

IOP – Set to seize the opportunity

September 2021

Smallcaps offers a larger opportunity for Alpha generation

Smallcaps offer a larger opportunity for Alpha generation

- Wide dispersion of returns in both mid as well as small caps provides scope for bottom-up stock picking
- It is observed that the most Multibaggers were seen in the Midcap and Small cap space rather than Large caps due to dispersion

Returns range of Top 500 Companies by Market Cap (as on 31 st March 2020)			
Absolute Returns Range	Top 100	101 - 250	251 - 500
> 10x	1	8	8
5x- 10x	8	17	13
3x- 5x	15	22	21
2x- 3x	18	28	32
2x	11	20	34
Between 0 and 50%	18	16	45
Between 0 and -20%	13	9	19
Between -20% and -50%	11	19	42
Less than -50%	5	11	36

- Small Cap Index space on a whole is extremely dispersed with 108 stocks returns >100% and 36 stocks are <-50% and return distribution is across all the categories
- High dispersed portfolio returns are dominated by particular stock/sector
- Simple being present or absent in a few names - out of the highly dispersed stocks results in significant outperformance/underperformance of the portfolio

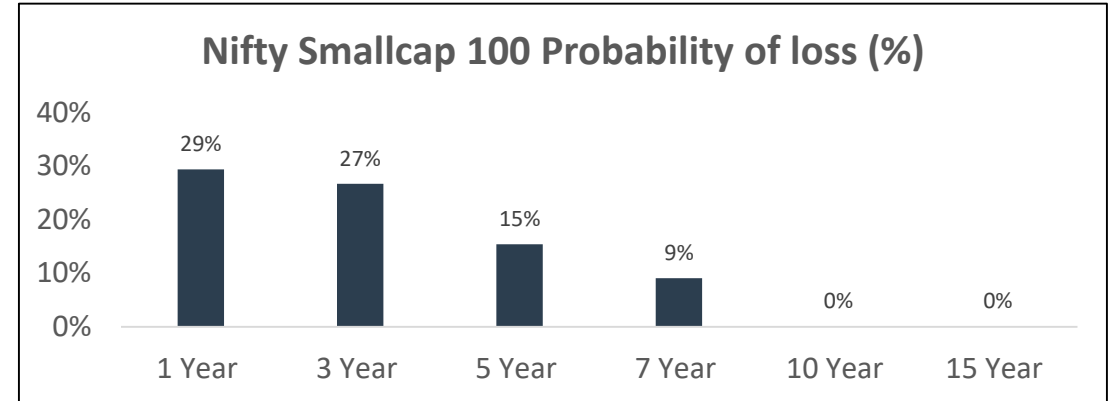

Source : Capitaline. Data as on 31st March 2020.

Absolute Returns from 31st March 2014 to 31st March 2020 considered for top 500 companies by market capitalization (as on 31st March 2020)

Disclaimer: Past performance may not be sustained in the future. Historical performance indications and financial market scenarios are not reliable indicators of current or future performance.

Nifty Small Cap 100 Rolling Historical Returns : Long Term Investing is Beneficial

Year	Close	1 Year	3 Year	5 Year	7 Year	10 Year	15 Year
2003	1000						
2004	1349	35%					
2005	2188	62%					
2006	3098	42%	46%				
2007	5801	87%	63%				
2008	1684	-71%	-8%	11%			
2009	3486	107%	4%	21%			
2010	4101	18%	-11%	13%	22%		
2011	2712	-34%	17%	-3%	10%		
2012	3710	37%	2%	-9%	8%		
2013	3403	-8%	-6%	15%	1%	13%	
2014	5273	55%	25%	9%	-1%	15%	
2015	5653	7%	15%	7%	19%	10%	
2016	5781	2%	19%	16%	7%	6%	
2017	9093	57%	20%	20%	12%	5%	
2018	6449	-29%	4%	14%	13%	14%	13%
2019	5835	-10%	0%	2%	7%	5%	10%
2020	7088	21%	-8%	5%	11%	6%	8%
Probability of loss		5/17	4/15	2/13	1/11	0/8	0/3
Probability of loss (%)		29%	27%	15%	9%	0%	0%
Average Return		22%	12%	9%	10%	9%	11%

Observations

- Similar to the Sensex, this small cap space finds the probability of loss being zero for 10 year time horizon
- But unlike Sensex, short term investment in Small cap space is riskier, thus Probability of loss for 1 year is 29% with min return being (71%)
- Based on the historical data, even this space, is beneficial with long term investing

Why now? - Expect smallcaps to bounce back with economic recovery

Large caps and mid caps have been outperforming smallcaps for 2 years now ...

