|---------------------------|--|
| Name of the Scheme | Motilal Oswal Midcap 30 Fund (MOF30) |
| Type of the Scheme | Mid Cap Fund - An open ended equity scheme predominantly investing in mid cap stocks |
| Category of Scheme | Mid Cap Fund |

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to achieve long term capital appreciation by investing in a maximum of 30 quality mid-cap companies having long-term competitive advantages and potential for growth.

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ASSET ALLOCATION PATTERN

The asset allocation pattern of the Scheme would be as follows:

| Instruments | Indicative Allocations (%of total assets) | | Risk Profile |
|--|--|----------------|------------------------|
| | Minimum | Maximum | High/Medium/Low |
| Equity and equity related instruments* selected between Top 101 st and 250 th listed companies by full market capitalization | 65 | 100 | High |
| Equity and equity related instruments* other than above | 0 | 35 | High |
| Debt, Money Market Instruments, G-Sec, Bonds, Cash and Cash Equivalents, etc. | 0 | 10 | Low |
| Units issued by REITs and InvITs | 0 | 10 | Medium to High |

*subject to overall limit of 30 companies

Money Market Instruments include CMBs, T-Bills, and Government securities with an unexpired maturity upto one year, TRIPs & Repo/ Reverse Repo.

Exposure by the Scheme in derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Scheme will not participate in securities lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to securities lending for a single intermediary to the extent of 5% of the total net assets at the time of lending.

The Scheme may invest in units of REITs/InvITs to the extent mentioned in asset allocation and in line with, SEBI (Mutual Funds) (Amendment) Regulations, 2017.

The cumulative gross exposure to Equity, Debt, REITs and InvITs will not exceed 100% of the Net Assets of the Scheme.

The scheme will not invest in Securitised debt, corporate debt repo and reverse repo and foreign securities. The scheme shall not undertake short selling.

The scheme shall invest in equity and equity related instruments as per the investment objective of the scheme. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.

INVESTMENT STRATEGY

The primary investment objective of the Scheme is to generate returns by investing in a portfolio of midcap equity and equity related instruments, money market instruments, cash and cash equivalents. The Fund may also enter into securities lending or such other transactions, in accordance with the Regulations, as may be allowed to Mutual Funds from time to time.

The portfolio will essentially follow MOAMC's QGLP philosophy – i.e. invest in Quality businesses with reasonable Growth potential and with sufficient Longevity of that growth potential at a fair Price. The scheme shall follow an active investment style and will seek to invest in midcap companies with a strong competitive position or economic moat, good business prospects, run by a competent management that will help them achieve good growth over the medium to long term and available at reasonable valuations. The fund shall practice a concentrated, high-conviction portfolio strategy with a low-churn, buy and hold approach to investing. It will typically select companies with full market capitalization within the range from 101st to 250th on recognized stock exchange.

The long-term India growth story provides an excellent platform for small and mid-size businesses to unleash their growth potential and to emerge as large cap companies of the future. India has a plethora of mid-size listed companies and their number has only risen in recent years. We believe the midcap universe in India even today presents similar such investment opportunities from a medium to long term perspective. Besides, midcaps are typically found to be under-owned and under-researched and hence provide a large universe of exciting investment prospects.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

1. Risks associated with investing in Equities

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods

may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, should there be a subsequently decline in the value of the securities held in the Schemes portfolio. The Scheme may find itself invested in unlisted securities either by choice or due to external events or corporate actions. This may increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

2. Market Risk

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.

3. Asset Class Risk

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

4. Interest Rate Risk

Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

5. Credit Risk

Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.

6. Liquidity or Marketability Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

7. Right to Limit Redemptions

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

8. Risks associated with Investing in Derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

9. Risk associated with securities lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes securities lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

• Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Risk Factors Associated with Investments in REITs and InvITs:

10. Risk of lower than expected distributions

The distributions by the REIT or InvITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:

- i. Success and economic viability of tenants and off-takers
- ii. Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- iii. Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
- iv. Debt service requirements and other liabilities of the portfolio assets
- v. Fluctuations in the working capital needs of the portfolio assets
- vi. Ability of portfolio assets to borrow funds and access capital markets
- vii. Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- viii. Amount and timing of capital expenditures on portfolio assets
- ix. Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/ InvITs such as fire, natural disasters, accidents, etc.
- x. Taxation and regulatory factors

i. Price Risk

The valuation of REIT/ InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/ InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event to insolvency or liquidation of any of the portfolio assets.

ii. Market Risk

REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/ Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

iii. Liquidity Risk

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

iv. Reinvestment Risk

Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

PLANS AND OPTIONS

The Scheme offers two Plans: Regular Plan and Direct Plan

Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

There will be no separate portfolio for Direct Plan and Regular Plan. Further, both the options i.e. Growth and Dividend will have common portfolio under the Scheme.

Each Plan offers the following Options:

- Growth Option
- Dividend Option (with Payout and Re-investment facility)

Under Dividend Option, the Fund will endeavor to declare dividends from time to time depending on the availability of distributable surplus.

