TYPE AND CATEGORY OF SCHEME

Name of the Scheme	Motilal Oswal Nifty Next 50 Index Fund (MOFNEXT50)
Type of the Scheme	An open ended scheme replicating / tracking Nifty Next 50 Index.
Category of Scheme	Index Fund

INVESTMENT OBJECTIVE

The Scheme seeks investment return that corresponds to the performance of Nifty Next 50 Index subject to tracking error.

However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

ASSET ALLOCATION

The asset allocation pattern of the Scheme would be as follows:

Instruments	Allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High / Medium / Low
Equity and equity related securities covered by Nifty Next 50 Index	95	100	High
Debt, Money Market Instruments, G-Secs, Cash and Cash at call, etc.	0	5	Low to Medium

The Scheme may take an exposure to equity derivatives of constituents of the Underlying Index for short duration when securities of the Index are unavailable, insufficient or for rebalancing at the time of change in Index or in case of corporate actions or for hedging purposes, as permitted by SEBI/RBI. The Exposure to derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Fund shall not write options or purchase instruments with embedded written options. When constituent's securities of underlying Index are available again, derivative positions in these securities would be unwound.

Subject to the SEBI Regulations as applicable from time to time, the Scheme may, if the Trustees permit, participate in securities lending. The maximum exposure of the Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or up to such limits as may be specified by SEBI. The Scheme will not lend more than 75% of its corpus.

Change in Asset Allocation

Subject to the Regulations, the asset allocation pattern indicated above for the Scheme may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. In the event that the asset allocation of the Scheme should deviate from the ranges as noted in the asset allocation table above, then the portfolio of the Scheme will be rebalanced by the Fund Manager to the position indicated in the asset allocation table above. Such changes in the asset allocation will be for short term and defensive considerations. In case of deviation, if any, from the asset allocation pattern, the AMC shall rebalance the portfolio within a period of 7 calendar days. Where the portfolio is not rebalanced within 7 calendar days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

INVESTMENT STRATEGY

The Scheme follows a passive investment strategy and invests in stocks in a proportion that is as close as possible to the weightages of these stocks in the respective index. The AMC does not make any judgments about the investment merit of Nifty Next 50 Index nor will it attempt to apply any economic, financial or market analysis. This would be done by investing in almost all the stocks comprising the Nifty Next 50 Index in approximately the same weightage that they represent in Nifty Next 50 Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental collections /redemptions from the Scheme. The scheme would also invest in debt and money market instruments as stated in the asset allocation table. The Fund Manager may use Derivatives as may be permitted under the Regulations from time to time, for the purpose of hedging and portfolio balancing and to seek to achieve the investment objectives of the Scheme.

Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

The Scheme may lend securities from its portfolio in accordance with the Regulations. The AMC/Fund shall also adhere to guidelines issued under Securities Lending Scheme, 1997. Securities' lending shall enable the Scheme to earn income that may partially offset its expenses and thereby reduce the effect these expenses have on the Scheme's ability to provide investment returns. The Scheme will pay reasonable administrative and custodial fees in connection with the lending of securities. The Scheme may be exposed to the risk of loss should a borrower default on its obligation to return the borrowed securities. The Scheme share of income from the lending collateral will be included in the Scheme's gross income. The Fund will comply with the conditions for securities lending specified by SEBI Regulations and circulars. The maximum exposure of the Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or up to such limits as may be specified by SEBI. The Scheme will not lend more than 75% of its corpus.

Investment by AMC/Sponsor in the Scheme

In accordance with Regulation 28(4) of SEBI (Mutual Funds) (Amendment) Regulations, 2014 the Sponsor or AMC shall invest not less than 1 % of the amount raised in the NFO or fifty lakh rupees, whichever is less, in the growth option of the scheme and such investment shall not be redeemed unless the scheme is wound up.

In addition to investments as mandated under Regulation 28(4) of the Regulations as mentioned above, the AMC may invest in the Scheme during the NFO period as well as continuous offer period subject to the SEBI (MF) Regulations. The AMC shall not charge investment management fees on investment by the AMC in the Scheme.

