MOTILAL OSWAL
ASSET MANAGEMENT

BUY RIGHT
SIT TIGHT

Motilal Oswal Asset Management Company (MOAMC) is one of India's fastest growing asset management companies.

With a focus on equity investing and equity investment expertise inherited from over 30 years of capital markets experience of our sponsors Motilal Oswal Financial Services Ltd., we have created a single investing philosophy be it Mutual Fund (MF) or Portfolio Management Services (PMS).

Like our investing philosophy, our product basket is also focused with concentrated 'buy and hold' PMS Strategies and Mutual Fund schemes in the Large Cap, Midcap and Multicap space respectively.

Our Value Strategy is one of the longest running products in PMS with a track record of 14 years. And our MF offerings come with unique features such as “Low Churn” and “Focused” portfolios.

With an investment management team of 21; we aim to be seen as an investment management house focused on wholesaling through marquee distribution platforms and strong relationships, backed by performance track record.

Note:

Pursuant to the scheme of amalgamation Motilal Oswal Securities Limited (MOSL) has been merged with Motilal Oswal Financial Services Limited (MOFSL) whereby all the assets and liabilities of MOSL including its business and investments have been transferred to MOFSL w.e.f. August 21, 2018.

BUY RIGHT SIT TIGHT

Our Investment Philosophy

At Motilal Oswal Asset Management Company (MOAMC), our investment philosophy is centered on two critical pillars of equity investing – 'Buy Right: Sit Tight'. 'Buy Right' means buying quality companies at a reasonable price and 'Sit Tight' means staying invested in them for a long time to realise the full growth potential of the stocks.

BUY RIGHT

How do we 'Buy Right' ?

Over the last 22 years, our chairman, Raamdeo Agrawal (one of India's foremost value investors) has been analyzing the Indian equity market to come up with investing insights in the form of the Annual Motilal Oswal Wealth Creation Study. The learnings from all these studies have helped us evolve a unique and focused investing process - 'QGLP'.

Every stock we buy in our Mutual Fund Schemes or PMS Strategies is based on our QGLP parameters.

for QUALITY

'Quality' denotes quality of the business and management

for GROWTH

'Growth' denotes growth in earnings and sustained RoE

for LONGEVITY

'Longevity' denotes longevity of the competitive advantage or economic moat of the business

for PRICE

'Price' denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

Performance of QGLP stocks

Here are a few more examples that show how QGLP stocks have fared in terms of compounded annual growth return (CAGR) over the last 20 years or since listing; whichever is later.

Company Name	CAGR %
Eicher Motors Ltd.	58.16
Kotak Mahindra Bank Ltd.	23.86
HDFC Bank Ltd.	23.21
Sun Pharma.Industries Ltd.	16.05
HDFC Ltd.	15.23

SIT TIGHT

How do we 'Sit Tight' ?

While Buying Right is all about following a process, Sitting Tight on a good buy requires Focus & Discipline.

Buy and Hold: We believe in focused stock portfolios and are strictly buy and hold investors and believe that while picking the right business needs skill; holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.

Focus: Our portfolios are high conviction portfolios with 20 to 25 stocks being our ideal number. We believe in adequate diversification as over-diversification results in diluting returns for our investors and adding market risk.

Buy & Hold

If you had invested ₹ 100 in the Sensex in 1979, your investment would have multiplied to ₹ 3,188 with dividend and to ₹ 1,770 without dividend.

Source: Bloomberg | Data as on September 30, 2018

The graph above is used to explain the concept and is for illustration purpose only and should not be used for development or implementation of an investment strategy. It should not be construed as investment advice to any party. The above figures are inflation adjusted.

Focused Portfolio

Diversification beyond your control becomes unmanageable and adds no value to your portfolio. Over diversification can impact the overall performance of your portfolio. As in case of most portfolios, the top 5 good quality stocks contribute 80% of overall performance of your portfolio while the rest 20% is contributed by bad quality stocks.

Quality

"Great companies to invest are like wonderful castles, surrounded by deep, dangerous moats where the leader inside is an honest and decent person. Preferably, the castle gets its strength from the genius inside; the moat is permanent and acts as a powerful deterrent to those considering an attack; and inside, the leader makes gold but doesn't keep it all for himself."

$$Q = \text{Quality of business} \times \text{Quality of management}$$

There are two aspects to Q: (1) Quality of business and (2) Quality of management. The relationship between the two is multiplicative and not additive. Thus, if one of the aspects is zero, Q will be equal to zero, no matter how high the other.

Quality is a subjective concept, and yet there are several objective indicators of the same, as listed below:

Q INDICATORS

Quality of Business

- Large profit pool
- Economic Moat i.e. sustained competitive advantage reflected in return ratios (RoE, RoCE) higher than cost of capital and also those of peers
- Favourable competitive structure like monopoly or oligopoly
- Secular and stable business, preferably consumer facing
- Positive demand-supply situation

Quality of Management

- Competence
 - Sound business strategy
 - Excellence in execution
 - Rational dividend payout policy
- Integrity
 - Honest and transparent
 - Concern for all stakeholders
- Growth mindset
 - Long-range profit outlook
 - Efficient capital allocation, including growth by acquisitions

Growth

"Growth creates value only when it takes place within the limits of a strong and sustainable company franchise, and these are rare."

G = **Growth in earnings**

In investing, there are two dimensions of growth: (1) Earnings growth and (2) Valuation growth. The G of QGLP addresses earnings growth, whereas the P(rice) takes care of the Valuation growth.

Earnings growth by itself doesn't mean much. It adds value only when the company earns returns on capital higher than the cost of capital. Hence, growth is simply an amplifier: good when returns exceed the cost of capital, bad when returns are below the cost of capital, and neutral when returns equal the cost of capital.

