the Nifty index moves down to 9400 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty Put Option as the option now is in the money.

His gains are as follows:

- Nifty Spot: 9400
- Premium paid: Rs.40
- Exercise Price: 9500
- Gain on exercise: $9500-9400 = 100$
- Total Gain: $Rs.4500 \{(100-40)*75\}$

In this case the realised amount is only the intrinsic value, which is Rs.100, and there is no time value in this case.

Case 2 - If the Nifty index stays over the strike price which is 9500, in the spot market then the investor does not gain anything but on the other hand his loss is limited to the premium paid.

- Nifty Spot: >9600
- Net Loss Rs.3000 (Loss is capped to the extent of Premium Paid) $(Rs. 40 \text{ Premium paid} * \text{Lot Size: } 75 \text{ units})$

Risk Associated with these Strategies

- The risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

E. INVESTMENT STRATEGY

The Scheme follows a passive investment strategy and invests in stocks in a proportion that is as close as possible to the weightages of these stocks in the respective index. The AMC does not make any judgments about the investment merit of Nifty 50 Index nor will it attempt to apply any economic, financial or market analysis. This would be done by investing in almost all the stocks comprising the Nifty 50 Index in approximately the same weightage that they represent in Nifty 50 Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental collections /redemptions from the Scheme. The scheme would also invest in debt and money market instruments as stated in the asset allocation table. The Fund Manager may use Derivatives as may be permitted under the Regulations from time to time, for the purpose of hedging and portfolio balancing and to seek to achieve the investment objectives of the Scheme.

Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

The Scheme may lend securities from its portfolio in accordance with the Regulations. The AMC/Fund shall also adhere to guidelines issued under Securities Lending Scheme, 1997. Securities' lending shall enable the Scheme to earn income that may partially offset its expenses and thereby reduce the effect these expenses have on the Scheme's ability to provide investment returns. The Scheme will pay reasonable administrative and custodial fees in connection with the lending of securities. The Scheme may be exposed to the risk of loss should a borrower default on its obligation to return the borrowed securities. The Scheme share of income from the lending collateral will be included in the Scheme's gross income. The Fund will comply with the conditions for securities lending specified by SEBI Regulations and circulars. The maximum exposure of the Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or up to such limits as may be specified by SEBI. The Scheme will not lend more than 75% of its corpus.

Investment by AMC/Sponsor in the Scheme

In accordance with Regulation 28(4) of SEBI (Mutual Funds) (Amendment) Regulations, 2014 the Sponsor or AMC shall invest not less than 1 % of the amount raised in the NFO or fifty lakh rupees, whichever is less, in the growth option of the scheme and such investment shall not be redeemed unless the scheme is wound up.

In addition to investments as mandated under Regulation 28(4) of the Regulations as mentioned above, the AMC may invest in the Scheme during the NFO period as well as continuous offer period subject to the SEBI (MF) Regulations. The AMC shall not charge investment management fees on investment by the AMC in the Scheme.

Investment of Subscription Money

NFO SID of Motilal Oswal Nifty 50 Index Fund (MOFNIFTY50)

The Mutual Fund may deploy NFO proceeds in Tri-Party Repos before closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in Tri-Party Repos during the NFO period. The appreciation received from investment in Tri-Party Repos shall be passed on to investors. Further, in case the minimum subscription amount is not garnered by the Scheme during the NFO period, the interest earned upon investment of NFO proceeds in Tri-Party Repos shall be returned to investors, in proportion of their investments, along with the refund of the subscription amount.

Portfolio Turnover

Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. The Scheme, being an open ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weightage as the securities have in the Underlying Index. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:-

1. Fees and expenses of the Scheme.
2. Cash balance held by the Scheme due to dividend received, subscriptions, redemption, etc.
3. Halt in trading on the stock exchange due to circuit filter rules.
4. Corporate actions
5. The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities shares.
6. Dividend payout.
7. Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.
8. Lack of Liquidity

