INVESTMENT OBJECTIVE

The investment objective of the Scheme is to achieve long term capital appreciation by investing in a maximum of 30 quality mid-cap companies having long-term competitive advantages and potential for growth.

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ASSET ALLOCATION PATTERN

The asset allocation pattern of the Scheme would be as follows:

Instruments	Indicative Allocations (%of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Equity and equity related instruments* selected between Top 101 st and 200 th listed companies by market capitalization	65	100	High
Equity and equity related instruments* beyond the Top 200 th listed company and with market capitalization not lower than INR 600 crs	0	25	High
Debt, Money Market Instruments, G-Sec, Bonds, Cash and cash equivalents, etc.	0	10	Low

*subject to overall limit of 30 companies

Money Market Instruments include CMBs, T-Bills, and Government securities with an unexpired maturity upto one year, CBLOs & Repo/ Reverse Repo.

Exposure by the Scheme in derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Scheme will not participate in securities lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to securities lending for a single intermediary to the extent of 5% of the total net assets at the time of lending.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.

The scheme will not invest in Securitised debt, corporate debt repo and reverse repo and foreign securities. The scheme shall not undertake short selling.

The scheme shall invest in equity and equity related instruments as per the investment objective of the scheme. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.

INVESTMENT STRATEGY

The primary investment objective of the Scheme is to generate returns by investing in a portfolio of midcap equity and equity related instruments, money market instruments, cash and cash equivalents.

The Fund may also enter into securities lending or such other transactions, in accordance with the Regulations, as may be allowed to Mutual Funds from time to time.

The portfolio will essentially follow MOAMC's QGLP philosophy – i.e. invest in Quality businesses with reasonable Growth potential and with sufficient Longevity of that growth potential at a fair Price. The scheme shall follow an active investment style and will seek to invest in midcap companies with a strong competitive position or economic moat, good business prospects, run by a competent management that will help them achieve good growth over the medium to long term and available at reasonable valuations. The fund shall practice a focused, high-conviction portfolio strategy with a low-churn, buy and hold approach to investing. It will typically select companies from beyond the Top 100 listed entities on the Indian stock exchanges and companies with market capitalizations not lower than INR 600crs.

The long-term India growth story provides an excellent platform for small and mid-size businesses to unleash their growth potential and to emerge as large cap companies of the future. India has a plethora of mid-size listed companies and their number has only risen in recent years. We believe the midcap universe in India even today presents similar such investment opportunities from a medium to long term perspective. Besides, midcaps are typically found to be under-owned and under-researched and hence provide a large universe of exciting investment prospects.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.

The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- **Risks associated with investing in Equities**

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, should there be a subsequently decline in the value of the securities held in the Schemes portfolio. The Scheme may find itself invested in unlisted securities either by choice or due to external events or corporate actions. This may increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying

portfolio, economic and political developments, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.

- **Asset Class Risk**

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets.

- **Interest Rate Risk**

Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

- **Credit Risk**

Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.

- **Liquidity or Marketability Risk**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

- **Right to Limit Redemptions**

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

- **Risks associated with Investing in Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to

be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risk associated with securities lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes securities lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the 13 investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

PLANS AND OPTIONS

The Scheme offers two Plans: Regular Plan and Direct Plan

Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

There will be no separate portfolio for Direct Plan and Regular Plan. Further, both the options i.e. Growth and Dividend will have common portfolio under the Scheme.

Each Plan offers the following Options:

- (a) Growth Option
- (b) Dividend Option (with Payout and Re-investment facility)

Under Dividend Option, the Fund will endeavor to declare dividends from time to time depending on the availability of distributable surplus.

Dividend (Payout and Reinvestment) and Growth

Dividend Option-

Under this Option, the Trustee reserves the right to declare dividend under the Scheme depending on the net distributable surplus available under the Option. It should, however, be noted that actual declaration of dividends and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustees or any Committee authorised by them.

If Dividend payable under the dividend payout option is equal to or less than Rs. 500/-, then it would be compulsorily re-invested in the Option of the Scheme.

Growth Option-

All Income earned and realized profit in respect of a unit issued under that will continue to remain invested until repurchase and shall be deemed to have remained invested in the option itself which will be reflected in the NAV.

The AMC reserves the right to introduce/discontinue further Plans / Options as and when deemed fit.