Dividend (Payout and Reinvestment) and Growth

Dividend Option-

Under this Option, the Trustee reserves the right to declare dividend under the Scheme depending on the net distributable surplus available under the Option. It should, however, be noted that actual declaration of dividends and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustees or any Committee authorised by them.

If Dividend payable under the dividend payout option is equal to or less than Rs. 500/-, then it would be compulsorily re-invested in the Option of the Scheme.

Growth Option-

All Income earned and realized profit in respect of a unit issued under that will continue to remain invested until repurchase and shall be deemed to have remained invested in the option itself which will be reflected in the NAV.

The AMC reserves the right to introduce/discontinue further Plans / Options as and when deemed fit.

Default Plan/Option:

Investors subscribing Units under Direct Plan of a Scheme should indicate “Direct Plan” against the Scheme name in the application form. Investors should also mention “Direct” in the ARN column of the application form. The table showing various scenarios for treatment of application under “Direct/Regular” Plan is as follows:

| Scenario | Broker Code mentioned by the investor | Plan mentioned by the investor | Default Plan to be captured |
|----------|---------------------------------------|--------------------------------|-----------------------------|
| 1 | Not mentioned | Not mentioned | Direct |
| 2 | Not mentioned | Direct | Direct |
| 3 | Not mentioned | Regular | Direct |
| 4 | Mentioned | Direct | Direct |
| 5 | Direct | Not Mentioned | Direct |
| 6 | Direct | Regular | Direct |
| 7 | Mentioned | Regular | Regular |
| 8 | Mentioned | Not Mentioned | Regular |

In cases of wrong/ invalid/ incomplete ARN code mentioned on the application form, the application will be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load, if applicable.

If the investor does not clearly specify the choice of option at the time of investing, it will be deemed that the investor has opted for Growth option and in case he does not specify payout/re-investment under Dividend option, it will be deemed to be dividend re-investment.

METHODOLOGY AND ILLUSTRATION OF SALE AND REPURCHASE OF UNITS

- **Methodology of calculating sale price**

The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives $10,000/10 = 1000$ units.

- **Methodology of calculating repurchase price of Units**

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the “Applicable NAV” to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV *(1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 * (1-0.02) = Rs. 10 * (0.98) = Rs. 9.80.

If the amount of dividend in the source scheme is less than Rs. 1000/-, the dividend will be reinvested in the same scheme. Unitholders enrolment under the DTP facility will automatically override any previous instructions for ‘Dividend Payout’ or ‘Dividend Reinvestment’ facility in the source scheme. The source scheme shall be Motilal Oswal Ultra Short Term Fund.

Under this provision, the dividend amount to be invested shall be automatically invested by subscribing to the units of the chosen equity scheme of the Fund on the immediate next Business Day after the record date at the applicable NAV of such equity scheme.

- **Mobile Facility**

This facility enables investors to transact through the official application to execute transactions for purchases, SIP, STP, redemptions, switches, view portfolio valuation, download the account statements and avail such other services as may be introduced by the Fund from time to time on their mobile handsets.

- **Motilal Oswal Value Index (MOVI) Pack Plan:**

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal Liquid Fund* (referred to as Transferor Scheme) to Motilal Oswal Midcap 30 Fund (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

- Motilal Oswal Value Index (MOVI) helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and Dividend Yield of the Nifty 50 Index.
- A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.
- NSE Indices Limited. is the calculating agent of NIFTY MOVI. NSE Indices Limited shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.
- Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.
- Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.
- This Plan presently offers two enrolment options:
 - One Time Investment
 - Systematic Transfer Plan (STP) with a minimum of 6 installments.
- Minimum amount under this Plan is as follows:

| Options | Minimum Amount of Transfer (Rs.) |
|---------------------|--|
| One Time Investment | Rs. 500/- and in multiples of Re. 1/- thereafter |
| STP | Rs. 500/- and in multiples of Re. 1/- thereafter |

- The date of allocation will be the 15th of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

Note: Under ‘One Time Investment’ enrolment option, in addition to the 15th of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

Under ‘STP’ enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15th of every month,

then allocation for that amount will occur on 15th of the subsequent month.

- On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.
- The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.
- The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.
- Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.
- This Plan will be automatically terminated if all units are liquidated or withdrawn or pledged or upon receipt of intimation of death of the unit holder.
- Unit holders should note that investor details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme. Units will be allotted under the same folio number.
- Any change in methodology of MOVI would only be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund.
- Given the two way movement of investments between funds, liquidity at times may be restricted by trading volumes, settlement periods, and inordinately large number of redemption requests or restructuring of the Scheme. This may impact the performance of the underlying scheme.
- Investors may approach/consult their tax consultants in regard to the treatment of the transfer of units from the tax point of view.
- Investors are required to refer to the terms and conditions mentioned in the enrolment form.
- The Trustee/AMC reserves the right to change/modify the terms and conditions of the MOVI Pack Plan or withdraw this facility.

This facility will also be available for transfer into any other equity scheme of Motilal Oswal Mutual Fund that may be launched in future.
