

Aashish P Somaiyaa
MD & CEO

FACTSHEET

As on 31st March 2020

Dear Investors and my dear advisor friends;

I have been writing to you practically every once in 2 to 3 months since many years now. Whatever I write is presented as the CEO speak in our PMS and Mutual Fund newsletters. All my articles or letters to you and even some of my well-received newspaper and media articles are reproduced on our website under my blog:

<https://www.motilaloswalmf.com/blogs/ceo>

Usually whatever I write emerges from my meetings with clients and intermediaries. And this is mostly related to my observations about trends, economy, markets and most importantly investor's feelings and behaviours at a point in time.

There are some months in between when I don't write and our product and communications team, visibly agitated with me reproduces previous months article on the front page of our PMS and Mutual Fund newsletters. That's because in some of these months I tell them I haven't come across much new, please just reproduce the previous one. There are two advantages to this:

- 1) I write from my heart what I gather after my interactions and what I think needs perspective or discussions. No one suggests a topic to me, no one shadow writes for me and I am not forced to cook up something. We only present views and I am not forced to give you news.
- 2) I know for a fact that many people don't read at all. Which means if I write new content every month, in any case a lot of people anyway read it once in a while so if I sincerely wish that people read what I write, there is benefit in repeating it two-three times.

The flip-side is that some people who follow what I write, get irritated to see content being reshaped. I apologise to them, but I invite them to follow my blog on the website, because that has few more content pieces than just the PMS Communique or MF FactSheet.

Coming to my thoughts right now.

You must be hearing a lot of perspectives from various quarters and you must be getting a lot of information so I don't want to labour you with more. I will keep this down to a few brief points.

- 1) First things first, if you do not want to or do not feel like investing at this juncture, it's perfect. Do what you are comfortable with. Keep liquidity, let the situations evolve.
 - a) But, DO NOT REDEEM.
 - b) You will regret it, and that day will not be in a few years, it will be few months or few quarters down the line.
- 2) Your willingness to believe investment professionals like me will be low right now. That's because 2018 and 2019 was not a great scenario if you were a small and / or midcap investor and no returns were made. Lack of belief is natural but your current level of belief unfortunately has no correlation with your future returns – if at all, it is likely to be inversely correlated.
 - a) We have been telling you all along what is written in point no. 1 above.
 - b) We had just about begun to see a sharp recovery and run up from Sep 2019 till mid Feb 2020. Basis strong efforts from the Government and the RBI (tax cuts, rate cuts, huge liquidity - expansionary fiscal policy, monetary and credit policy) and early economic indicators there was a belief that our economy was in process of bottoming out

“First things first, if you do not want to or do not feel like investing at this juncture, it's perfect. Do what you are comfortable with. Keep liquidity, let the situations evolve.”

“High quality stocks across small cap, mid cap and large cap; everything is available on a fire sale.”

“There is the coronavirus which is clearly the unknown variable which is causing the fear and the panic. So there is the human angle and related stress. But there is the economy – since we need social distancing to defeat the virus, we need to ensure economic activity comes to a stop for few days.”

