August 2021

What drives investment decision making?

- Rule based rationale or Biases?

Why is there a gap between market returns and investor returns?

#Bias I-Herding: Excuse me Excuse me – Please include me!

- Herding : it is more common than you think.
- You are included, rather unknowingly

#Bias 2 Recency Bias : The best get heavy with expectations

- “Be fearful when others are greedy and be greedy when others are fearful” - Warren Buffet
- We chase the best performer because other’s are doing it
- Best performer changes

Source: Bloomberg & MOAMC Internal Research

#Bias 3 Loss Aversion: Loss of the same magnitude hurts 3x times more

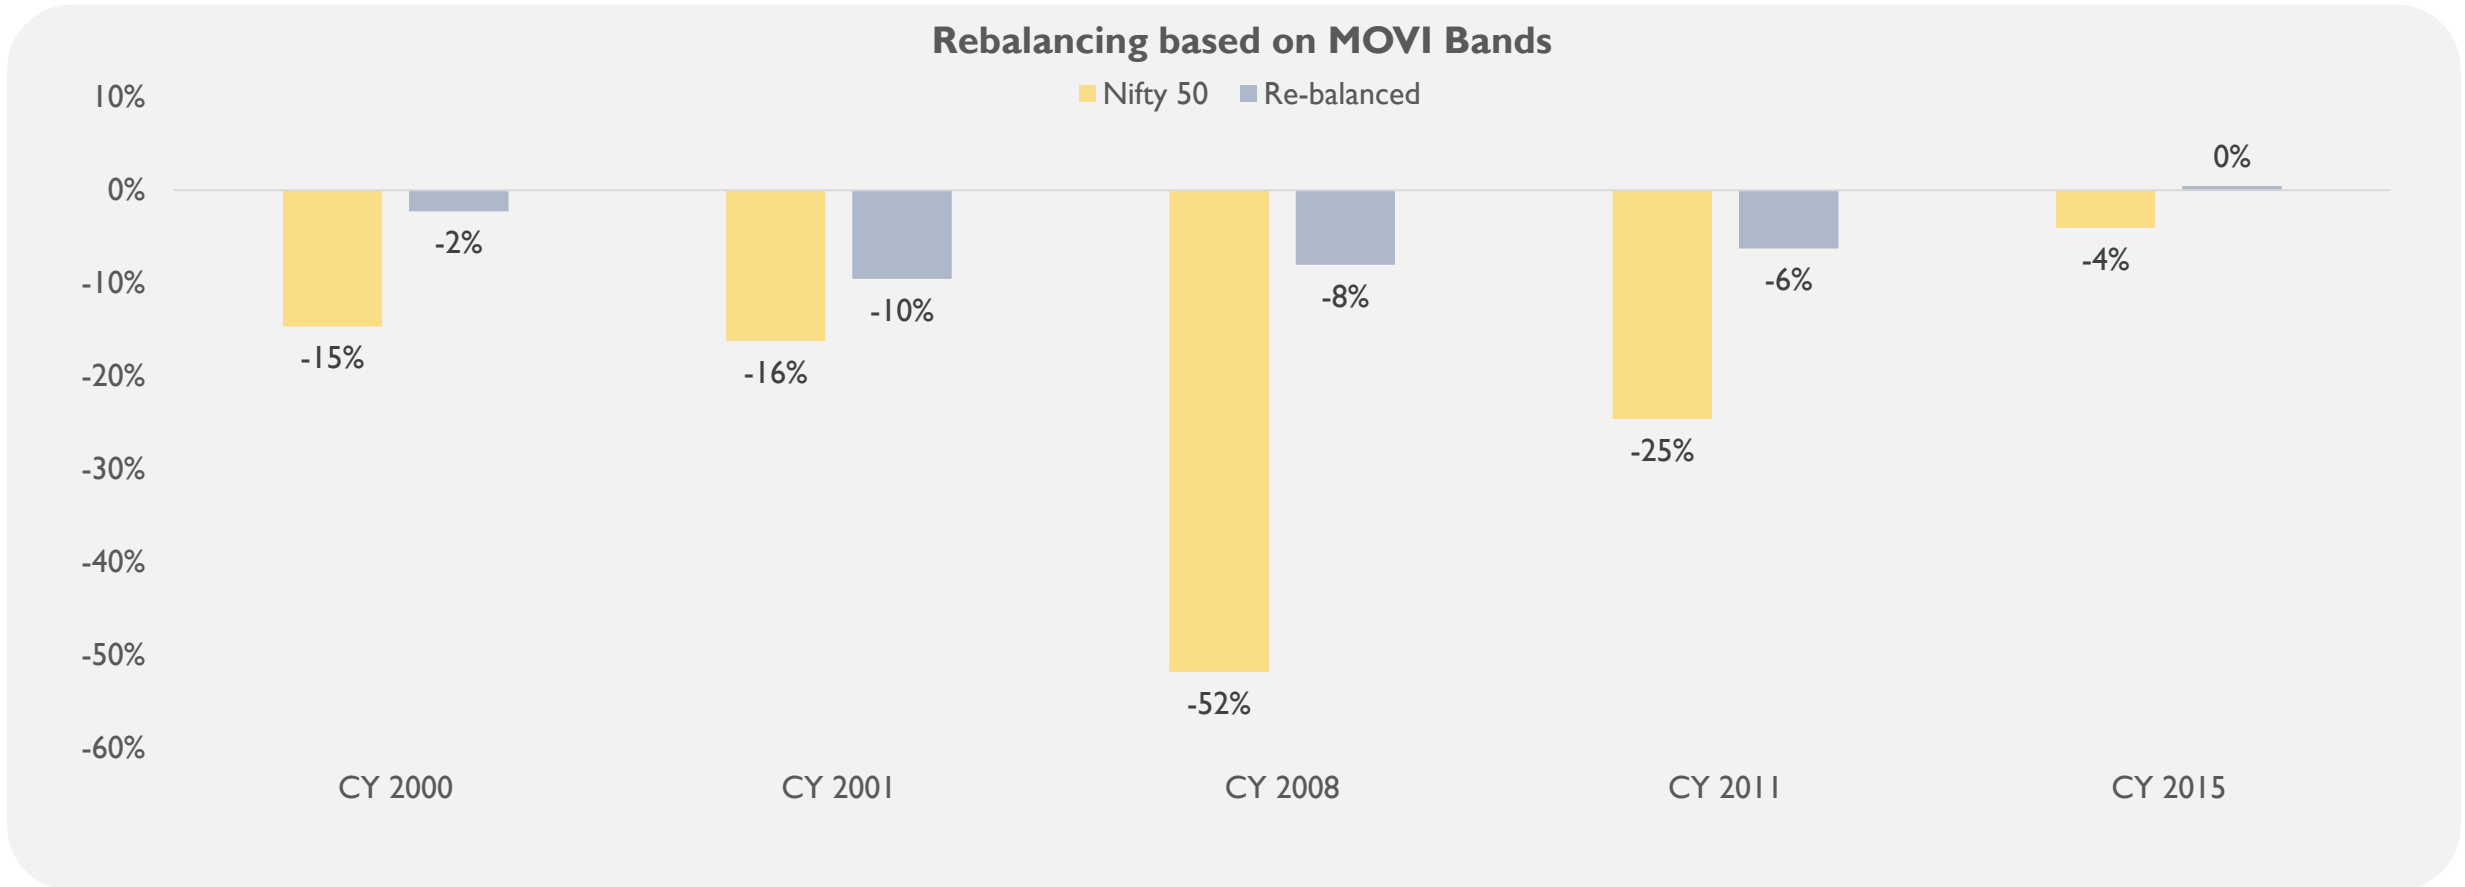

How a 20% Gain and 20% Loss Feels like

- **Loss hurts more than gains give happiness**
- **Investors fear drawdowns and not volatility**
- **However drawdowns can be managed**

Source: Bloomberg & MOAMC Internal Research

Losses / drawdowns balances can be managed – *Power of Re-balancing*

- Rebalancing protects downside and shields investors from sharp drawdowns