Investment of Subscription Money

The Mutual Fund may deploy NFO proceeds in Tri-Party Repos before closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in Tri-Party Repos during the NFO period. The appreciation received from investment in Tri-Party Repos shall be passed on to investors. Further, in case the minimum subscription amount is not garnered by the Scheme during the NFO period, the interest earned upon investment of NFO proceeds in Tri-Party Repos shall be returned to investors, in proportion of their investments, along-with the refund of the subscription amount.

Portfolio Turnover

Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. The Scheme, being an open ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weightage as the securities have in the Underlying Index. However, it is not possible to invest as per the objective due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:-

1. Fees and expenses of the Scheme.
2. Cash balance held by the Scheme due to dividend received, subscriptions, redemption, etc.
3. Halt in trading on the stock exchange due to circuit filter rules.
4. Corporate actions
5. The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities shares.

6. Dividend payout.
7. Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.
8. Lack of Liquidity

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

RISK PROFILE OF THE SCHEME

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital market/debt market.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Motilal Oswal Nifty Next 50 Index Fund (MOFNEXT50) is the name of the Scheme and it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 100,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, return and/or its ability to meet its objectives.

- **Risks associated with investing in Equities**
 - a. Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
 - b. The Scheme would invest in the securities comprising the Underlying Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of

investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index. As such the Scheme is not actively managed but is passively managed.

c. **Risks of Total Return**

Dividends are assumed to be reinvested into the Nifty Next 50 Index after the ex-dividend date of the constituents. However in practice, the dividend is received with a lag. This can lead to some tracking error.

- **Market Risk**

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.

- **Concentration risk**

This is the risk arising from over exposure to few securities/issuers/sectors.

- **Passive Investments**

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

- **Right to Limit Redemptions**

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

- **Risk Factors relating to Portfolio Rebalancing**

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

- **Index Fund**

The Scheme being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Risks Associated with Debt & Money Market Instruments

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk**
Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- **Risks associated with Segregated portfolio:**
The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event/actual default at issuer level. Accordingly, Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. The Security comprised of segregated portfolio may not realise any value. Further, Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not

Draft KIM of Motilal Oswal Nifty Next 50 Index Fund (MOFNEXT50)

be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

- **Risks associated with investing in Tri-Party Repos Segments**

The mutual fund is a member of securities and Tri-Party Repos segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-Party Repos segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

- **Risks associated with Investing in Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Risks associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of

the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

- **Tracking Error Risk**

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.

- **Trading through mutual fund trading platforms of BSE and/ or NSE**

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Risk Control

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

PLANS AND OPTIONS

The Scheme offers two Plans: Regular Plan and Direct Plan

Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

Each Plan offers Growth Option

(a) Growth Option:

Under this Option, dividend will not be declared. Income/profits received/earned on the Scheme's corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV) of Units under this Option.

The AMC reserves the right to introduce/discontinue further Plans / Options as and when deemed fit.

DEFAULT PLAN/OPTION

Investors subscribing Units under Direct Plan of a Scheme should indicate "Direct Plan" against the Scheme name in the application form. Investors should also mention "Direct" in the ARN column of the application form. The table showing various scenarios for treatment of application under "Direct/Regular" Plan is as follows:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct
2	Not mentioned	Direct	Direct
3	Not mentioned	Regular	Direct
4	Mentioned	Direct	Direct
5	Direct	Not Mentioned	Direct
6	Direct	Regular	Direct
7	Mentioned	Regular	Regular
8	Mentioned	Not Mentioned	Regular

In cases of wrong/ invalid/ incomplete ARN code mentioned on the application form, the application will be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load, if applicable.

If the investor does not clearly specify the choice of option at the time of investing, it will be deemed that the investor has opted for Growth option and in case he does not specify payout/re-investment under Dividend option, it will be deemed to be dividend re-investment.

Transaction through Stock Exchange:

With respect to investors who transact through the stock exchange, Applicable NAV shall be reckoned on the basis of the time stamping as evidenced by confirmation slip given by stock exchange mechanism.

Methodology and illustration of sale and repurchase price of Units

a) Methodology of calculating sale price

The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives $10,000/10 = 1000$ units.

b) Methodology of calculating repurchase price of Units

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the "Applicable NAV" to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV \times (1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 \times (1-0.02) = Rs. 10 \times (0.98) = Rs. 9.80.