- c) That’s when Covid-19 awareness hit world markets real hard and in the last 1 month we have been aping western markets.
- d) There is uncertainty about the fallout on India at the time of writing this but we need to be mindful of damage done to markets already in anticipation. We are already at 58% market cap to GDP as I write this.
- e) South Korea which has supposedly overcome the coronavirus is also 33% down YTD in USD terms, that’s equal to Nifty 50. This is not about India.
- 3) High quality stocks across small cap, mid cap and large cap; everything is available on a fire sale.
 - a) Somewhere some monkeys have decided to throw their caps (not without a reason), so all monkeys are throwing their caps (without understanding all the reasons). Please take your notes on which caps you like, don’t participate in the circus.
 - b) We all have seen this act in 2003, 2008, 2013, we are seeing it again. I don’t mean to belittle the situation, it is concerning but I am only saying it has happened in past. May 2006 which is not even counted as a landmark, was a month where midcap index fell 40%.
 - c) This is not the time to compare a good investment, a bad investment, what is right and what is wrong and whose cap was nice enough to keep and whose cap deserved to be thrown anyway. Pretty much everything is painted in the same brush; equity is bad right now - period.
 - d) Market has lost the ability to distinguish what is good and what is not good. Everything is falling, some a little more some a little less. But when market hits a point of deep panic, everything will fall as much.
- 4) There is the coronavirus which is clearly the unknown variable which is causing the fear and the panic. So there is the human angle and related stress. But there is the economy – since we need social distancing to defeat the virus, we need to ensure economic activity comes to a stop for few days.
 - a) The way central banks and Governments are behaving is two steps ahead.
 - b) It is now a well-known fact that for one or two quarters – different durations, different timelines in different geographies – the world will have very low growth.
 - c) It is also a well-known fact that the coronavirus infects fraction of population and it causes severe harm to an even smaller fraction; it is important to keep the fraction as minimal as possible which is why the world has to slow down. The percentages and the types of impact of the virus are in public media; I am not an expert so I will not venture in that area.
 - d) Suffice is to say, the world is right now grappling to assess the total impact of a stoppage of economic activity for some months.
 - e) Does this deserve a 30-40% decline in the total market capitalization of the world or 50-60% decline in market value of some of India’s best performing companies? We are basically saying that this stoppage of a quarter or two should mean that the current value of entire future earnings power of all companies globally will reduce by 30-40-50%. Think about that.
 - f) Usually, we have a bear case, a base call and a bull case. Here we seem to have only “world will come to an end” case and “world will not come to an end” case. Our judgement as investors is badly impacted right now; but I don’t think the choices on the table were as lucid or as clear ever.
 - g) The central bankers and Governments, know economies are going to be impacted, we will eventually come out of the panic of the virus, tacking that is a separate agenda but as and when that subsides, they do not want the economy to go into slumber for a long period of time. Which is why there are aggressive announcements on liquidity infusion, rate cuts and incentives for consumers. Even before this started our own Government and RBI in some form has been on an expansionary path.
 - h) The communication seems to be, when we get onto the other side of this medical hazard which we eventually will, we want to ensure things come back to normalcy and businesses and consumers face as low stress as possible.

“Never sell when / because foreigners are selling. They are selling for their own set of reasons. They are selling all over the world, they are not selling because India is a bad market.”

- 3) Never sell when / because foreigners are selling. They are selling for their own set of reasons. They are selling all over the world, they are not selling because India is a bad market.
 - h) I have seen this in 2008. They sold in 2008 and we panicked. In 2009 and 2010 after our markets fell and currency depreciated, they bought back everything and more. Till date we have not seen the kind of inflows that we saw in 2009 and 2010.
 - b) The data is below:

S No.	Year	Net Equity Inflows (USD bn)	Year Start Exchange Rate	Year-end Exchange Rate	Depreciation (+ve)
1	2008	-11.91	39.42	48.68	23%

If you choose to invest and take benefit of this fire sale, stagger your investments over the next 3 months. Do not look for new products, keep adding to whatever you are already invested in.

Thank you for your kind patronage and patience.

And finally everything is not about markets and investing. Stay safe. I wish you and your families the best of health and happiness at all times.

Yours Sincerely,

Aashish P. Somaiyaa
(MD & CEO – Motilal Oswal AMC)

“If you choose to invest and take benefit of this fire sale, stagger your investments over the next 3 months. Do not look for new products, keep adding to whatever you are already invested in.”

Motilal Oswal Focused 25 Fund (MOF25)

(An open ended equity scheme investing in maximum 25 stocks intending to focus on Large Cap stocks)

BUY RIGHT : SIT TIGHT

Buying quality companies and riding their growth cycle

At Motilal Oswal Asset Management Company (MOAMC), our investment philosophy and investing style is centered on 'Buy Right: Sit Tight' principle. 'Buy Right' means buying quality companies at a reasonable price and 'Sit Tight' means staying invested in them for a longer time to realise the full growth potential of the stocks.

It is a known fact that good quality companies are in business for decades but views about these companies change every year, every quarter, every month and sometimes every day! While many of you get the first part of identifying good quality stocks, most don't stay invested for a long enough time. The temptation to book profits at 25% or 50% or even 100% returns in a 1 to 3 year period is so natural that you miss out on the chance of generating substantial wealth that typically happens over the long term; say a 10 year period.

'Buy Right' Stocks Characteristics

QGLP

- **'Q'uality** denotes quality of the business and management
- **'G'rowth** denotes growth in earnings and sustained RoE
- **'L'ongevity** denotes longevity of the competitive advantage or economic moat of the business
- **'P'rice** denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

Sit Tight Approach

- **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- **Focus:** Our portfolios are high conviction portfolios with 25 to 30 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk

This Buy Right : Sit Tight philosophy manifests itself in all the products in our Portfolio Management and Equity Mutual Fund schemes