Default Plan/Option:

Investors subscribing Units under Direct Plan of a Scheme should indicate “Direct Plan” against the Scheme name in the application form. Investors should also mention “Direct” in the ARN column of the application form. The table showing various scenarios for treatment of application under “Direct/Regular” Plan is as follows:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct
2	Not mentioned	Direct	Direct
3	Not mentioned	Regular	Direct
4	Mentioned	Direct	Direct
5	Direct	Not Mentioned	Direct
6	Direct	Regular	Direct
7	Mentioned	Regular	Regular
8	Mentioned	Not Mentioned	Regular

In cases of wrong/ invalid/ incomplete ARN code mentioned on the application form, the application will be processed under Regular Plan. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load, if applicable.

If the investor does not clearly specify the choice of option at the time of investing, it will be deemed that the investor has opted for Growth option and in case he does not specify payout/re-investment under Dividend option, it will be deemed to be dividend re-investment.

V. Motilal Oswal Value Index (MOVI) Pack Plan:

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal MOST Ultra Short Term Bond Fund (referred to as Transferor Scheme) to Motilal Oswal MOST Focused 25 Fund (MOST Focused 25), Motilal Oswal MOST Focused Midcap 30 Fund (MOST Focused Midcap 30), Motilal Oswal MOST Focused Multicap 35 Fund (MOST Focused Multicap 35) and Motilal Oswal MOST Focused Dynamic Equity Fund (MOST Focused Dynamic Equity), (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

1. Motilal Oswal Value Index (MOVI) helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and Dividend Yield of the Nifty 50 Index.

A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

2. India Index Services & Products Ltd. (IISL) is the calculating agent of NIFTY MOVI. IISL shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.

3. Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.

Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.

4. This Plan presently offers two enrolment options:
 - a. One Time Investment
 - b. Systematic Transfer Plan (STP) with a minimum of 6 installments.
5. Minimum amount under this Plan is as follows:

Options	Minimum Amount of Transfer (Rs.)
One Time Investment	Rs. 5000/- and in multiples of Re. 1/- thereafter
STP	Rs. 1000/- and in multiples of Re. 1/- thereafter

6. The date of allocation will be the 15th of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

Note: Under ‘One Time Investment’ enrolment option, in addition to the 15th of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

Under ‘STP’ enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15th of every month, then allocation for that amount will occur on 15th of the subsequent month.

7. On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.
8. The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.
9. The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.
10. Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.
11. This Plan will be automatically terminated if all units are liquidated or withdrawn or pledged or upon receipt of intimation of death of the unit holder.
12. Unit holders should note that investor details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme. Units will be allotted under the same folio number.

13. Any change in methodology of MOVI would only be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund.
14. Given the two way movement of investments between funds, liquidity at times may be restricted by trading volumes, settlement periods, and inordinately large number of redemption requests or restructuring of the Scheme. This may impact the performance of the underlying scheme.
15. Investors may approach/consult their tax consultants in regard to the treatment of the transfer of units from the tax point of view.
16. Investors are required to refer to the terms and conditions mentioned in the enrolment form.
17. The Trustee/AMC reserves the right to change/modify the terms and conditions of the MOVI Pack Plan or withdraw this facility.

This facility will also be available for transfer into any other equity scheme of Motilal Oswal Mutual Fund that may be launched in future.

Investment Strategy	<p>The primary investment objective of the Scheme is to generate returns by investing in a portfolio of midcap equity and equity related instruments, money market instruments, cash and cash equivalents. The Fund may also enter into securities lending or such other transactions, in accordance with the Regulations, as may be allowed to Mutual Funds from time to time.</p> <p>The portfolio will essentially follow MOAMC's QGLP philosophy - i.e. invest in Quality businesses with reasonable Growth potential and with sufficient Longevity of that growth potential at a fair Price. The scheme shall follow an active investment style and will seek to invest in midcap companies with a strong competitive position or economic moat, good business prospects, run by a competent management that will help them achieve good growth over the medium to long term and available at reasonable valuations. The fund shall practice a focused, high-conviction portfolio strategy with a low-churn, buy and hold approach to investing. It will typically select companies from beyond the Top 100 listed entities on the Indian stock exchanges and companies with market capitalization not lower than INR 600 crs.</p> <p>The long-term India growth story provides an excellent platform for small and mid-size businesses to unleash their growth potential and to emerge as large cap companies of the future. India has a plethora of mid-size listed companies and their number has only risen in recent years. We believe the midcap universe in India even today presents similar such investment opportunities from a medium to long term perspective. Besides, midcaps are typically found to be under-owned and under-researched and hence provide a large universe of exciting investment prospects.</p> <p>While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration.</p> <p>The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.</p>	<p>The primary investment objective of the Scheme is to generate returns by investing in a portfolio of midcap equity and equity related instruments, money market instruments, cash and cash equivalents. 6. Investment strategy:

