TYPE AND CATEGORY OF SCHEME

Name of the Scheme	Motilal Oswal Equity Hybrid Fund (MOFEH)
Type of the Scheme	An open ended hybrid scheme investing predominantly in equity and equity related instruments
Category of Scheme	Aggressive Hybrid Fund

INVESTMENT OBJECTIVE

The investment objective is to generate equity linked returns by investing in a combined portfolio of equity and equity related instruments, debt, money market instruments and units issued by Real Estate Investment Trust (REITs) and Infrastructure Investment Trust (InvITs).

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ASSET ALLOCATION

The asset allocation pattern of the Scheme would be as follows:

Instruments	Allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High / Medium / Low
Equity and Equity related instruments	65	80	High
Debt, Money Market Instruments, G-Secs, Bonds, Debentures, Cash and Cash at call, etc.	20	35	Low to Medium
Units issued by REITs and InvITs	0	10	Medium to High

The Scheme retains the flexibility to invest across all the securities in the equity, debt and Money Markets Instruments as per investment objectives of the Scheme and as per the SEBI Regulations. The portfolio may hold cash depending on the market condition. Exposure by the Scheme in derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Fund shall not write options or purchase instruments with embedded written options. The Scheme will not participate in stock lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to stock lending for a single intermediary to the extent of 5% of the total net assets at the time of lending.

The Scheme may invest in units of REITs/InvITs to the extent mentioned in asset allocation and in line with, SEBI (Mutual Funds) (Amendment) Regulations, 2017.

The cumulative gross exposure through equity, debt, REITs and InvITs and derivative positions should not exceed 100% of the net assets of the scheme.

The Scheme shall not invest in Credit Default Swaps (CDS). The Scheme will not invest in foreign securities, securitized debt, corporate debt repo and corporate reverse repo. The Scheme shall not undertake short selling.

The Scheme shall invest in equity and equity related instruments, debt, money market instruments REITs and InvITs as per the investment objective of the scheme. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.

The Scheme may review the above pattern of investments based on views on Indian equities and asset liability management needs. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Subject to SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. These proportions may vary depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and for defensive considerations only. In case of deviation, if any, from the asset allocation pattern, the AMC shall rebalance the portfolio within a period of 30 calendar days. Where the portfolio is not rebalanced within 30 calendar days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

INVESTMENT STRATEGY

The investment objective is to generate equity linked returns by investing in a combined portfolio of equity and equity related instruments including derivatives, Debt instruments, money market instruments, REITs and InvITs.

Equity Investment: The Fund shall follow an active investment style using bottom-up stock picking. The Fund managers shall identify and invest in shares of businesses run by high quality management & having sustainable and scalable business models. They shall invest in shares of high quality businesses having sustainable and scalable business models thus using QGLP (Quality, Growth, Longevity & Price) as the key evaluation parameters. The businesses should have strong earnings growth prospects and be available at reasonable valuations.

The Fund Portfolio shall comprise of high conviction stock ideas from across market-capitalization levels/sectors. The portfolio stocks may be potentially concentrated in a few market capitalization levels/sectors which are expected to do well and have lower downside risk

Debt and Money Market: The Fund shall invest in Debt Instruments including Government Securities, Corporate Debt, Other debt instruments and Money Market Instruments with average maturity less than equal to 12 months to protect the portfolio downside during market downturn.

Investments in Derivative Instruments

The Scheme may invest in various derivative instruments which are permissible under the applicable Regulations and shall also be subject to the investment objective and strategy of the Scheme and the internal

limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index).

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities, and equities.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on stock exchanges whereas OTC derivative transactions are generally structured between two counterparties.

The risks associated with derivatives are similar to those associated with equity investments. The additional risks could be on account of

- Illiquidity
- Potential mis - pricing of the Futures/Options
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates)
- Cost of hedge can be higher than adverse impact of market movements
- An exposure to derivatives in excess of the hedging requirements can lead to losses
- An exposure to derivatives can also limit the profits from a genuine investment transaction

Exchange traded derivative contracts in stocks and indices in India are currently cash settled at the time of maturity.

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives.

RISK PROFILE OF THE SCHEME

Mutual Fund units involve risks including the possible loss of principal. Please read Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme Specific Risk factors are summarized below:

- **Risks associated with investing in Equity and Equity related securities**
Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, should there be a subsequently decline in the value of the securities held in the Schemes portfolio. Also, the value of the Scheme's investments may be affected by interest rates, currency exchange rates, change in laws/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.

The Scheme may find itself invested in unlisted securities either by choice or due to external events or corporate actions. This may increase the risk of the portfolio as these unlisted securities are inherently

illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.

