- Equity and Equity related securities covered by Nifty 500 Index
- Long-term capital growth

Riskometer

**Investors should consult their financial advisers if in doubt about whether the product is suitable for them.*

INDIA'S GROWTH STORY INTACT OVER MEDIUM TO LONG TERM

India's key macro-economic factors propelling growth

Lowest Repo Rate

Brent Crude Oil Prices - 10 Year Daily Chart

All time high Forex Reserves; great cushion

- India has **solid forex reserve** of over \$580 bn. A solid buffer in case of global volatility¹
- Low crude prices mean lower Current Account Deficit (CAD)** (CAD - drastically came down from 5% in 2012 to 0.93% in 2019, also crude is expected to be around ~\$37 in 2020 and expected to be below \$50 in 2021)²
- Repo rate is at lowest level over last 20 years.** This is expected to reduce cost of financing and thereby fueling production and consumption. There by helping GDP growth rate³

Source/Disclaimer: 1 - rbi.org.in, 2 - www.macrotrends.net, 3 - rbi.org.in. Data as of 31-Dec-2020. Past performance may or may not be sustained in future.

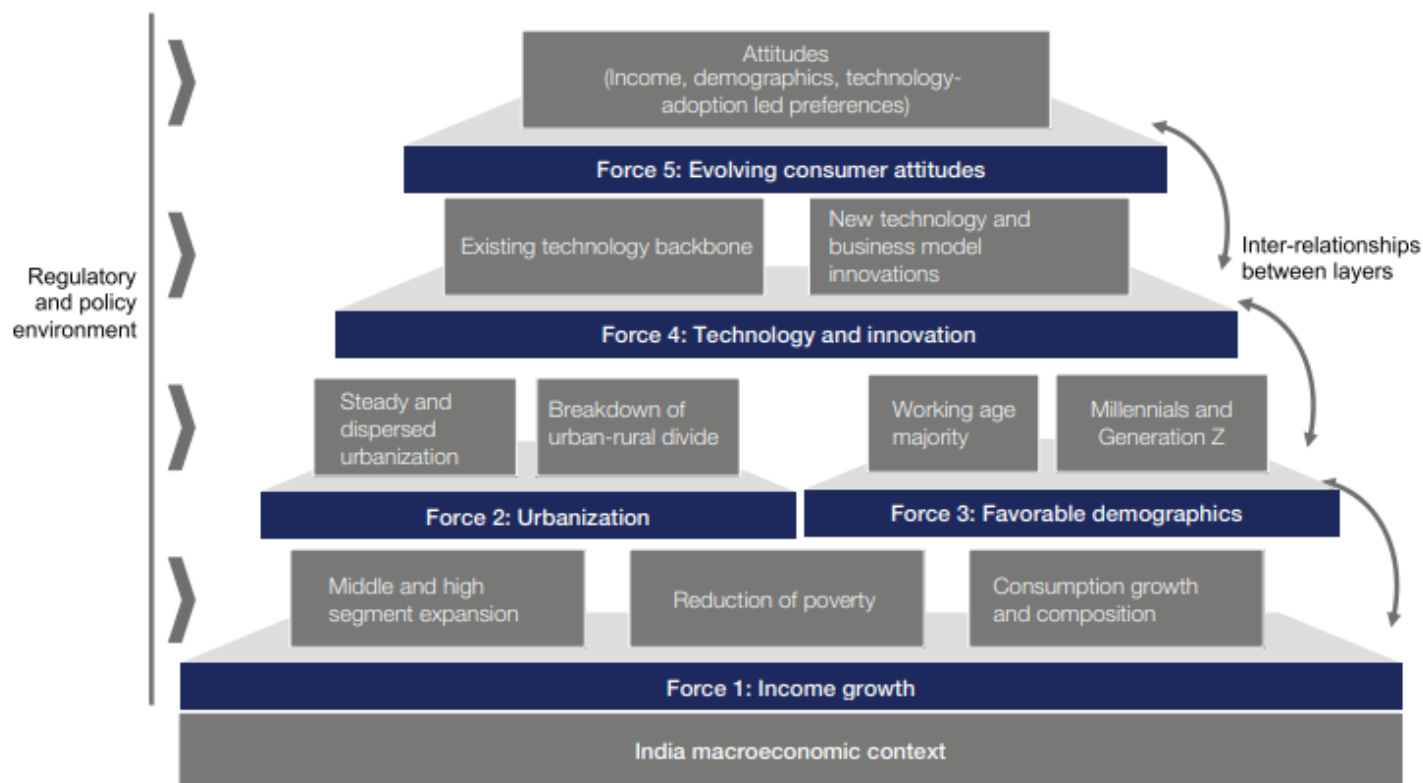

India expected to benefit from young working age population

- Economic growth potential that results from shift in population's age structure
- **65% of the population under 35 years⁴**
- Key determinants of economy's longer run growth rate- **Labour** (young population) & capital (higher saving) inputs
- Shape aggregate consumption, saving and investment decision
- Structural factors of Indian economy favourable to catapult growth
 - **Consumption driven economy**
(Domestic consumption powers 60% of GDP)⁵
 - Relatively **high gross savings** as % of GDP (India ~31%, World Avg.~25%)⁶

Global PE/VC Increasing Investment in India

- **India is emerging as one of the leading destinations for global PE/VC** (\$48bn inflows in 2019, a 28% increase over 2018 / Following global trend at 1.7% of GDP)⁷
- **Translates to \$ 87.5bn of funding between 2017-2019 towards job creation**, incremental capacities, technology, infrastructure etc. - 26 lakh job generated in 2019 by PE/VC backed startup⁸
- Investment in core sector - financial (especially Fintech and NBFC) service accounting to \$23.7bn between 2017-2019

Short term headwinds

- Global economic **impact due to the Covid-19 pandemic expected to be broader than the Great Depression of 1928**⁹
- **De-Growth projected by World Bank** for FY 21 (India- 9.6%)¹⁰
- Balancing act between containing outbreak and reducing economic toll
- **Weak credit growth** (slowed to 5.9% in Dec 2020 from 7.0% in Dec 2019)¹¹

Global GDP Growth Rate

Destabilizing world's factory

- **Global anti China sentiment** primarily driven by:
 - Unfair trade and technology practices
 - Territorial Disputes with neighbouring countries
 - Accusation by US for suppressing early information on the virus
- **Great opportunity for India to become a manufacturing hub** - India putting together land bank up to the size of Luxemburg, a special task force to promote make in India¹²
- Factors in favour of India-
 - **Considerable improvement in Rank of Ease of Doing Business** from 142 in 2014 to 63 in 2020 among 190 countries¹³
 - **Young India** - Prime age labor being added, will help increase consumption and savings
 - **Radical reforms** - Implementation of GST, Digitisation Drive, Insolvency Code, Easing FDI Policy Regime, Infrastructure push, Corporate Tax Rate cut to 15%)

Source/Disclaimer: 12 – Business Standard, May 2020; 13 - World Bank, Oct 2019

Destabilizing world's factory

- **Challenges for India -**
 - Need to fully realize comparative manufacturing advantage
 - According to Nomura Securities 56 firms left China between August 2018-August 2019 (2- Indonesia, 8- Thailand, 11- Taiwan, 26- Vietnam, only 3 came to India)¹⁴
 - Twin balance sheet problems (Over leveraged companies & banks with bad loans)
 - Weak linkage to global value chain
 - Although there have been big ticket reforms, policy implementation will be key

Global: Active Passive Score Card

SPIVA® Around the World

Percentage of active funds outperformed
by benchmarks* over 1-, 3-, and 5-year periods

The SPIVA Difference

- 1 Accounts for the entire opportunity set—not just the survivors—thereby **eliminating survivorship bias**.
- 2 Applies an **apples-to-apples comparison** by measuring a fund's returns against the returns of a benchmark appropriate for that particular investment category.
- 3 Shows that **asset-weighting matters** by using both equal- and asset-weighted averages.
- 4 Uses only the share class with greater assets, which **avoids double counting** multiple share classes in all count-based calculations.

Source/Disclaimer: spdji.com/SPIVA; June 2020; Regional benchmarks included here are large-cap, with the exception of Brazil and Chile where SPIVA results displayed reflect regional broad market indices. Multiple benchmarks exist in all regions tracked by SPIVA. Visit www.spdji.com/spiva for more information.

Performance of Active Mutual Fund schemes vs Category Benchmark (3yr CAGR)

India: Growth of Passive Fund AUM

Retirement Funds are mandated to invest at least 15% of annual accretion in Equity ETFs/Index Funds for equity investments

Categorization and rationalization of Mutual Fund Schemes by SEBI

Benchmarking of funds moved from Price Return Index (PRI) to Total Return Index (TRI)

Challenges in generating alpha due to improving market efficiency.

Source/Disclaimer: AMFI, AceMF. All AUM data in INR. Data from 30-Dec-2015 to 30-Dec-2020. The above graph is used to explain the concept and is for illustration purpose only and should not be used for development or implementation of an investment strategy. Past performance may or may not be sustained in future.

Key Take Away

1. **Over medium to long term, India's structural factors look solid,** despite short term headwind especially due to Covid-19 Pandemic
2. **Nifty 500 Index covers 94%** of India's listed universe in terms of total market capitalization making it **ideal proxy for Indian equities.**
3. **Nifty 500 Index one of most benchmarked Index.** It offers pure beta exposure to Large, Mid and Small caps and all 19 Sectors defined by NSE.
4. **Performance of Nifty 500 Index is combination of Large, Mid and Smallcap**
5. **Blending Nifty 500 Index with US Equity is expected to improve risk adjusted returns** over medium to long term

Disclaimers & Risk Factors

This presentation has been prepared and issued on the basis of internal data, publicly available information and other sources believed to be reliable. The information contained in this document is for general purposes only and not a complete disclosure of every material fact and terms and conditions. The information / data herein alone is not sufficient and shouldn't be used for the development or implementation of an investment strategy. It should not be construed as investment advice to any party.

All opinions, figures, charts/graphs, estimates and data included in this presentation are as on date and are subject to change without notice. The statements contained herein may include statements of future expectations and other forward-looking statements that are based on our current views and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. Readers shall be fully responsible / liable for any decision taken on the basis of this presentation. Investments in Securities are subject to market and other risks and there is no assurance or guarantee that the objectives of any of the Schemes will be achieved. The scheme may not be suited to all categories of investors.

The material is based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied upon as such. Opinions, if any, expressed are our opinions as of the date of appearing on this material only. While we endeavor to update on a reasonable basis the information discussed in this material, there may be regulatory, compliance, or other reasons that prevent us from doing so. Recipient shall understand that the aforementioned statements cannot disclose all the risks and characteristics. The recipient is requested to take into consideration all the risk factors including their financial condition, suitability to risk return, etc. and take professional advice before investing.

Passive Investments - The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Index Fund - The Scheme being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Risks associated with overseas investment

To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, and bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

Currency Risk:

The fund may invest in overseas mutual fund / foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes/fluctuations in the value of the foreign currencies relative to the Indian Rupee.

Country Risk:

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.

Mutual Fund Investments are subject to market risks, read all scheme related documents carefully