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

<p>Ongoing price for subscription (purchase)/switch-in (from other schemes/plans of the Mutual Fund) by investors This is the price you need to pay for purchase/switch-in.</p>	<p>Ongoing price for subscription (purchase) by investors will be the applicable NAV of the Plan/Option selected.</p> <p>In accordance with the requirements specified by the SEBI circular no. SEBI/IMD/CIR No.4/168230/09 dated June 30, 2009, no entry load will be charged for purchase / additional Purchase/switch-in accepted for the scheme with effect from August 01, 2009. Similarly, no entry load will be charged with respect to applications for registrations under Systematic Investment Plans. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder. Further, pursuant to SEBI circular No. SEBI/IMD/CIR No. 14/120784/08 dated March 18, 2008, with effect from April 1, 2008, no entry load or exit load shall be charged in respect of bonus units and of units allotted on reinvestment.</p>
<p>Ongoing price for redemption (sale) /switch outs (to other schemes/plans of the Mutual Fund) by investors This is the price you will receive for redemptions/switch outs.</p>	<p>At the applicable NAV subject to prevailing exit load, if any.</p> <p>Redemption Price = Applicable NAV * (1-Exit Load)</p> <p>For details of exit load applicable to the Scheme, please refer Section IV(C) – Load Structure.</p> <p>The securities transaction tax levied under the Income-tax Act, 1961 at the applicable rate on the amount of redemption will be reduced from the amount of redemption.</p>
<p>Methodology and illustration of sale and repurchase price of Units</p>	<p>a) Methodology of calculating sale price</p> <p>The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)</p> <p>Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives $10,000/10 = 1000$ units.</p> <p>b) Methodology of calculating repurchase price of Units</p> <p>Repurchase or redemption price is the price or NAV at which an</p>

	<p>open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the “Applicable NAV” to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV *(1- Exit Load, if any)</p> <p>Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 * (1-0.02) = Rs. 10 * (0.98) = Rs. 9.80</p>

D. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Asset Value (NAV) of the units under the Scheme shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Receivables} + \text{Accrued Income} + \text{Other Assets} - \text{Accrued Expenses} - \text{Payables} - \text{Other Liabilities}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

No. of Units outstanding under Scheme on the Valuation Day

The NAV will be calculated up to four decimals.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAV shall be calculated and disclosed on each business day. The computation of NAV shall be in conformity with SEBI Regulations and guidelines as prescribed from time to time.

IV. FEES AND EXPENSES

This section outlines the expenses that will be charged to the Scheme.

A. NEW FUND OFFER (NFO) EXPENSES

\$ As per SEBI Circular dated March 25, 2019, it has been decided that inflows of amount upto Rs. 2,00,000/- per transaction, by the individual investors shall be considered as inflows from retail investors.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route. The said commission should be charged to the scheme as 'commissions' and should also account for computing the TER differential between regular and direct plans in each scheme.

The expenses towards Investment Management and Advisory Fees under Regulation 52 (2) and the various sub-heads of recurring expenses mentioned under Regulation 52 (4) of SEBI (MF) Regulations will be charged in line with SEBI Mutual Fund Regulations. Further, the additional expenses under Regulation 52(6A)(c) shall also be incurred towards any of the expense heads mentioned in the above regulation. .

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly. These estimates have been made in good faith as per the information available to the AMC and the above expenses (including investment management and advisory fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations, as amended from time to time.

All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan. The TER of the Direct Plan will be lower to the extent of the distribution expenses/commission which is charged in the Regular Plan and no commission for distribution of Units will be paid / charged under the Direct Plan.

In addition to expenses under Regulation 52(6) and (6A), AMC may charge GST on investment and advisory fees, expenses other than investment and advisory fees and brokerage and transaction cost as below:

3. GST on brokerage and transaction cost paid for execution of trade, if any, shall be within the limit prescribed under regulation 52 of the SEBI Regulations.

In addition to the limits as specified in Regulation 52(6) of SEBI (Mutual Funds) Regulations 1996 or the Total Recurring Expenses (Total Expense Limit) as specified above, the following costs or expenses may be charged to the scheme:

Additional TER can be charged up to 30 basis points on daily net assets of the scheme as per regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (hereinafter referred to as Regulations), if the new inflows from beyond top 30 cities are at least (a) 30% of gross new inflows in the scheme or (b) 15% of the average assets under management (year to date) of the scheme, whichever is higher. Provided that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

In case inflows from beyond top 30 cities is less than the higher of (a) or (b) above, additional TER on daily net assets of the scheme shall be charged as follows:

Daily net assets X 30 basis points X New inflows from beyond top 30 cities
365* X Higher of (a) or (b) above

* 366, wherever applicable.

