| (BLUE) investors understand that their principal will be at low risk |
| (YELLOW) investors understand that their principal will be at medium risk |
| (BROWN) investors understand that their principal will be at high risk |
It’s an open secret that...

“Taxes grow without rains,”
It's a well known fact that the Government of India provides tax rebate under sec 80C of the Income Tax Act, 1961. Anybody investing upto Rs. 1,50,000 per year into a specified list of investment products is eligible for this amount to be reduced from their taxable income. The list of specified products includes various items like bank deposits, small savings schemes, equity linked saving schemes of mutual funds, bonds, etc. So basically the Government is telling you that it is important to plan for future and make right investments in that direction. In the process of course the nation benefits from long term investible surpluses which can then be ploughed into various long term funding requirements. If you do this right investment with a plan for your future, they are happy to forgo tax revenues to encourage you to do the right thing! There is only one catch, that such products have a lock-in ranging from three years to seven or eight or ten years depending on what product you pick; time horizon may vary but lock in is a must! Now we all know that if one has to necessarily lock-in money, we might as well lock it in to a product which has least lock-in with highest possible potential for return to take us closer to our goals.

Motilal Oswal AMC as always encourages its investors to BUY RIGHT : SIT TIGHT. What better than to get a tax benefit for doing just that – “BUY RIGHT : SIT TIGHT” with sec 80C tax benefits!

What is ELSS?

ELSS or Equity Linked Saving Schemes, are the Mutual Fund offerings that allow you to save taxes while giving you an opportunity to create wealth by investing into equities.
If you have risk bearing capacity, then ELSS is an ideal option.

ELSS are similar to diversified equity mutual funds.

Wealth creation potential of equity markets cannot be denied. However equities are known to be volatile and thus many investors stay away for the fear of losing money during downturns in the market.

ELSS offers long term investing with one of the shortest lock-in period amongst Tax Savings investment Avenues (mandatory 3 years of lock-in period).

The lock-in period ensures that short term market volatility is ignored and focus is only on the long term wealth creation.

You can invest into ELSS and deduct upto Rs. 1,50,000 from your taxable income to effectively reduce your tax liability under section 80C of Income Tax Act, 1961.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits. Further, Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein. Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.
Why ELSS?

Over 79% of the time, CNX 500 Index has delivered positive returns on 3 years rolling basis.

Historically, the hit and miss ratio has been 4:1 for generating positive returns considering 3 years of investments in CNX 500 Index at any given point in time.

### Load Structure

- Entry & Exit Load: Nil

### For Whom?

- For investors seeking potential growth of equities with the added advantage of tax savings under Section 80C of the Income Tax Act, 1961.
Our Investment Philosophy - ‘BUY RIGHT : SIT TIGHT’

A philosophy distilled from over 25 years of wealth creation expertise of Motilal Oswal Securities Ltd (Our Sponsor)

Buy Right Stock Characteristics

QGLP

- ‘Q’uality denotes quality of the business and management
- ‘G’rowth denotes growth in earnings and sustained RoE
- ‘L’ongevity denotes longevity of the competitive advantage or economic moat of the business
- ‘P’rice denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

Sit Tight Approach

- Buy and Hold: We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- Focus: Our portfolios are high conviction portfolios with 20 to 25 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk
Investment Process

A business we “understand”

Favorable “long term economics”

Margin of “safety”

Able and trustworthy “management”
The investment objective of the scheme is to generate long-term capital appreciation from a diversified portfolio of predominantly equity and equity related instruments. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

MOSt Focused Long Term would endeavour to construct such a portfolio that the product is best suited for medium and long term investment.

High conviction ideas with improved risk-adjusted return characteristics.

‘360 degree view’ of company to identify competitive advantages.