Small caps have never seen two consecutive years of negative return before 2018

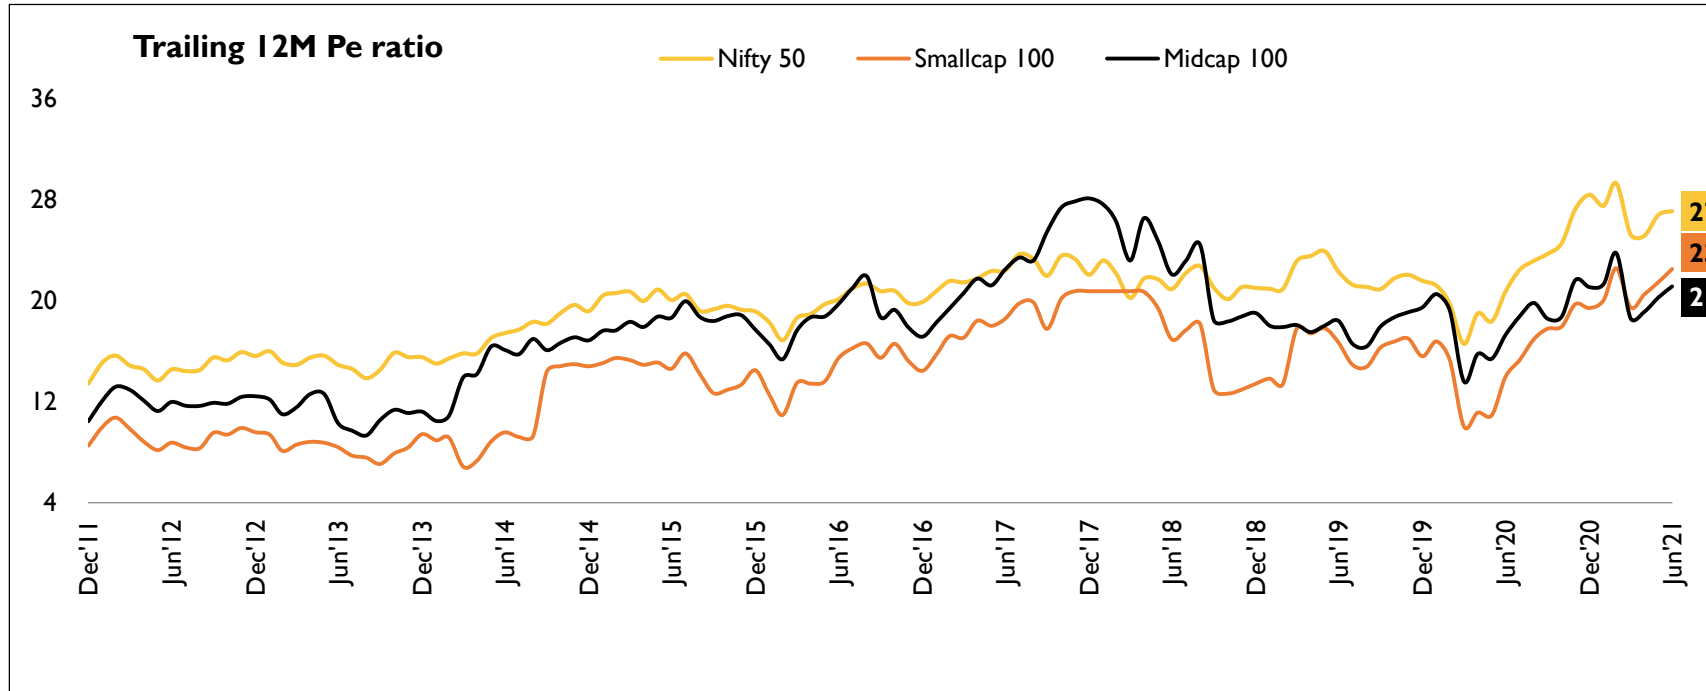

Why Now? - Ample Room for Growth: Nifty Smallcap 100/Nifty 50 still attractive

- This ratio is a good indicator for investing in smallcaps
- It peaks out at ~0.9. Current level suggests room for growth