The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

2. Details of all enforcement actions taken by SEBI in the last five years and/ or pending with SEBI for the violation of SEBI Act, 1992 and Rules and Regulations framed there under including debarment and/ or suspension and/ or cancellation and/ or imposition of monetary penalty/adjudication/enquiry proceedings, if any, to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel (especially the fund managers) of the AMC and Trustee Company were/ are a party. The details of the violation shall also be disclosed.
 - a. SEBI had pursuant to its investigations in the scrips Pyramid Samira Theatre Ltd. had restrained Mr. Shailesh Jayantilal Shah, Mr. Rajesh Jayantilal Shah and Ms. Ritaben Rohitkumar Shah from buying, selling or dealing in the securities market. SEBI had observed that MOSL and some other brokers have executed trades on behalf of above three clients after debarment order and SEBI through its notice has called upon to show cause as to why further action under SEBI (Intermediaries) Regulations, 2008 should not be taken against MOSL for alleged violation of the provisions of Regulation 27 (xv) and 27 (xvii) r/w Regulations 26 (xv) of the Broker Regulations and clauses A (1), A (2) and A (5) of the Code of Conduct for Brokers as specified in Schedule II under Regulation 7 of the Broker Regulations. MOSL has explained to SEBI the reasons for such occurrence and requested SEBI to drop further proceedings in the matter. The order of SEBI is awaited in this regard. SEBI vide its order dated December 7, 2015 had issued warning and has closed the proceedings in the matter.
 - b. SEBI vide its letter dated April 29, 2014 in the matter of Mr. CR Mohanraj, notified MOSL about the appointment of an Adjudicating Officer to hold an inquiry and adjudge violation of SEBI (Stock-Brokers and Sub-Brokers) Regulations, 1992, and issued a Show Cause Notice as to why an inquiry should not be held against MOSL (under Rule 4 of SEBI (Procedure for Holding Inquiry and Imposing Penalties by Adjudicating Officer) Rules, 1995 read with section 15-I of SEBI Act, 1992) and why penalty should not be imposed (under section 15HB of the SEBI Act, 1992). The Show Cause Notice alleged that MOSL had violated Regulation 18 and Clause A(1), A(2), A(4), A(5), B(4)(a), B(4)(b) and B(7) of the Code of Conduct for Stock Brokers (as specified under Scheduled II read with Regulation 9(f) of the SEBI (Stock Brokers and Sub-brokers) Regulations, 1992 and SEBI Circular No. SEBI/MIRSD/DPS-1/Cir-31/2004 dated August 26, 2004). In response, MOSL requested for an opportunity to inspect all the documents and records relied upon by SEBI, but were provided with (a) an incomplete set of documents; and (b) illegible duplicates of some of the documents without the originals.

Notwithstanding the foregoing, MOSL refuted the allegations in its letter of March 12, 2015 to SEBI on the grounds that the client's shares were sold only with his consent, which is evidenced from (a) his voluntary signing of the Member Client Agreement which granted MOSL the authority to deal in the Capital Market, Futures and Options, and Derivatives segments of the securities market on the client's instructions; (b) his signing of numerous Delivery Instruction Slips for transferring shares from his demat account to MOSL as collateral for trading; and (c) the periodic receipt of electronic contract notes and accounting statements sent by MOSL to the client. MOSL also highlighted that the client had failed to bring the alleged irregularities and discrepancies to the MOSL's attention within the stipulated 24-hour period. After hearing the matter, SEBI vide its order EAD-12/ AO/SM/

145 /2017-18 dated January 11, 2018 imposed penalty of Rs. 2,00,000/- (Rupees Two Lakhs Only), stating that MOSL did not take proper care in securing the important document which was misplaced and could not be traced

- c. SEBI vide Notice dated May 09, 2019, under Rule 4 (1) of SEBI (Procedure for holding Inquiry and Imposing penalties by Adjudicating Officer) rules , 2005 inquired into alleged violation of the provisions of SEBI circular no. SMD/SED/CIR/93/23321 dated November 18, 1993.

SEBI conducted Inspection of MOFSL to examine whether MOFSL has complied with requirements of SEBI circular dated November 18, 1993. Inspection team observed the MOFSL has mis-utilised the funds of client's credit balance lying with the broker for the settlement obligation of the debit balance clients. MOFSL in its reply submitted that Inspection team has not included margin requirements of clients while calculating total creditor balance and hence the same is on higher side and that there would be considerable decrease in the figures if the margin dues are deducted from creditor balance. SEBI did not accept argument of the MOFSL since the margins collected from clients are in the form of funds and/or securities. The fund portion of the margin collected from the client has already been considered while calculating client deposits with the broker.

In view of the above SEBI called upon to show cause as to why an inquiry should not be held against MOFSL in terms of Rule 4 of the Adjudication Rules read with Section 23 of the SCRA 1956 and why penalty should not be imposed on terms of the provisions of Section 23D of the SCRA 1956.

MOFSL has filed reply for the said Notice.

4. Any pending material civil or criminal litigation incidental to the business of the Mutual Fund to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel are a party should also be disclosed separately.

None

5. Any deficiency in the systems and operations of the Sponsor(s) and/ or the AMC and/or the Board of Trustees/Trustee Company which SEBI has specifically advised to be disclosed in the SID, or which has been notified by any other regulatory agency, shall be disclosed.

None
