

# Gallop ahead with India Opportunity Portfolio V2

Aug 2018

- Why India and India's scope for long term growth
- Why Small and Midcap portfolio
- Opportunity in Mid and Smallcap segment
- Outperformance in Upcycles
- Themes of IOPV2
- Why Motilal Oswal Asset Management
- Wealth Creation Journey
- Success Stories

# Why India

- The Government of India has taken significant initiatives to strengthen the economic credentials of the country, to make it one of the strongest economies in the world.
- Indian companies are gaining a stronger foothold internationally and expanding their international presence by investing overseas.
- The country continues to urbanise at a strong pace driven by a combination of up trending consumption, robust job creation and growing financial penetration.

India is one of best performing EM (Emerging Markets) currency in 2017

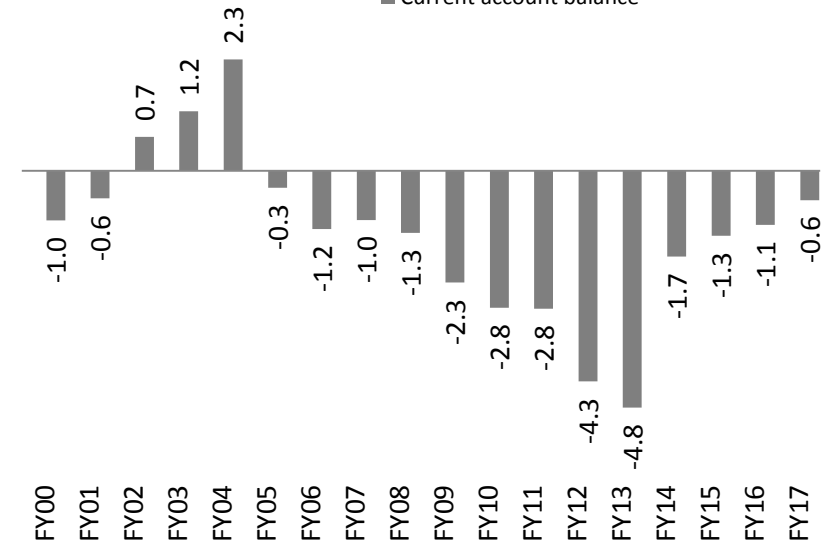

Improving Fiscal Deficit (% of GDP)

■ Fiscal deficit

Lower CAD (Current Account Deficit) over the Years (% of GDP)

■ Current account balance

# India stands out among Real GDP Growth

Real GDP Growth  
(% y/y)

- Emerging Markets continue to remain attractive on Real GDP growth differentials
- India stands out on the Emerging Markets pack on the back of strong fundamentals

# India Long Term Growth Trend

- Every 10 years, from FY1957 to FY2016, we see an upward shift in India's CAGR
- 10 Year average GDP growth has gone from 3.56 to 7.72
- We are now set to enter the next decade of a lift in growth

# Why India – Markets may deliver double digit Earnings Growth

In the long run, the markets always follow the earning pattern. For Nifty, FY17-20E the EPS growth stands at 17% CAGR, which shows the potential upside for the markets growth for 3 year period.

Mar-04	5591	83%	361	33%	Mar-17	29621	17%	1347	1%
Mar-05	6493	16%	446	24%					
Mar-06	11280	74%	540	21%	StdDev		31%		14%
Mar-07	13072	16%	720	33%	CAGR	11%		10%	

Source: Motilal Oswal Securities, MOAMC Internal Analysis | Data as on 31<sup>st</sup> March 2017

CAGR - is an investing specific term for the geometric progression ratio that provides a constant rate of return over the time period; Std Dev - a quantity expressing by how much the members of a group differ from the mean value for the group.

The information provided herein is for illustrative purpose only and should not be construed as an investment advice.; Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments; Mar-95 is taken as base year

- Over long periods of time equities do deliver in line with corporate earnings; but it's a known fact that the volatility in share prices is way higher than volatility of earnings themselves.
- This volatility in share prices results in emotional response of greed in rising markets and fear in falling markets. Mostly these responses are way more exaggerated on upside as well as downside.
- When evaluated in hindsight after the data plays out; one usually rues that responses were disproportionate to changes in corporate earnings.

