

# IOP V2

September 2021

# Smallcaps offer a larger opportunity for Alpha generation

- **Top 20 stocks account for 31% of Index weight but contributes 230% of the total price returns**
- **Nifty Smallcap 100 Returns for 3 years: -8.4%**
- **Dispersion averages out the overall returns of the portfolio**
- **Wide dispersion of returns in small caps provides scope for bottom-up stock picking**

Source: MOAMC internal research. Disclaimer: Data from Sep 30, 2017 till Sep 30, 2020. The above is for representation purpose only and should not be used for development or implementation of an investment strategy. Past performance may or may not be sustained in future.

# SmallCaps offer a larger Opportunity for Alpha generation

- Small Caps are covered by fewer analysts, this gives fund manager an edge in spotting good businesses early
- Ownership pattern is not broad based as information is limited –this category is best played through a focused portfolio

## Under Researched : Limited Analyst Coverage

Average Analyst Coverage	
Top 100	16
101-400	17

## Under Owned : Lower Institutional Holding

Ownership Pattern amongst Index Constituents (%)			
	Promoter	Institutional	Retail
Top 100	55	26	18
101-400	63	19	19

Source: Bloomberg Average analyst coverage is the average number of analysts covering each of the index constituents as on September 30th 2019. Ownership pattern as disclosed by index constituent companies to the NSE as on QE June 2019

# Why now? - Expect smallcaps to bounce back with economic recovery

- Over the last 2-year period, small caps have underperformed both large caps and midcaps and this is unlikely to sustain and now is time to grab the opportunity
- The long term relationship between Small Cap 100 and Nifty 50 indicates that we are at or nearing a trough

Source: MOAMC Internal Research, Data as on 31.08..2021

The sector mentioned herein are for general and comparison purpose only and not a complete disclosure of every material fact. and should not used for development or implementation of an investment strategy. Past performance may or may not be sustained in future.

# Small caps growth is strongly correlated with GDP growth

- Pre-Covid economic recovery saw IOPV2 beginning to outperform.
- However, Covid has significantly set back both the economy and IOP
- Post-Covid green shoots of economic recovery visible and FY22 should see full impact

