Introducing Motilal Oswal Nifty 500 Fund

The multi-cap index is a well-diversified equity portfolio which encompasses the broad market. This is because it invests in stocks across market capitalizations (Large, Mid and Small cap) that take on the opportunities across market environments. The Fund is the only multi-cap index fund in India - with ~80% invested in large-cap stocks and the rest invested in mid-caps and small-caps.

This Fund will track/replicate the constituents of Nifty 500 Index with the same weightage, and the expense ratio charged is less than that of actively managed funds.

What are you waiting for? Invest Now.

THINK EQUITY
THINK MOTILAL OSWAL

This product is suitable for investors who are seeking*

- Return that corresponds generally to the performance of the Nifty 500 index, subject to tracking error

- Long term capital growth

Investors understand that their principal will be at Moderately High Risk

Riskometer

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully

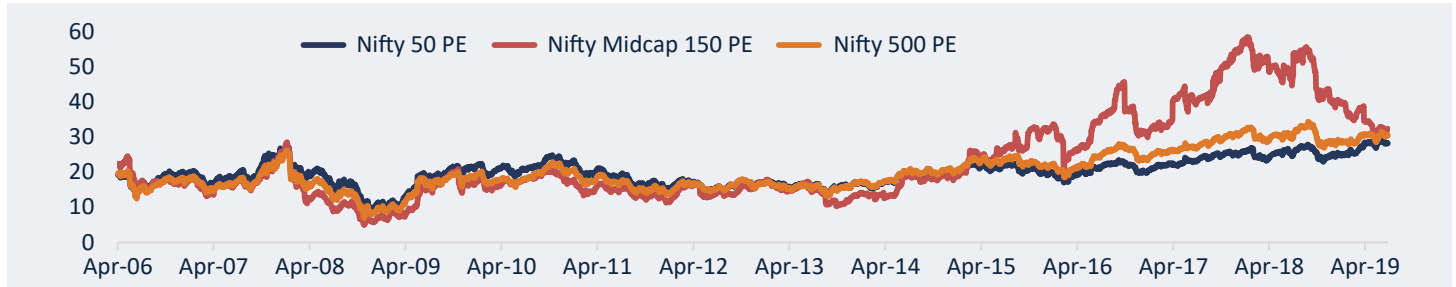

Why invest in an Index Fund?

- Retirement Funds are mandated to invest at least 5% of annual accretion in Equities. Many of them have opted Equity ETFs/Index Funds for equity investment.
- **Eliminates fund manager risk** and therefore the risk of underperforming the benchmark
- **Diversification** –Generally tracks broad based indices thus reducing the impact of decline in value of any one stock or industry, sector
- **Low Costs** –Since index funds are passively managed, cost are kept relatively low
- **Long-term** – Fund managers change the stocks frequently. An investor who is looking to invest for over 10 years+ is better suited for index funds

Valuation Comparison

- The above graph compares the valuation of three of the most popular indexes via PE (Price/Earnings) Ratio. A high PE Ratio means high valuations for the index.
- The graph shows a steep correction of mid-cap valuations over the last 12-18 months. Despite the sharp correction – Nifty 500 Index shows little movement.
- Thus - Nifty 500 Index can absorb risk of mid and small-cap stocks while giving better returns than Nifty 50 Index

Data as on 28th June 2019 Source: MOAMC Internal Research