- **Asset Class Risk**

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

- **Selection Risk**

The risk that a security chosen will underperform the market for reasons that cannot be anticipated.

- **Concentration risk**

This is the risk arising from over exposure to few securities/issuers/sectors.

- **Interest Rate Risk**

Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

- **Credit Risk**

Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.

- **Reinvestment Risk**

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.

- **Liquidity or Marketability Risk**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

- **Right to Limit Redemptions**

The Trustee, in the general interest of the Unitholders of the Scheme offered under this SID and keeping in view of unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

- **Risks associated with investing in CBLO Segments**

The mutual fund is a member of securities and CBLO segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in CBLO segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

- **Risks associated with Investing in Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby

the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risk associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes securities lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

- **Trading through mutual fund trading platforms of BSE and/ or NSE**

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

- **Risk factors associated with Investments in REITs and InvITs:**

- a) **Price Risk**

The valuation of REIT/ InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/ InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event to insolvency or liquidation of any of the portfolio assets.

- b) **Market Risk**

REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/ Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.

- c) **Liquidity Risk**

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in

the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

d) Reinvestment Risk

Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

PLANS AND OPTIONS

The Scheme offers two Plans: Regular Plan and Direct Plan

Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

Each Plan offers Growth Option

(a) Growth Option:

Under this Option, dividend will not be declared. Income/profits received/earned on the Scheme’s corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV) of Units under this Option.

The AMC reserves the right to introduce/discontinue further Plans / Options as and when deemed fit.

DEFAULT PLAN

Investors subscribing Units under Direct Plan of a Scheme should indicate “Direct Plan” against the Scheme name in the application form. In case of a time lag between the amount of subscription being debited to the investor's bank account and the subsequent credit into the Scheme's bank account, the applicability of NAV for transactions where NAV is to be applied based on actual realization of funds by the Scheme, may be impacted. The AMC/its bankers/ its service providers would not be liable for any such delay/lag and consequent pricing of units.

Transaction through Stock Exchange:

With respect to investors who transact through the stock exchange, Applicable NAV shall be reckoned on the basis of the time stamping as evidenced by confirmation slip given by stock exchange mechanism.

METHODOLOGY AND ILLUSTRATION OF SALE AND REPURCHASE OF UNITS

a) Methodology of calculating sale price

The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives $10,000/10 = 1000$ units.

b) Methodology of calculating repurchase price of Units

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the "Applicable NAV" to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV *(1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 * (1-0.02) = Rs. 10 * (0.98) = Rs. 9.80.

IV. Motilal Oswal Value Index (MOVI) Pack Plan:

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal Ultra Short Term Fund (referred to as Transferor Scheme) to Motilal Oswal Focused 25 Fund (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

1. Motilal Oswal Value Index (MOVI) helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and Dividend Yield of the Nifty 50 Index.
2. A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

3. NSE Indices Limited is the calculating agent of NIFTY MOVI. NSE shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.
4. Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.
5. Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.
6. This Plan presently offers two enrolment options:
 - a. One Time Investment
 - b. Systematic Transfer Plan (STP) with a minimum of 6 installments.
7. Minimum amount under this Plan is as follows:

Options	Minimum Amount of Transfer (Rs.)
One Time Investment	Rs. 500/- and in multiples of Re. 1/- thereafter
STP	Rs. 500/- and in multiples of Re. 1/- thereafter

8. The date of allocation will be the 15th of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

Note: Under ‘One Time Investment’ enrolment option, in addition to the 15th of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

Under ‘STP’ enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15th of every month, then allocation for that amount will occur on 15th of the subsequent month.
9. On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.
10. The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.
11. The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.
12. Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.
13. This Plan will be automatically terminated if all units are liquidated or withdrawn or pledged or upon

receipt of intimation of death of the unit holder.

14. Unit holders should note that investor details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme. Units will be allotted under the same folio number.
15. Any change in methodology of MOVI would only be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund.
16. Given the two way movement of investments between funds, liquidity at times may be restricted by trading volumes, settlement periods, and inordinately large number of redemption requests or restructuring of the Scheme. This may impact the performance of the underlying scheme.
17. Investors may approach/consult their tax consultants in regard to the treatment of the transfer of units from the tax point of view.
18. Investors are required to refer to the terms and conditions mentioned in the enrolment form.
19. The Trustee/AMC reserves the right to change/modify the terms and conditions of the MOVI Pack Plan or withdraw this facility.

This facility will also be available for transfer into any other equity scheme of Motilal Oswal Mutual Fund that may be launched in future.