In the final analysis, G (i.e. earnings growth in a company) is a quantitative reflection of Q (i.e. quality of business and management). G has four dimensions:

1. **Volume growth** - a function of demand growth matched by company's capacity to supply
2. **Price growth** - a function of company's pricing power, which in turn is a function of the competitive landscape
3. **Operating leverage** - a function of the company's operating cost structure. Higher the fixed cost, lower the unit cost incidence and higher the operating leverage
4. **Financial Leverage** - a function of capital structure. Higher the debt-equity, higher the financial leverage and vice versa

Longevity

"We like great companies with dominant positions, whose franchise is hard to duplicate and has tremendous staying power or some permanence to it."

L = Longevity of quality and growth

Having established the present quality and earnings growth of the company, the next challenge to investors is assessing how long it can sustain both. In the context of longevity, competence of management is tested at two levels:

- (1) Extending CAP (i.e. Competitive Advantage Period), and
- (2) Delaying growth slowdown.

Extending CAP: Competitive Advantage Period (CAP) is the time during which a company generates returns on investment that exceed its cost of capital. Competition eventually drives down returns to cost of capital, and sometimes even below it. However, a company with a great business and great management keeps extending its CAP, sustaining high return both for itself and its equity investors.

WACC is the Weighted Average Cost of Capital

Delaying growth slowdown: Competent managements can delay growth slowdown by

- (1) new streams of organic growth, and/or
- (2) inorganic growth via judicious acquisitions.

P

Price

"In the Bible, it says that love covers a multitude of sins. Well, in the investing field, price covers a multitude of mistakes. For human beings, there is no substitute for love. For investing there is no substitute for paying the right price – absolutely none."

P = Price (i.e. Favourable valuation)

Growth in stock price is a multiplicative function of growth in earnings and growth in valuation. The simplest way to improve the odds of valuation growth is by ensuring favourable purchase price.

The price of a stock has to be seen in conjunction with the value it offers. Price is what we pay; value is what we get. Therefore, stock prices are attractive only when they are less than the value perceived in the stock.

A simple rule of thumb of favourable purchase price is low P/E, preferably single-digit. However, in certain situations, low P/E may not be the sole determinant of favourable price e.g. during bottom-of-the-cycle, earnings of cyclical stocks are depressed leading to high P/Es; likewise, where companies are expected to turn from loss to profit, current P/E cannot be calculated.

Few other measures of favourable purchase price

- Discount to historical valuation bands – P/E, Price/Book
- PEG Ratio (i.e. P/E ÷ Earnings growth; the lower the better)
- Discount to DCF value (Discounted Cash Flow) or Replacement cost
- Low Payback ratio (i.e. Market cap / Expected profits of next 5 years)
- High dividend yield
- Absolute market cap relative to the size of opportunity

MUTUAL FUNDS

For whom: Our equity expertise can be accessed by individual investors with an approach to long term savings through our Mutual Fund products for as low as Rs. 500 through a systematic investment plan (SIP).

Benefits: Our Mutual Fund Schemes pass through a rigorous investment process with an aim to deliver consistent performance. Investments in the Schemes can also be conveniently done online. As an investment house, since we have only one investment philosophy, we aim to keep life simple for us and our investors by having a focused menu of equity funds – one large cap, one midcap, one multicap, one tax saver fund and one dynamic fund.

Our Funds

- **Motilal Oswal Focused 25 Fund (MOF25)**
Invests in enduring wealth creators
- **Motilal Oswal Midcap 30 Fund (MOF30)**
Invests in emerging wealth creators
- **Motilal Oswal Multicap 35 Fund (MOF35)**
Invests in emerging and enduring wealth creators
- **Motilal Oswal Long Term Equity Fund (MOFLTE)**
Lock in fund that invests in wealth creators plus saves tax
- **Motilal Oswal Dynamic Fund (MOFDYNAMIC)**
Invest in equity, derivatives, debt, money market instruments and units issued by REITs and InvITs.
- **Motilal Oswal Equity Hybrid Fund (MOFEH)**
Invests in equity and equity related instruments to generate returns by investing in a combined portfolio of equity debt resulting in less volatility.

Benefits of our Funds

Low Churn

Reap the full growth potential of stocks

Focused Portfolio

We do not buy more than 25-30 stocks, reducing the risk of diversification

PORTFOLIO MANAGEMENT SERVICES

For whom: Our PMS products are meant for financially savvy high net worth individuals (HNIs) who wish to utilise our expertise in building a portfolio of high quality companies or who have a large portfolio of stocks but lack the bandwidth to monitor them.

Benefits: With our Portfolio Management Services one can build an equity portfolio in the large cap and midcap segment with highly personalized service. Also, the 'Buy Right : Sit Tight' approach results in low churn in our portfolios and makes the costing of our Portfolio Management Services very attractive.

Our Strategies

- **Value Strategy**
Concentrated large cap portfolio with around 20 stocks
- **Next Trillion Dollar Opportunity Strategy**
Concentrated Diversified portfolio with around 25 stocks
- **India Opportunity Portfolio Strategy**
Concentrated Small & Mid cap portfolio with around 20 stocks
- **India Opportunity Portfolio V2 Strategy**
Concentrated Small & Mid cap portfolio with around 20 stocks

Benefits of our Strategies

Low Churn

Reap the full growth potential of stocks

Focused Portfolio

We do not buy more than 25-30 stocks, reducing the risk of diversification

High Brand Recall

Widely accepted and distributed product

Segregated Portfolio

Behavior of an investor won't impact the portfolio of other investors

Track Record

One of the longest running strategies in the industry with a 15+ years track record

Transparency

Transparency in portfolio holdings, transactions and expenses
