**The portfolio is positioned across sectors, themes
and market capitalization...**

**...but the united across portfolio holdings in
the unique ability to benefit from a
competitive advantage for the years to come**

Key Themes

Theme I: Consolidation in the lending space

Top 5 banks command 46% market share in India, versus 80% as seen in countries globally

Top 5 banks in India to consolidate market share

- The five bank concentration ratio in India stands at ~46% level; vs ~80% being the median for 30 large economies globally.
- We believe the top banks in India; especially the top 3-4 private banks are very well positioned today to consolidate market share.

Strong liability franchises

- A very strong liability franchise; and good underwriting discipline are the key tenets of sustainable compounding in a lending business.
- The banks we own in the fund are the ones which clearly lead on these metrics.

PSU to PVT value migration to continue

- PSU banks have structural shortcomings of a promoter whose interests are not aligned with minority shareholders, weak underwriting capabilities, being capital starved, etc.
- Hence, expect value migration from PSU to PVT to continue.

Attractive valuations

- Financial stocks were badly hit during the sell-off caused by COVID
- Unlike other sectors, stock prices for banks are yet to see a bounce-back
- Believe this is a temporary mispricing for larger, well run private banks with good liability franchises and underwriting capabilities.

Market Share in the Indian Banking System

- **Share of Private Banks has increased from 25% to 41% in the last decade**
- **FY30 private banks market share = 55% ???**

Source: Bloomberg and Internal MOAMC Research

The sector mentioned above are used to explain the concept and is for illustration purpose only and should not be used for development or implementation of any investment strategy. It should not be construed as investment advice to any party. The stocks may or may not be part of our portfolio/strategy/ schemes. Past performance may or may not be sustained in future

Theme 2: Supply side Consolidation: Survivors in a tough cycle = eventual winners

Distinctive and durable market leaders likely to benefit despite short term headwinds

India's growth potential remains intact

- India despite facing multiple challenges over the years; has a track record of ~14% nominal GDP growth over the last 4 decades.
- We believe the basic building blocks to this long term growth remain intact; the pandemic should be a passing event.

Economic environment to accelerate consolidation

- Every downturn tests the survival of the fittest.
- Weak players in an industry suffer the most (especially the unorganized; and players with weak balance sheets).
- Consequently, in the recovery that ensues; the strong get stronger.

Focus on market leaders

- Accelerated formalization of the economy to benefit market leaders
- High stress economic environments necessitate that the strongest will be able to not just survive, but thrive.

Look beyond the short term

- Template for multi-baggers; vision to see, courage to buy and patience to hold
- Patience is the rarest of the three attributes. We believe; today as we're still in the middle of the pandemic; our patience is being tested.
- However, as the dust settles; we believe we will be well rewarded for our patience.

Theme 3: Consumer Discretionary – Long Runway for Growth

Evolution of the household-income profile in India

High Income & Upper Middle Segment

- 1 in 4 households today
- 1 in 2 households by 2030

Note: Low income: <\$4,000, Lower-mid: \$4,000-8,500, Upper-mid: \$8,500-40,000, High income: >\$40,000 basis income per household in real terms;