# Why Small and Midcap Portfolio

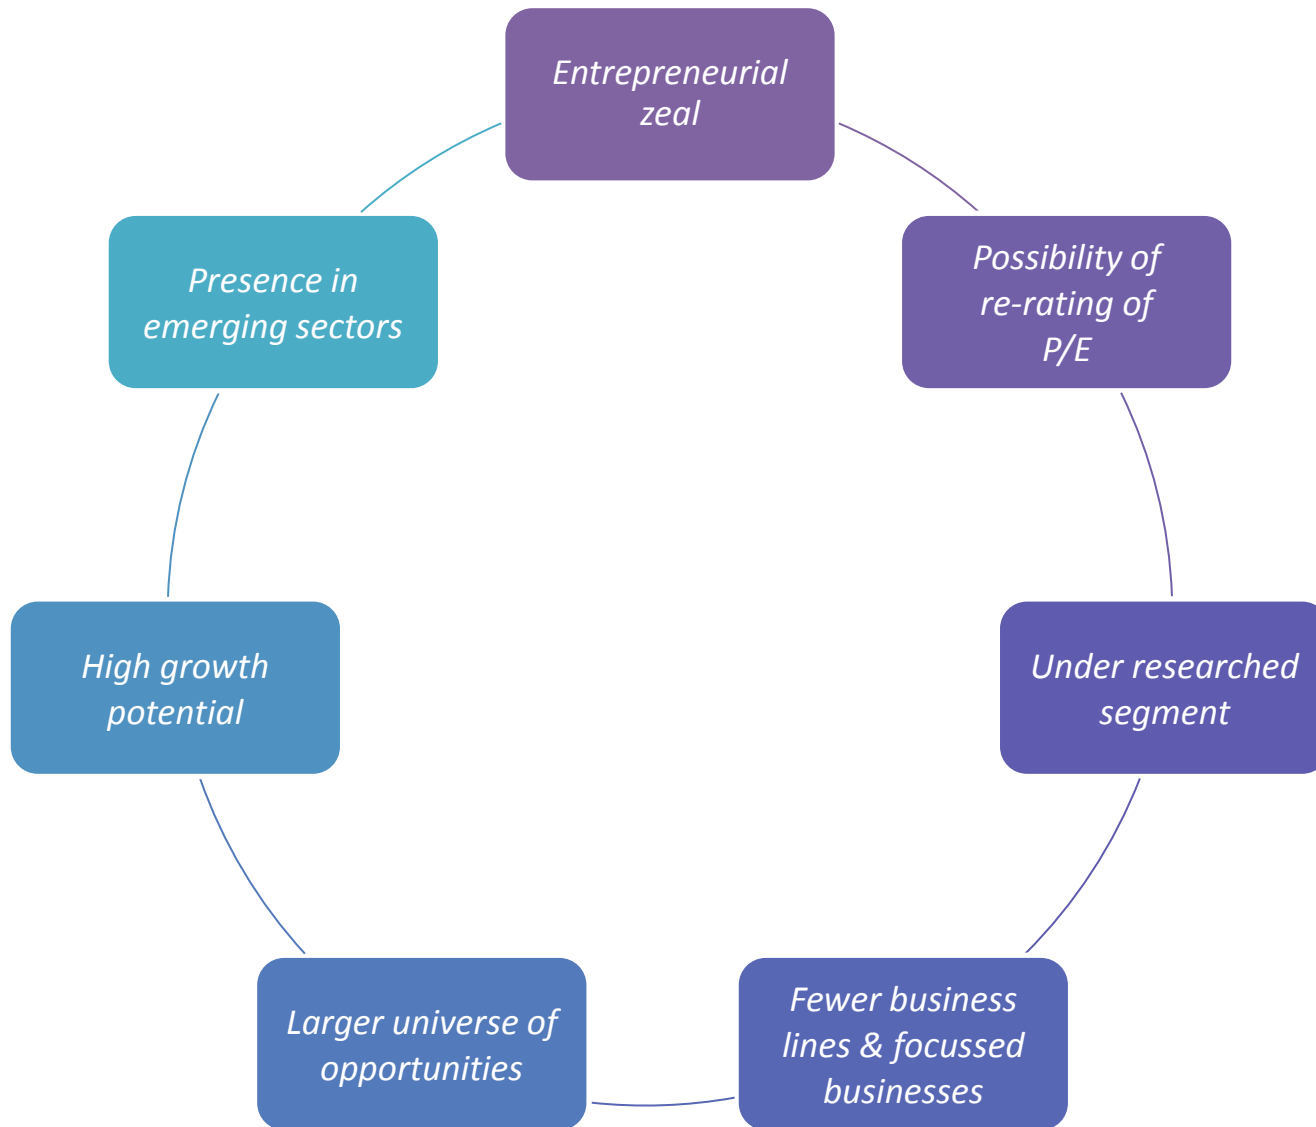

## Wealth creation happens when Small caps and Mid cap become Large cap

Exhibit 16 2011-16: Market cap crossovers: No. of companies and average returns

		FROM (in 2011)				
		Mini	Mid	Mega	New	Demerger
TO (in 2016)						
Mega		0	26	71	3	0
Avg Return			31%	8%		
Mid		67	88	25	19	1
Avg Return		39%	9%	-16%		
Mini		2,479	84	2	711	2
Avg Return		1%	-20%	-32%		
Delisted, Demerger, etc		397	2	2	2	-3
TOTAL		2,943	200	100	735	0
Avg Return		2%	0%	1%		