Why now? – Smallcaps still trading at a discount to Nifty 50

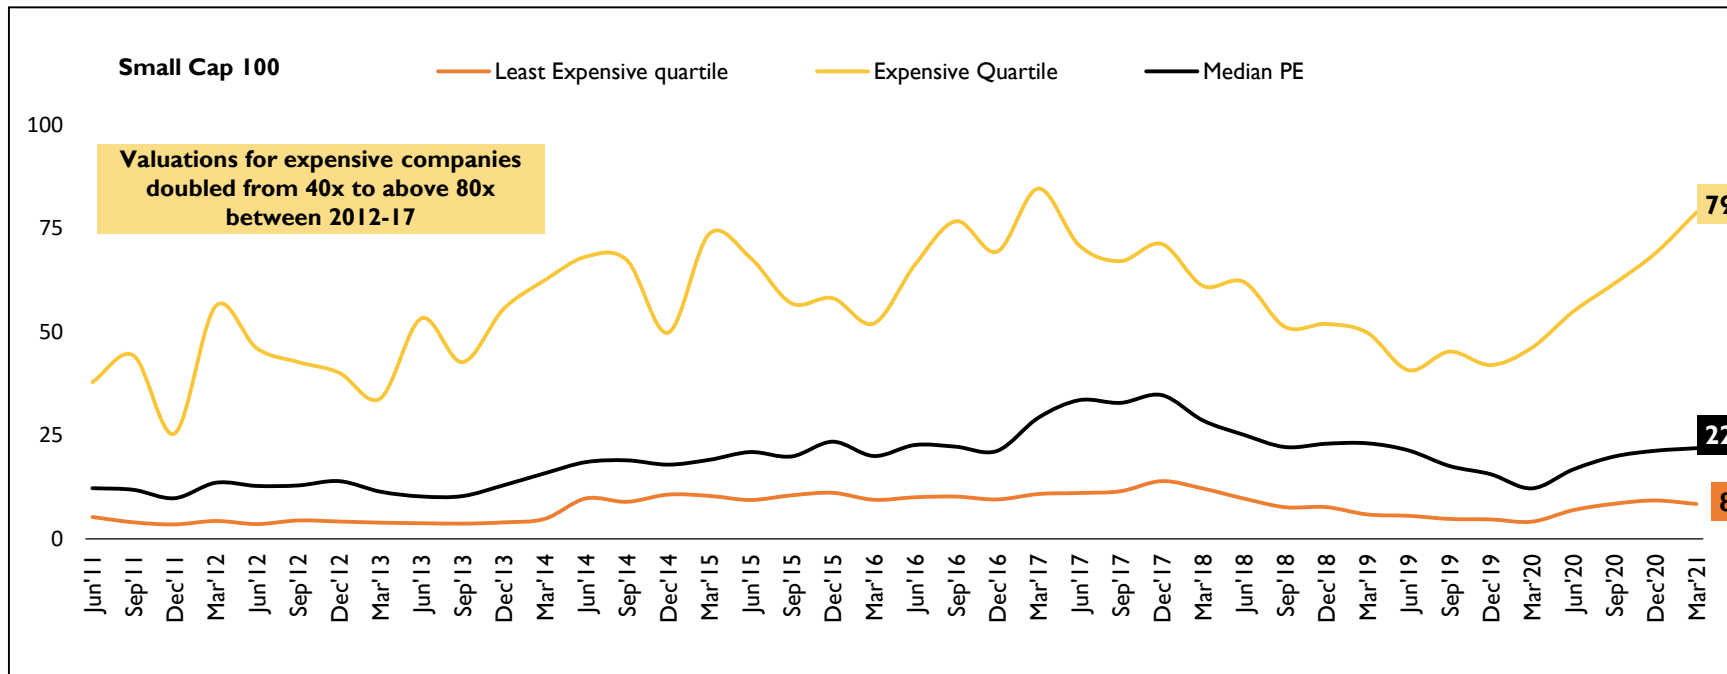

- Removing the loss making companies from both the indices, then Nifty Mid-cap and Nifty Small-Cap indices are trading at trailing P/E of 21x and 23x FY21 earnings, at a marginal discount to Nifty.

Source: MOSL, Data as on 31st July 2021

Disclaimer: Past performance may or may not be sustained in future. The above graph is used to explain the concept and is for illustration purpose only and should not be used for development or implementation of an investment strategy.

Divergence prevalent in Smallcap 100 Universe

- Valuations are hiding more than what they are revealing. If one looks at the trailing 12M valuations for the Smallcap 100, there is a wide divergence between the top quartile and bottom-quartile companies vs. the median P/E of the index.