The Scheme uses Motilal Oswal Value Index (MOVI) as an indicator for the asset allocation between Equities, Arbitrage, Derivatives strategies and Debt. The Asset Allocation is reviewed twice a month and rebalanced on every 15th of the month based on the MOVI levels. In this regard, it is proposed to make minor changes in the Investment Strategy of the Scheme to provide operational flexibility for the Fund to allocate as per MOVI defined levels and to align the scheme allocation table with the explanation already provided thereunder. With the constant change in market dynamics, change in MOVI levels and the nature of flows, the Fund needs to change the proportionate exposure based on MOVI levels which amounts to sharp drop in the equity allocation of the Fund and are unable to hold good stocks in the desired quantity in the Fund. For instance, if the MOVI level is in the range of 100 - 110 which means it falls under the range of 55% equity allocation. Therefore, the fund manager in the above case will take 55% net long only equity exposure and 10% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments. If the MOVI level reaches the range of 110 - 120, then the fund manager will have to sharply drop net long only equity exposure to 40% from 55%.

The proposed revision in the Investment Strategy of the Scheme is as follows:

Current Investment Strategy	Proposed Investment Strategy																		
In the Scheme, the core long only equity exposure shall be a minimum of 30% of the portfolio value. Long only equity exposure means exposure to equity shares alone without a corresponding equity derivative exposure.	No change																		
The Fund will use Motilal Oswal Value Index (MOVI) as an indicator for the asset allocation between Equities, Arbitrage, Derivatives strategies and Debt. The asset allocation shall be reviewed twice a month and the rebalancing will be conducted on 15 th of every month and a day prior to derivative expiry day on the Exchange (if the above days are a non-business day, the previous business day shall be considered for rebalancing). However, there may be additional rebalances at the discretion of the Fund manager. However the rebalancing will always be based on the MOVI levels.	No change																		
The MOVI helps gauge attractiveness of the equity market. The MOVI is calculated taking into account Price to Earnings (P/E), Price to Book (P/B) and Dividend Yield of the Nifty 50 Index. The MOVI is calculated on 30 Daily Moving Average of the above parameters. A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.	No change																		
The equity allocation based on the MOVI levels is as below:																			
<table border="1"> <thead> <tr> <th>MOVI Levels</th> <th>Equity Exposure</th> </tr> </thead> <tbody> <tr> <td>Less than 70</td> <td>100%</td> </tr> <tr> <td>70</td> <td><80</td> </tr> <tr> <td>80</td> <td><90</td> </tr> <tr> <td>90</td> <td><100</td> </tr> <tr> <td>100</td> <td><110</td> </tr> <tr> <td>110</td> <td><120</td> </tr> <tr> <td>120</td> <td><130</td> </tr> <tr> <td>130 or above</td> <td>0%</td> </tr> </tbody> </table>	MOVI Levels	Equity Exposure	Less than 70	100%	70	<80	80	<90	90	<100	100	<110	110	<120	120	<130	130 or above	0%	No change

IISL shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.	No change																		
Any change in methodology of MOVI would be construed as change in Investment Strategy and will be carried out by obtaining prior consent of the Board of Trustees of Motilal Oswal Trustee Company Limited, the Trustees to Motilal Oswal Mutual Fund. Hence, it will be construed as a change in fundamental attribute and accordingly, the relevant regulatory provisions will be applicable.	No change

The proposed revision in the Investment Strategy of the Scheme is as follows:

MOVI Levels	Equity Exposure as per MOVI	Net Equity (%)	Equity Arbitrage (%)	Debt Instruments (%)
Less than 70	100	100	0	0
70 <80	90	90 – 95	0	Upto 10
80 <90	80	80 – 85	0	Upto 20
90 <100	70	70 – 75	0	Upto 30
100 <110	55	55 – 60	5 – 35	Upto 35
110 <120	40	40 – 45	20 – 35	Upto 35
120 <130	25	30 – 40	25 – 35	Upto 35
130 or above	0	30 – 40	25 – 35	Upto 35

Scenario 1 - Let's assume the MOVI level is at 60 which means it falls in the range of 100% equity allocation. Therefore, the fund manager in the above case will take upto 100% long only equity exposure.

