

A FUND WITH POWER AND PROTECTION

Motilal Oswal Dynamic Fund

Fluctuating market conditions can cause you to worry about your equity investments. But with a fund that has the power and protection of both equity and debt, you need not worry!

Our Motilal Oswal Dynamic Fund (**MOFDYNAMIC**), uses our proprietary Motilal Oswal Value Index (MOVI) to calibrate exposure to equity as per changing market valuations. While equity powers creation of wealth, booking profits in a calibrated fashion aims to protect from downside during market corrections and short-term volatility.

SIT TIGHT APPROACH

- **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- **Focus:** Our portfolios are high conviction portfolios with 25 to 30 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk