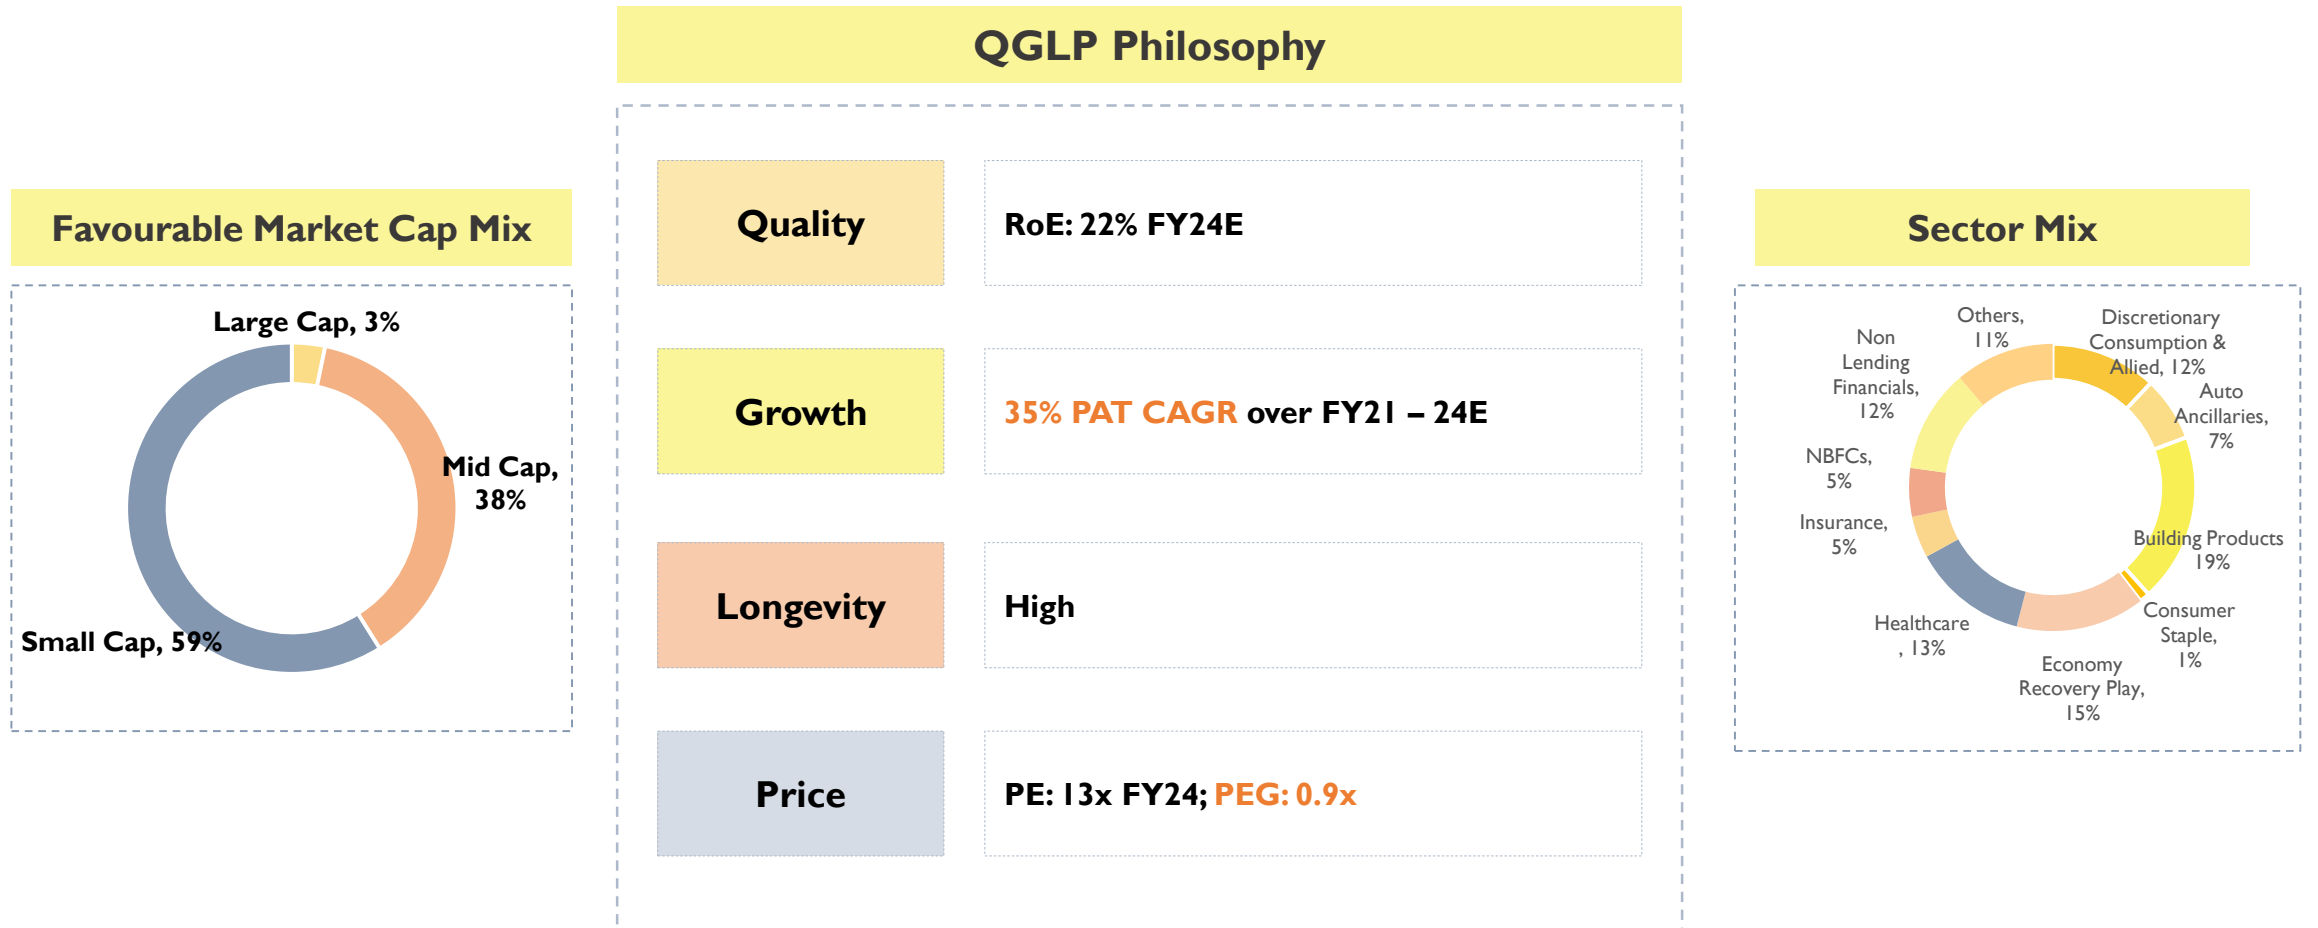

- We have taken the NSE Smallcap 100 universe and broken down the aggregate into four quartiles based on their trailing 12M PEs. Loss making companies have been removed from the aggregates.
- The aggregate quartile P/E of the most expensive stocks trade at 79x, while the least expensive stocks trade at 8.5x.
- Historically (as well as on average), the least expensive aggregate for Smallcap 100 has traded at 7.6x, while the most expensive has traded at 56x.

Source: MOSL, Data as on 31st July 2021

Disclaimer: Past performance may or may not be sustained in future. The above graph is used to explain the concept and is for illustration purpose only and should not used for development or implementation of an investment strategy.

Given such divergence in Small cap Index, IOP portfolio still available at a historically low PEG of 0.9x

Historically Low PEG : Earnings Growth and Valuations in a Sweet Spot

Disclaimer: The Stocks mentioned above are used to explain the concept and is for illustration purpose only and should not be used for development or implementation of any investment strategy. It should not be construed as investment advice to any party. The stocks may or may not be part of our portfolio/strategy/ schemes. Past performance may or may not be sustained in future

Low PEG : WCS23 'Valuation Insights' - Evidence Suggests It's the Best Time to Buy

PEG is short for P/E to Growth ratio : TTM P/E divided by 3 yrs forward earnings growth

PEG- What Works & What Doesn't		
PEG	Average 3Yr Alpha	Instances from 1998-2015
0-1	19%	33%
3+	-10%	11%
< 0*	-19%	34%

* A PEG lesser than zero implies PAT de-growth in the next 3 years

In the 23rd Annual Wealth Creation Study, we used the PEG Ratio with 3-years' forward earnings to study return outcomes.

The findings revealed that

- **Buying stocks at PEG less than 1x is supremely profitable**
- **On average, 1 of every 3 stocks is likely to trade at PEG of less than 1x**

Low PEG : WCS23 ‘Valuation Insights’ - Evidence Suggests It’s the Best Time to Buy

Period 2013-18					
	1 yr	2 yr	3 yr	4 yr	5 yr
Sensex Return	19%	22%	10%	12%	12%
PEG < 1x Return	36%	61%	38%	45%	39%
Alpha	17%	39%	28%	33%	27%

- **Efficacy of PEG ratio is remarkable irrespective of the number of years of growth insight that investors may have.**
- Thus, PEG of less than 1x works for growth forecasts of 1, 2, 3, 4 or 5 years!
- **PEG of 1x delivered handsome alpha in 14 out of 15 observations (barring GFC led fall in 08)**

IOP has a successful performance track record ...

KAJARIA CERAMICS

Strong brand and distribution, market share gains and Real Estate revival to benefit

Global Export Opportunity being serviced by Morbi

- Massive global export opportunity in tiles as countries look to restrict sourcing from China.
- A large chunk of supplies from Morbi to get diverted for exports that are growing at 50%yoy.

Domestic real estate market is at the bottom

- We expect Kajaria to benefit from the boom in real estate cycle which is currently at the bottom of the cycle

Market Share Gains

- Kajaria is the best ceramics play and is constantly gaining share from other private players
- Net cash balance sheet and superior brand, will help capitalise on market share gain

ICICI SECURITIES Ltd.

Strong growth in demat accounts, non brokerage income bring diversification

Industry tailwinds

Strong post-Covid ADTO trend has extended in the 2QFY21 too. Over 3m demat accounts were opened in the past four months.

Impact of regulations

No impact on ISEC due to the new margin norms or share pledging norms that came into effect on 1st Sep'20

MTF and ESOP funding book to grow

Will grow the MTF and ESOP funding book from current levels of INR15b. Received shareholder approval for up to INR35b on the loan book currently, but this cap could be increased in the future.

Revenue diversification

Targeting to grow non-brokerage revenue from 40-42% to 50% of total revenue in a year or so

MAX FINANCIALS

Best in class metrics, Axis Bank as largest shareholder, secular runway & collapse of hold-co structure

Strong underlying insurance business

- With best in class metrics (20%+ VNB Margins, 20% RoEVs) and growth track record (20%+ EV compounding).

Axis Bank overhang on verge of resolution

- Axis Bank emerging as the single largest shareholder with 18% stake. The firm recently received regulatory approvals.

Holdco structure to collapse

- Expect Max Life shares to be listed in the next 12-18 months.

Attractively valued

- Max is at 15x EVOP v/s 35x for HDFC Life, despite business metrics and growth being quite similar.

CENTRAL DEPOSITORY SERVICES (INDIA) LIMITED

Capital markets intermediary in a duopoly play

Strong Macro variables to support the Growth

Improving macro variables (demographics, per capita income), push towards financial inclusion, and shift in savings towards financial assets bodes well for capital market intermediaries

Duopoly market with significant market share

The asset-light model, duopoly play on the secular increase in stockholder accounts coupled with potential market share gains is a major positive for this thinly covered stock

Well poised for growth as a proxy play

As a proxy play on Indian capital markets, CDSL has several new revenue opportunities like (a) dematerialisation of unlisted public companies (d) transaction charges from new pledge/unpledged rules (c) commodity repository (d) Insurance repository business aids CDSL's topline growth

Company to demand higher multiples

Empirical studies suggest that limited-entry sectors tend to trade at higher multiples as investors gauge greater confidence in revenue/earnings, and more importantly, multiples tend to expand when new entities are listed

GLAND PHARMA

A focused injectable player in a large end market with a strong track record

Unique Business Model

- 100% focus on injectable across different formats,
- High backward integration,
- No Front end and own pipeline of molecules
- A win win for both partners and suppliers. High Longevity

Favourable Economics

- Injectables forms 40% share of the global Pharma market of ~USD 1tn,
- Demand is growing at 10% annually in USD terms globally and 13% annually in the US itself
- Supply is unable to match the pace of demand

Exemplary Financial and Operational Excellence

- Zero US FDA notifications across its facilities over the last 2 decades reflects the culture of the firm and strong focus on quality parameters.
- This positions them to be a preferred supplier for their partners

Key Triggers

- Sputnik Vaccine orders
- Large Cash pile to be used for possible M&As
- Large Injectibles market in China – yet to be explored

Small Cap stocks are a volatile and unpredictable lot...

...but may provide the greatest opportunities for upside

To earn super-normal returns with small cap stocks:

- **Be patient**
- **Never exit looking at rear-view performance**
- **Double up at extremes if possible**

Chairman – Investment Committee

Raamdeo Agrawal
Chairman, MOFSL