Source: MOAMC Internal Research, Data as on 31.01.2021

# Small caps can grow 100x in 10 years

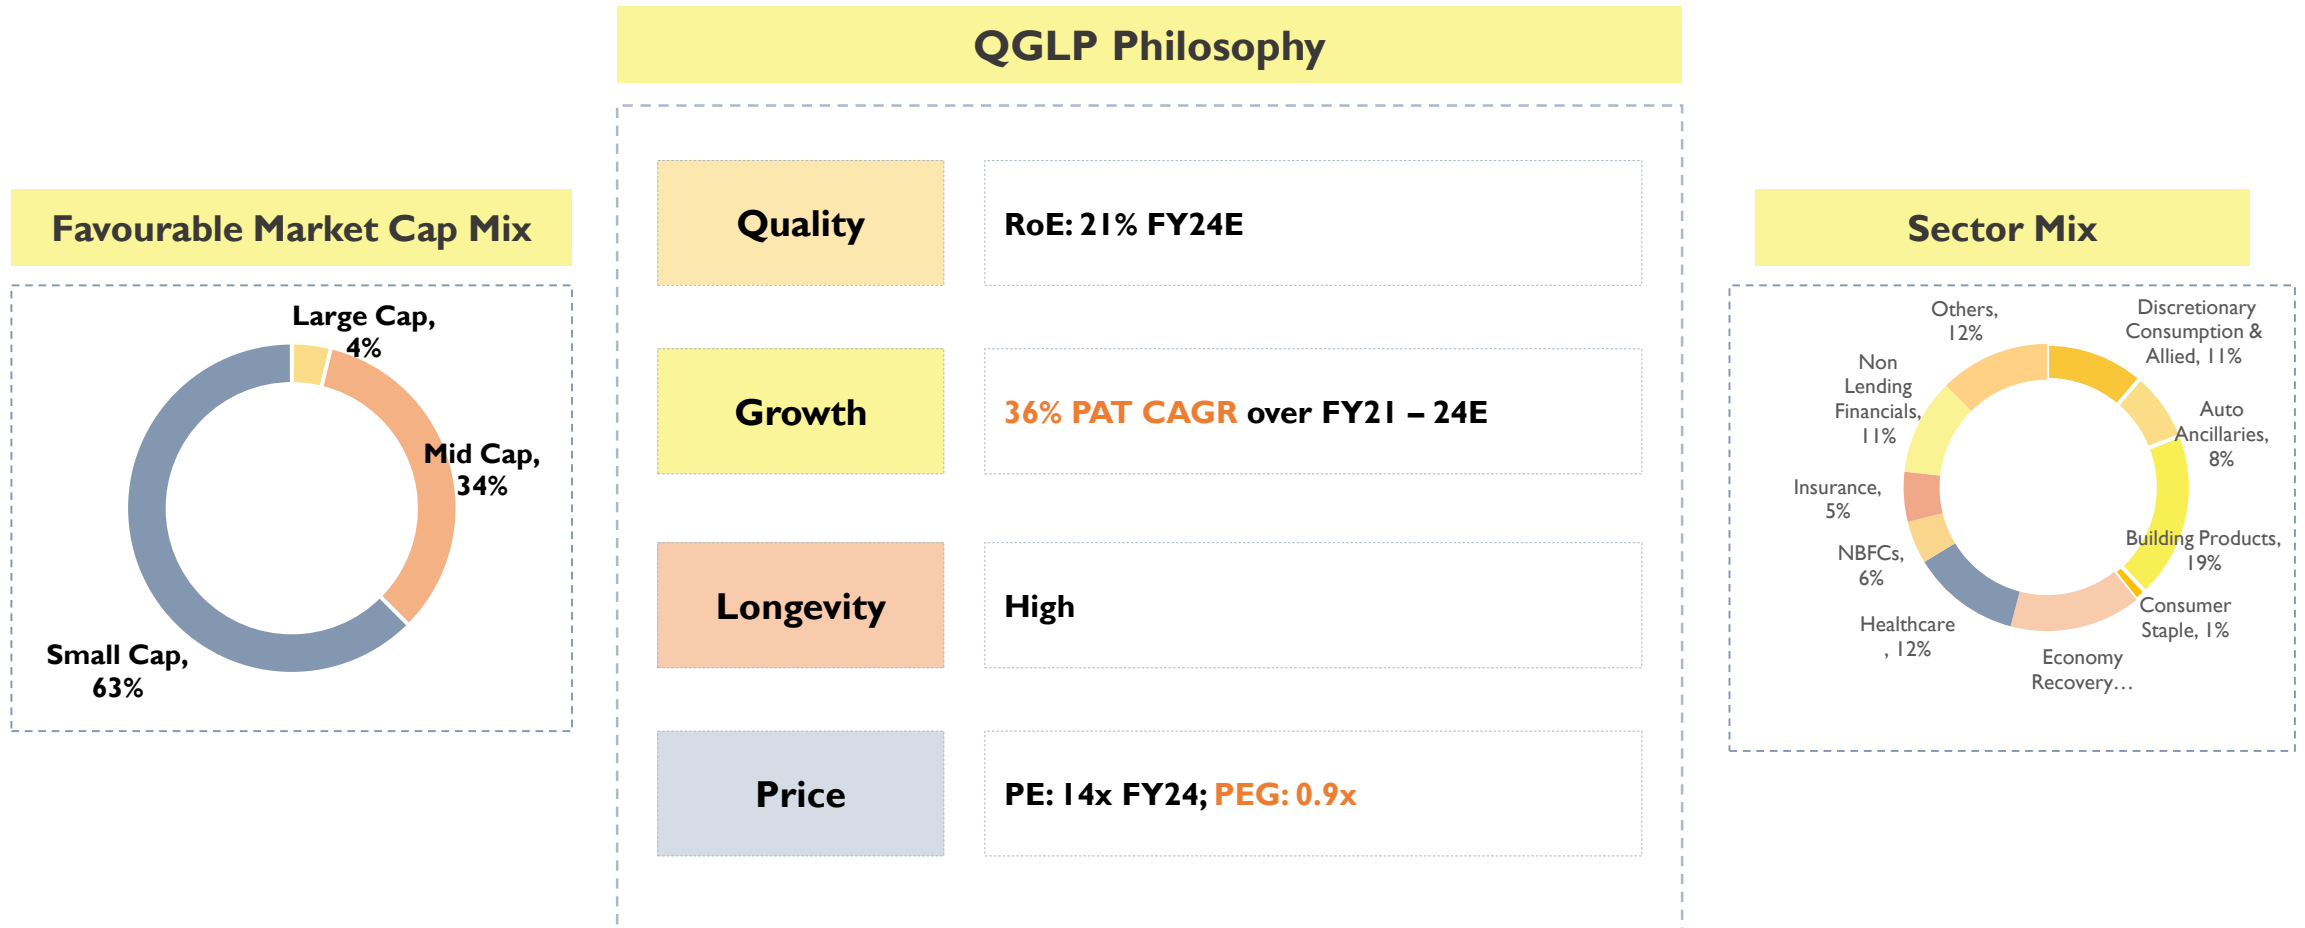

- Many businesses in India offer huge growth potential
- Small caps, given their size, have a long runway for growth
- The full benefit of this is reaped by those investors who hold for the long term
- The key – high quality of management

Source: MOAMC Internal Research, Data as on 31.1.2020

# Historically Low PEG : Earnings Growth and Valuations in a Sweet Spot

Disclaimer: The Stocks mentioned above are used to explain the concept and is for illustration purpose only and should not be used for development or implementation of any investment strategy. It should not be construed as investment advice to any party. The stocks may or may not be part of our portfolio/strategy/ schemes. Past performance may or may not be sustained in future

# Low PEG : WCS23 'Valuation Insights' - Evidence Suggests It's the Best Time to Buy

PEG is short for P/E to Growth ratio : TTM P/E divided by 3 yrs forward earnings growth

PEG- What Works & What Doesn't		
PEG	Average 3Yr Alpha	Instances from 1998-2015
0-1	19%	33%
3+	-10%	11%
< 0*	-19%	34%

\* A PEG lesser than zero implies PAT de-growth in the next 3 years

In the 23<sup>rd</sup> Annual Wealth Creation Study, we used the PEG Ratio with 3-years' forward earnings to study return outcomes.