- While Large Caps give stability to the portfolio, only 71% of large cap companies remained in large cap category & delivered stable growth of 8%.
- Selective Opportunities lie in the Mid and Small Cap Space to deliver high growth rates. Hence Fund Manager needs to be choosy in stock selection. ~2.3% of small cap companies become mid cap companies & delivered 39% returns while 13% of mid cap companies become large cap companies & delivered 31% returns

Total stocks	1,908	200	100	

*Over a 5 year period maximum return is generated from companies crossing from (i) Mini to Mid /Mega and (ii) Mid to Mega*

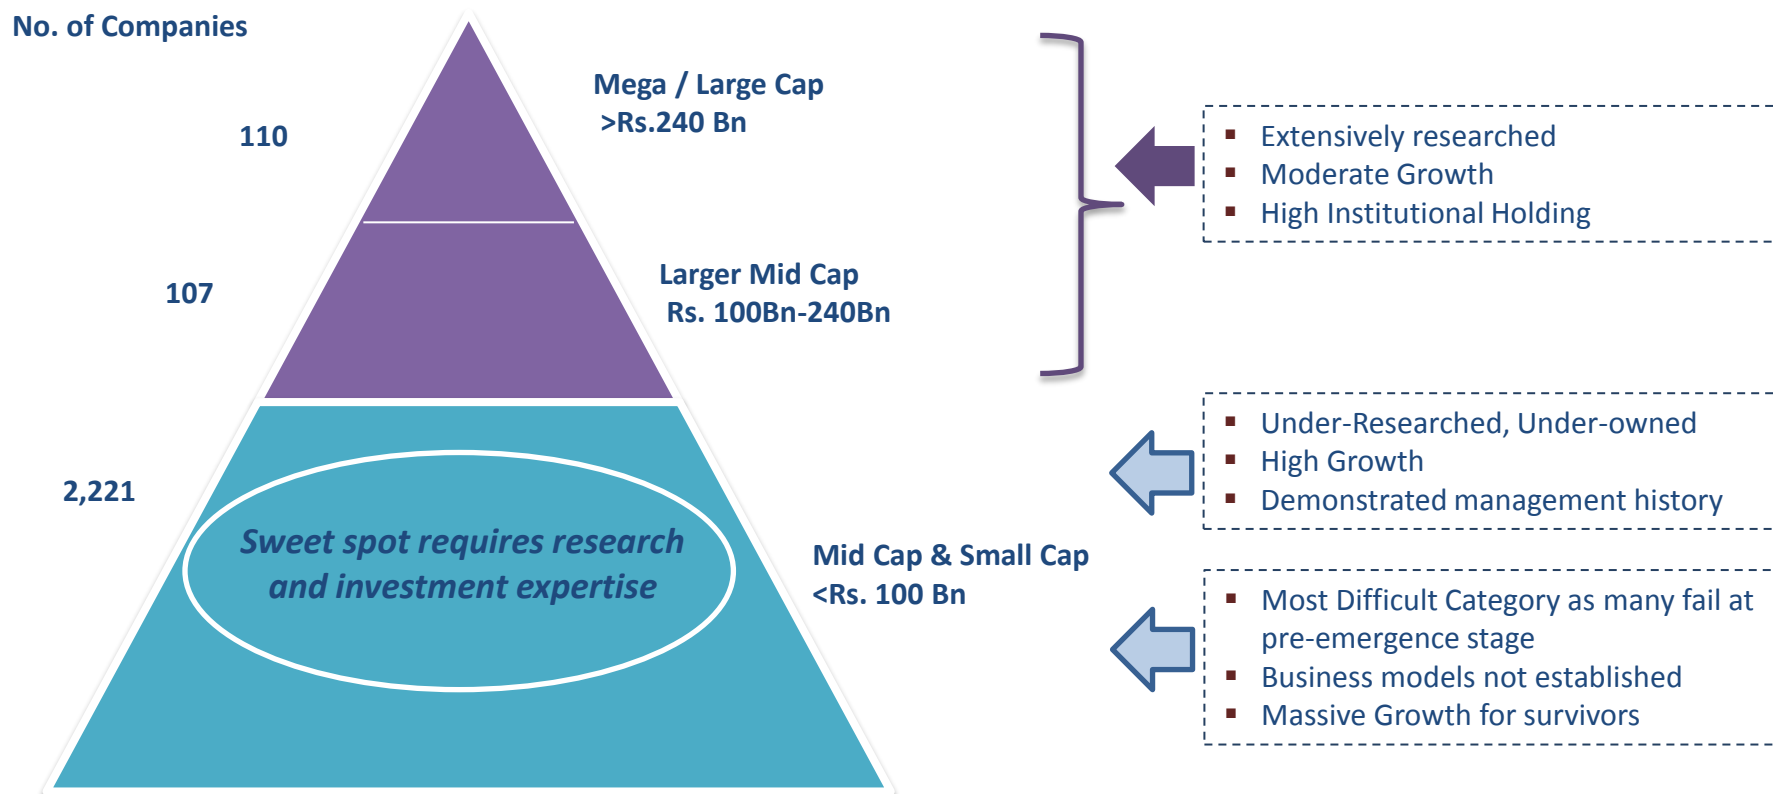

Return & Probability Matrix				
To	Mega	Highest returns Very low probability	Strong returns Low – medium probability	Market returns High probability
	Mid	Strong returns Low probability	Market returns High probability	Underperformance Medium probability
	Mini	Underperformance Very high probability	Underperformance Medium probability	Massive capital loss Low probability
		From		
		Mini	Mid	Mega

## What it takes to achieve Mid – to – Mega ?

- Identifying quality businesses with quality management
- Distinct value proposition that gives company an edge over its competition
- Avoid value traps

*Expertise in bottom up stock picking is the key to identify multibaggers*

# Targets a unique and relatively untapped opportunity

- The sweet spot of the Indian markets is replete with investment ideas in the midcap & small cap space
- Midcaps & smallcap offer excellent balance between strong growth and a demonstrable history of management success

by NBFCs and private  
sector banks from  
PSU banks

- ☞ Motilal Oswal Group possesses legacy in equities for over 3 decades
- ☞ Motilal Oswal AMC is chaired by Mr. Raamdeo Agrawal, one of the most honored and trusted names in the investing world
- ☞ One of the pioneers of PMS business with over 15 years of PMS track record
- ☞ Trusted by over 39,204 HNI investors and with over Rs. 16,136 Crs of AUM as on 31<sup>st</sup> July 2018.
- ☞ Presence across the length and breadth of India

## Basic Traits of our Investing Style

- ☞ We invest in companies with operating leverage than financial leverage
- ☞ We do not believe in “timing the market”, rather we believe in “spending time in market”
- ☞ We do not over diversify
- ☞ The businesses we invest, must have growth potential with economic moat