Scenario 1 - Let's assume the MOVI level is at 60 which means it falls in the range of 100% equity allocation. Therefore, the fund manager in the above case will take upto 100% long only equity exposure.

Scenario 2 - Let's assume the MOVI level is at 100 which means it falls in the range of 55% equity allocation. Therefore, the fund manager in the above case will take 55% long only equity exposure and minimum 10% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 2 - Let's assume the MOVI level is at 100 which means it falls in the range of 55% equity allocation. Therefore, the fund manager in the above case will take 55% to 60% long only equity exposure and minimum 5% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 3 - Let's assume the MOVI level is at 120 which means it falls in the range of 25% equity allocation. Therefore, the fund manager in the above case will take 30% long only equity exposure and minimum 35% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 3 - Let's assume the MOVI level is at 120 which means it falls in the range of 25% equity allocation. Therefore, the fund manager in the above case will take 30% to 40% long only equity exposure and minimum 25% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 4 - Let's assume the MOVI level is at 150 which means it falls in the range of 0% equity allocation. Therefore, the fund manager in the above case will take 30% long only equity exposure and minimum 35% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

Scenario 4 - Let's assume the MOVI level is at 150 which means it falls in the range of 0% equity allocation. Therefore, the fund manager in the above case will take 30% to 40% long only equity exposure and minimum 25% in arbitrage opportunity. The balance upto 35% will be invested in debt instruments.

In the periods where the MOVI levels indicates a 100% equity allocation, the exposure of the scheme in equity and equity related instruments will increase upto 100%. However, if the MOVI levels reflect high valuation, the Scheme will restrict its investment in equity to 30% and shall take arbitrage positions to the extent of 35% of the portfolio, therefore resulting into an equity category exposure of 65%. In such a scenario the balance will be invested into debt market instruments.

In the periods where the MOVI levels indicates a 100% equity allocation, the exposure of the scheme in equity and equity related instruments will increase upto 100%. However, if the MOVI levels reflect high valuation, the Scheme will restrict its investment in equity to 30% - 40% and shall take arbitrage positions to the extent of 25% - 35% of the portfolio, therefore resulting into an equity category exposure of 65%. In such a scenario the balance will be invested into debt market instruments.

While making investment decisions, besides other factors, the impact of the prevailing economic environment over the medium to long term prospects of the companies will also be taken into consideration. The AMC will endeavour to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.

Following applicable limits for investment in units of REITs/InvITs and risk factors shall be added in SIDs of Motilal Oswal MOST Focused 25 Fund, Motilal Oswal MOST Focused Midcap 30 Fund, Motilal Oswal MOST Ultra Short Term Bond Fund and Motilal Oswal MOST Focused Dynamic Equity Fund:

Applicable limits for investment in units of REITs/InvITs:

Apart from investment restrictions specified under Seventh schedule of Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, additional investment restriction shall be as follows:

- No Mutual Fund under all its scheme shall own more than 10% of units issued by a single issuer of REIT and InvITs
- At a single Mutual Fund scheme level:
 - not more than 10% of its NAV in the units of REIT and InvITs and
 - not more than 5% of its NAV in the units of REIT and InvITs issued by a single issuer.

Risk Factors Associated with Investments in REITs and InvITs:

- Risk of lower than expected distributions:** The distributions by the REIT or InvITs will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends on the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate primarily based on the below, amongst other things:
 - Success and economic viability of tenants and off-takers
 - Economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - Force majeure events related such as earthquakes, floods, etc. rendering the portfolio assets inoperable
 - Debt service requirements and other liabilities of the portfolio assets
 - Fluctuations in the working capital needs of the portfolio assets

- Ability of portfolio assets to borrow funds and access capital markets
- Changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- Amount and timing of capital expenditures on portfolio assets
- Insurance policies may not provide adequate protection against various risks associated with operations of the REIT/ InvITs such as fire, natural disasters, accidents, etc.
- Taxation and regulatory factors

- Price Risk:** The valuation of REIT/ InvITs units may fluctuate based on economic conditions, fluctuations in markets (e.g. Real estate) in which the REIT/ InvITs operates and resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events, etc. REITs and InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian Law in the event of insolvency or liquidation of any of the portfolio assets.
- Market Risk:** REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.
- Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

The aforementioned changes in the Designated Schemes amounts to change in the fundamental attribute of the respective Schemes as per Regulation 18(15A) of the SEBI (Mutual Funds) Regulations, 1996.