The findings revealed that

- **Buying stocks at PEG less than 1x is supremely profitable**
- **On average, 1 of every 3 stocks is likely to trade at PEG of less than 1x**

## Low PEG : WCS23 ‘Valuation Insights’ - Evidence Suggests It’s the Best Time to Buy

Period 2013-18					
	1 yr	2 yr	3 yr	4 yr	5 yr
Sensex Return	19%	22%	10%	12%	12%
PEG < 1x Return	36%	61%	38%	45%	39%
<b>Alpha</b>	<b>17%</b>	<b>39%</b>	<b>28%</b>	<b>33%</b>	<b>27%</b>

- **Efficacy of PEG ratio is remarkable irrespective of the number of years of growth insight that investors may have.**
- Thus, PEG of less than 1x works for growth forecasts of 1, 2, 3, 4 or 5 years!
- **PEG of 1x delivered handsome alpha in 14 out of 15 observations (barring GFC led fall in 08)**

# Key Portfolio Stocks

## CENTRAL DEPOSITORY SERVICES (INDIA) LIMITED

### Strong Macro variables to support the Growth

Improving macro variables (demographics, per capita income), push towards financial inclusion, and shift in savings towards financial assets bodes well for capital market intermediaries

### Duopoly market with significant market share

The asset-light model, duopoly play on the secular increase in stockholder accounts coupled with potential market share gains is a major positive for this thinly covered stock

### Well poised for growth as a proxy play

As a proxy play on Indian capital markets, CDSL has several new revenue opportunities like (a) dematerialisation of unlisted public companies (d) transaction charges from new pledge/unpledged rules (c) commodity repository (d) Insurance repository business aids CDSL's topline growth

### Company to demand higher multiples

Empirical studies suggest that limited-entry sectors tend to trade at higher multiples as investors gauge greater confidence in revenue/earnings, and more importantly, multiples tend to expand when new entities are listed

||

**ICICI SECURITIES Ltd.****Industry tailwinds**

Strong post-Covid ADTO trend has extended in the 2QFY21 too. Over 3m demat accounts were opened in the past four months.

**Impact of regulations**

No impact on ISEC due to the new margin norms or share pledging norms that came into effect on 1st Sep'20

**MTF and ESOP funding book to grow**

Will grow the MTF and ESOP funding book from current levels of INR15b. Received shareholder approval for up to INR35b on the loan book currently, but this cap could be increased in the future.

**Revenue diversification**

Targeting to grow non-brokerage revenue from 40-42% to 50% of total revenue in a year or so

## MAX FINANCIALS

### Strong underlying insurance business

With best in class metrics (20%+ VNB Margins, 20% RoEVs) and growth track record (20%+ EV compounding).

### Axis Bank overhang on verge of resolution

Axis Bank emerging as the single largest shareholder with 18% stake, subject to regulatory approvals.

### Holdco structure to collapse

Expect Max Life shares to be listed in the next 12-18 months.

### Attractively valued

Max is at 15x EVOP v/s 35x for HDFC Life, despite business metrics and growth being quite similar.

IV

## GLAND PHARMA

### Unique Business Model

100% focus on injectable across different formats, High backward integration, No Front end and own pipeline of molecules :A win win for both partners and suppliers. High Longevity

### Favourable Economics

Injectables forms 40% share of the global Pharma market of ~USD 1tn, the demand for which is growing at 10% annually in USD terms globally and 13% annually in the US itself. Supply is unable to match the pace of demand

### Exemplary Financial and Operational Excellence

Zero US FDA notifications across its facilities over the last 2 decades reflects the culture of the firm and strong focus on quality parameters. This positions them to be a preferred supplier for their partners

# The portfolio manager invests with an eye on the future

Investors who invest in the good times and hold back in the bad times can never make above average returns.

**Small Cap stocks are a volatile and unpredictable lot...  
but provide an opportunity for upside**

**To earn super-normal returns with small cap stocks:**

- **Be patient**
- **Never exit looking at rear-view performance**
- **Double up at extremes if possible**

# Chairman – Investment Committee

---

**Raamdeo Agrawal**  
**Chairman, MOFSL**

- Raamdeo Agrawal is the Co-Founder of Motilal Oswal Financial Services Limited (MOFSL).