- ☞ We practise long term Buy and Hold investing style

# Our investment philosophy – ‘Buy Right : Sit Tight’

At Motilal Oswal Asset Management Company (MOAMC), our investment philosophy is centered on 'Buy Right: Sit Tight' principle.

## Buy Right

- **‘Q’uality** denotes quality of the business and management
- **‘G’rowth** denotes growth in earnings and sustained RoE
- **‘L’ongevity** denotes longevity of the competitive advantage or economic moat of the business
- **‘P’rice** denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

## Sit Tight

- **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- **Focus:** Our portfolios are high conviction portfolios with 25 to 30 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk

# Why 'Buy Right : Sit Tight' is significant?

Real wealth is created by riding out bulk of the growth curve of quality companies and not by trading in and out in response to buy, sell and hold recommendations.

This philosophy enables investor and manager alike to keep focus on the businesses they are holding rather than get distracted by movements in share prices.

An approach of buying high quality stocks and holding them for a long term wealth creation motive, results in drastic reduction of costs for the end investor.

While **BUY RIGHT** is largely the role of the portfolio manager, **SIT TIGHT** calls for involvement from the portfolio manager as well as investor. This brings in greater accountability from the manager and at the same time calls for better involvement and understanding from investor resulting in better education for the latter.

Long term multiplication of wealth is obtained only by holding on to the winners and deserting the losers.

## Strategy construct

- **No. of Stocks**
  - Around 25 stocks for a portfolio
- **Scrip Allocation**
  - Not more than 10% in a single stock when at the time of initiation
- **Sector Allocation Limit**
  - 35% in a sector
- **Strategy Objective**
  - It aims to deliver superior returns by participating in India Investment and consumption Growth Story
- **Strategy Focus**
  - Focus is on identifying well run companies that are existing/potential leaders in the field of operations
- **Investment Horizon**
  - Long Term (3 Years +)
- **For Whom**
  - Investors who like to invest with a Long-term wealth creation view

## Sector Allocations
